

## Zoom and Mitel announce rollout of AI-first hybrid communications and collaboration solution

February 27, 2025

**Jointly developed, globally available solution combines Zoom's seamless AI-first collaboration experience with Mitel's enterprise-grade telephony reliability and resiliency through a single application**

SAN JOSE, Calif., Feb. 27, 2025 (GLOBE NEWSWIRE) -- Today, [Zoom Communications, Inc.](#) (NASDAQ: ZM) and [Mitel](#), a global leader in business communications, announced the global launch of a unique hybrid cloud solution that integrates Zoom Workplace and Zoom AI Companion with Mitel's flagship communications platforms, including its leading telephony solutions. This marks a significant milestone in the strategic partnership between the companies [announced](#) in September 2024.

Today, organizations are navigating the adoption of emerging technologies like AI while maintaining security, business continuity, and flexibility when modernizing business communications. This new solution is designed to meet the growing enterprise demand for hybrid unified communications (UC) deployments by offering a "best-of-both-worlds" approach that empowers organizations to deliver mission-critical communications capabilities alongside exceptional collaboration functions to enhance business productivity.

The multi-phased rollout will see Zoom's AI-first solution integrate seamlessly with existing Mitel software and devices, starting now with global availability for Mitel's OpenScape Voice and OpenScape 4000 platforms. This will be expanded to include MiVoice Business solutions in the coming weeks, as well as MiVoice 5000 and MX-ONE solutions before the end of 2025. Device portfolios like the OpenScape CP and the Mitel 6900 Series are now Zoom Phone certified, with the full list of certified models available [here](#). Certification of Mitel's OpenScape SBC is also complete, enabling compatibility with Zoom's Bring-Your-Own-PBX (BYOP) and Bring-Your-Own-Carrier (BYOC) direct routing capabilities. Mitel Border Gateway (MBG) certification will follow in the weeks ahead.

"As businesses navigate the connectivity requirements to support hybrid work, they need solutions that unite the benefits of on-prem or single-instance cloud communications infrastructure with Zoom's industry-leading collaboration experiences, giving them the best of both while future-proofing their organizations," said Graeme Geddes, chief sales and growth officer at Zoom. "The AI-first solution provided by Zoom and Mitel makes connecting and collaborating seamless and efficient while giving customers the flexibility to migrate to the cloud on their own terms and with their existing Mitel devices."

"Recent research shows 92% of mid-to-large enterprises are considering hybrid deployments, and for good reason," said David Petts, chief sales officer at Mitel\*. "In today's rapidly changing workplace, staying connected through video, chat, or voice is more important than ever and a vital part of business continuity planning. Mitel's strategic partnership with Zoom has produced an offering that provides seamless access to these solutions while enabling compliance and security control in the most demanding use cases, industries, and geographies. With the integration of Zoom's AI Companion, it's a winning combination for organizations looking for an elevated collaboration experience that truly fits their overall communication needs."

### **Deliver AI-first collaboration tools built for modern work**

With the Zoom Workplace app fully integrated with secure Mitel telephony and devices, users can call, meet, and chat from a single solution, including the ability to escalate from a Mitel-powered call directly into a Zoom meeting. Additionally, users can brainstorm ideas, develop content, and kickstart project plans with Zoom Docs, Zoom Whiteboard, Zoom Clips, and more. AI Companion is woven throughout to help users jumpstart content creation, stay focused, prioritize what's important, and get answers fast.

### **Maintain control and maximize current investments**

With the joint hybrid solution, users can maintain unmatched control over mission-critical activities like release schedules, configurations, updates, system changes, and telephony while leveraging existing investments without isolation. For organizations in specialized industries like healthcare, hospitality, government, and financial services, this means having the ability to continue to leverage existing Mitel-certified vertical integrations along with specialized devices and workflows for frontline workers.

### **Blend on-prem and cloud capabilities to suit an organization's unique requirements**

The hybrid architecture from Zoom and Mitel provides users with a simple approach to blending on-prem with the right mix of private and public cloud on their terms to meet their unique needs. It gives organizations the flexibility, tools, and resilience they need to future-proof their current systems while maintaining reliability throughout the process. Additionally, using the Zoom Workplace app, users will have access to a consistent modern user experience every step of the way. If UCaaS is ultimately their preferred deployment model, they can easily bring their certified Mitel devices with them.

Jim Lundy, Founder & CEO of Aragon Research, confirms that "The Mitel-Zoom partnership is a game changer, offering businesses a path to hybrid communications with AI collaboration and communications capabilities."

The joint solution is now available to customers worldwide. Further advanced capabilities are underway as part of the multi-phase partnership plan. For more information about the joint solution, please visit <https://www.mitel.com/products/zoom-workplace>.

\* According to a June 2024 global survey of 1,954 organizations conducted by Mitel and Techaisle.
