SECURITIES AND EXCHANGE COMMISSION**
Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended April 30, 2020

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

FOR THE TRANSITION PERIOD FROM TO

Commission File Number 001-38865

Zoom Video Communications, Inc.

(Exact name of registrant as specified in its Charter)

Delaware
(State or other jurisdiction
of incorporation or organization)

61-1648780
(I.R.S. Employer
Identification No.)

55 Almaden Boulevard, 6th Floor
San Jose, California 95113
(Address of principal executive offices and Zip Code)

(888) 799-9666
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Class A Common Stock, \$0.001 par value per share	ZM	The Nasdaq Global Select Market

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input checked="" type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
Emerging growth company	<input checked="" type="checkbox"/>		

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of May 22, 2020, the number of shares of the registrant's Class A common stock outstanding was 182,105,837 and the number of shares of the registrant's Class B common stock outstanding was 99,997,149.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which statements involve substantial risks and uncertainties. All statements other than statements of historical facts contained in this Quarterly Report on Form 10-Q, including statements regarding our future results of operations or financial condition; business strategy and plans; and objectives of management for future operations, including our statements regarding the benefits and timing of the roll out of new technology, are forward-looking statements. In some cases, you can identify forward-looking statements because they contain words such as “anticipate,” “believe,” “contemplate,” “continue,” “could,” “estimate,” “expect,” “intend,” “may,” “plan,” “potential,” “predict,” “project,” “should,” “target,” “will,” or “would” or the negative of these words or other similar terms or expressions. Forward-looking statements contained in this Quarterly Report on Form 10-Q include, but are not limited to, statements about: our future financial performance, including our revenue, cost of revenue, gross profit, margins, and operating expenses; trends in our key business metrics; the sufficiency of our cash and cash equivalents, investments, and cash provided by sales of our products and services to meet our efforts to enhance the security and privacy of our platform; our efforts to enhance the security and privacy of our platform; the potential impacts of the outbreak of the coronavirus disease 2019 (“COVID-19”) and related public health measures on our business, the business of our customers, suppliers and channel partners, and the economy; our liquidity needs; our ability to become the ubiquitous platform for communications; our ability to attract new customers and retain existing customers; our ability to successfully expand into our existing markets and into new markets; our ability to effectively manage our growth and future expenses; and the impact of recent accounting pronouncements on our unaudited condensed consolidated financial statements.

You should not rely on forward-looking statements as predictions of future events. We have based the forward-looking statements contained in this Quarterly Report on Form 10-Q primarily on our current expectations and projections about future events and trends that we believe may affect our business, financial condition, and operating results. The outcome of the events described in these forward-looking statements is subject to risks, uncertainties, and other factors described in the section titled “Risk Factors” and elsewhere in this Quarterly Report on Form 10-Q. Moreover, we operate in a very competitive and rapidly changing environment. New risks and uncertainties emerge from time to time, and it is not possible for us to predict all risks and uncertainties that could have an impact on the forward-looking statements contained in this Quarterly Report on Form 10-Q. The results, events, and circumstances reflected in the forward-looking statements may not be achieved or occur, and actual results, events, or circumstances could differ materially from those described in the forward-looking statements.

In addition, statements that “we believe” and similar statements reflect our beliefs and opinions on the relevant subject. These statements are based on information available to us as of the date of this Quarterly Report on Form 10-Q. While we believe that such information provides a reasonable basis for these statements, that information may be limited or incomplete. Our statements should not be read to indicate that we have conducted an exhaustive inquiry into, or review of, all relevant information. These statements are inherently uncertain, and investors are cautioned not to unduly rely on these statements.

The forward-looking statements made in this Quarterly Report on Form 10-Q relate only to events as of the date on which the statements are made. We undertake no obligation to update any forward-looking statements made in this Quarterly Report on Form 10-Q to reflect events or circumstances after the date of this Quarterly Report on Form 10-Q or to reflect new information or the occurrence of unanticipated events, except as required by law. We may not actually achieve the plans, intentions, or expectations disclosed in our forward-looking statements, and you should not place undue reliance on our forward-looking statements. Our forward-looking statements do not reflect the potential impact of any future acquisitions, mergers, dispositions, joint ventures, or investments.

You should read this Quarterly Report on Form 10-Q and the documents that we reference in this Quarterly Report on Form 10-Q and have filed with the Securities and Exchange Commission as exhibits to this Quarterly Report on Form 10-Q with the understanding that our actual future results, levels of activity, performance, and events and circumstances may be materially different from what we expect.

ZOOM VIDEO COMMUNICATIONS, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

1. Summary of Business and Significant Accounting Policies

Description of Business

Zoom Video Communications, Inc. and its subsidiaries (together, “Zoom,” the “Company,” “we,” “us,” or “our”) provide a video-first, unified communications platform. Our platform combines video, audio, phone, screen sharing, and chat functionalities. We were incorporated in the state of Delaware in April 2011 and are headquartered in San Jose, California.

Fiscal Year

Our fiscal year ends on January 31. References to fiscal year 2021, for example, refer to the fiscal year ending January 31, 2021.

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America (“GAAP”) and applicable regulations of the Securities and Exchange Commission (“SEC”) regarding interim financial reporting, and include the accounts of Zoom Video Communications, Inc., its subsidiaries, and a variable interest entity (“VIE”) for which we are the primary beneficiary. All intercompany balances and transactions have been eliminated in consolidation.

The condensed consolidated balance sheet as of January 31, 2020 included herein was derived from the audited financial statements as of that date, but does not include all disclosures, including certain notes required by GAAP on an annual reporting basis. The unaudited condensed consolidated financial statements reflect all normal recurring adjustments necessary to present fairly the balance sheets, statements of operations, statements of comprehensive income, statements of convertible preferred stock and stockholders’ equity (deficit), and statements of cash flows for the interim periods, but are not necessarily indicative of the results of operations to be anticipated for the full fiscal year or any future period.

The unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes included in our Annual Report on Form 10-K for the year ended January 31, 2020, filed with the SEC on March 20, 2020.

Use of Estimates

The preparation of condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenue and expenses during the reporting period. Significant items subject to such estimates and assumptions include, but are not limited to, the estimated expected benefit period for deferred contract acquisition costs, the allowance for credit losses, the useful lives of long-lived assets, the incremental borrowing rate for operating leases, the value of common stock and other assumptions used to measure stock-based compensation expense, sales and other tax liabilities, the fair value of the convertible promissory note, and the valuation of deferred income tax assets and uncertain tax positions. Actual results could differ from those estimates.

The novel coronavirus (“COVID-19”) pandemic has created, and may continue to create, significant uncertainty in macroeconomic conditions, and the extent of its impact on our operational and financial performance will depend on certain developments, including the duration and spread of the outbreak and the impact on our customers and our sales cycles. During the three months ended April 30, 2020, many of our estimates and assumptions required increased judgment and carried a higher degree of variability and volatility. As events continue to evolve and additional information becomes available, our estimates may change materially in future periods.

Summary of Significant Accounting Policies

Our significant accounting policies are discussed in Note 1. “Summary of Business and Significant Accounting Policies” in the notes to consolidated financial statements included in our Annual Report on Form 10-K for the year ended January 31, 2020, filed with the SEC on March 20, 2020. There have been no significant changes to these policies during the three months ended April 30, 2020, except as noted below.

Restricted Cash

Restricted cash consisted of certificates of deposit collateralizing our operating leases, corporate credit cards, and cash from proceeds on international employees' sales of our common stock, and is included in prepaid expenses and other current assets and other assets, noncurrent in the condensed consolidated balance sheets.

As of April 30, 2020 and January 31, 2020, we had \$267.1 million and \$48.5 million, respectively, of cash from proceeds on international employees' sales of our common stock. The amount is held in our bank account until it is remitted to the employees and the tax authorities. Due to the restrictions on the use of the funds in the bank account, we have classified the amount as restricted cash included in prepaid expenses and other current assets, and a corresponding amount included in accrued expenses and other current liabilities in the condensed consolidated balance sheets.

Allowance for Credit Losses

We are exposed to credit losses primarily through our accounts receivable and investments in available-for-sale debt securities. See Note 3 for additional information related to our available-for-sale debt securities.

Accounts receivable, net

Accounts receivable are recorded for invoiced amounts and amounts for which revenue has been recognized, but not invoiced, net of allowances. Our short-term accounts receivable consist of the following:

	<u>April 30, 2020</u>
	<u>(in thousands)</u>
Accounts receivable, gross	\$ 269,502
Less: allowance for credit losses	(8,300)
Less: allowance for returns	(3,690)
Accounts receivable, net	<u>\$ 257,512</u>

We maintain an allowance for credit losses for expected uncollectible accounts receivable, which is recorded as an offset to accounts receivable, and changes in such are classified as general and administrative expense in the condensed consolidated statements of operations. The allowance for credit losses is based on management's estimate for expected credit losses for outstanding accounts receivable. We determine expected credit losses based on historical write-off experience, an analysis of the aging of outstanding receivables, customer payment patterns, the establishment of specific reserves for customers in an adverse financial condition, and adjusted based upon our expectations of changes in macro-economic conditions that may impact the collectability of outstanding receivables, including noncurrent accounts receivable. We also consider current market conditions and reasonable and supportable forecasts of future economic conditions to inform adjustments to historical loss data. We reassess the adequacy of the allowance for credit losses each reporting period.

For the three months ended April 30, 2020, our assessment considered business and market disruptions caused by COVID-19 and estimates of credit and collectibility trends. The continued volatility in market conditions and evolving shifts in credit trends are difficult to predict, causing variability and volatility that may have a material impact on our allowance for credit losses in future periods. Below is a rollforward of our allowance for credit losses for the three months ended April 30, 2020:

	<u>(in thousands)</u>
Balance as of January 31, 2020	\$ 5,150
Provision for credit losses	3,771
Write-offs	(621)
Balance as of April 30, 2020	<u>\$ 8,300</u>

Available-for-sale Investments

Available-for-sale investments consist primarily of high-grade commercial paper, agency bonds, corporate bonds, corporate and other debt securities, U.S. government agency securities, and treasury bills. We classify our marketable securities as available-for-sale at the time of purchase and reevaluate such classification at each balance sheet date. We may sell these securities at any time for use in current operations even if they have not yet reached maturity. As a result, we classify our securities, including those with maturities beyond 12 months, as current assets in the condensed consolidated balance sheets. We carry these securities at fair value and record unrealized gains and losses in accumulated other comprehensive income, which is reflected as a component of stockholders' equity. We evaluate our securities with unrealized loss positions as to whether the declines in fair value were due to credit losses, and record the portion of impairment relating to the credit losses.

through allowance for credit losses limited to the amount that fair value was less than the amortized cost basis. Realized gains and losses from the sale of marketable securities are determined based on the specific identification method. Realized gains and losses are reported in interest income and other, net in the condensed consolidated statements of operations.

Cloud Computing Arrangement Implementation Costs

We capitalize certain implementation costs incurred in a cloud computing arrangement during the application development stage. Costs incurred in the preliminary stages of development are analogous to research and development activities and are expensed as incurred. The preliminary stage includes activities such as formulation and evaluation of alternatives, determination of existence of needed technology, and final selection of alternatives. Once the application development stage is reached, internal and external costs are capitalized until the hosted software is ready for its intended use. Capitalized implementation costs are recorded as deferred costs, and are included in prepaid expenses and other current assets and other assets, noncurrent in the condensed consolidated balance sheets. Maintenance, minor upgrades, and training costs are expensed as incurred. Capitalized implementation costs are amortized over the term of the hosting arrangement on a straight-line basis, and are recorded under operating expenses in the same line item in the condensed consolidated statements of operations as the expense for fees for the associated hosting arrangement. The capitalized implementation costs were not material during the three months ended April 30, 2020.

Equity Investment

In the third quarter of fiscal year 2020, we made a \$3.0 million strategic investment in a private company in the business of designing and developing video communications hardware. In the first quarter of fiscal year 2021, we made an additional \$8.0 million strategic investment in this company.

We do not have a controlling financial interest in the investee nor the ability to exercise significant influence over the operating and financial policies of the investee. The investment is included within other assets, noncurrent in the condensed consolidated balance sheets. Dividend income, unrealized and realized holding gains or losses, and impairment charges would be reported in interest income and other, net in the condensed consolidated statements of operations. The maximum loss we could incur for this investment is its carrying value.

We have elected to measure this investment, which does not have a readily determinable fair value, at its cost, minus impairment, if any, plus or minus changes resulting from observable price changes in orderly transactions for the identical or a similar investment of the same issuer (i.e., using the measurement alternative). At each reporting period, we perform a qualitative assessment considering impairment indicators to evaluate whether the investment is impaired. If this qualitative assessment indicates that the investment is impaired and the fair value of the investment is less than its carrying amount, the investment would be written down to its fair value.

In connection with the additional investment and the indicated change in the observable price of the underlying shares of the investee as a result of orderly transactions, we have recognized a remeasurement gain of \$2.5 million on the initial investment. As of April 30, 2020, the carrying amount of this investment was \$13.5 million.

Convertible Promissory Note

In the first quarter of fiscal year 2021, we invested \$5.0 million in a five-year convertible promissory note of a privately held company (the "Convertible Note"), which bears interest at 3.0% on the unpaid principal balance, compounded annually. We may elect to convert the Convertible Note into shares of the privately held company's stock prior to, or on, the maturity date of the Convertible Note. Upon a liquidity event, the Convertible Note will be automatically converted into shares of the privately held company's stock.

The Convertible Note is included in other assets, noncurrent in the condensed consolidated balance sheets. Interest accrues on the unpaid principal balance on a quarterly basis, and is recognized in interest income and other, net in the condensed consolidated statements of operations. Interest income related to the Convertible Note was immaterial for the three months ended April 30, 2020. We have elected to measure the Convertible Note at fair value (i.e., using the fair value option). Under the fair value option, bifurcation of an embedded derivative is not necessary, and all related gains and losses on the host contract and derivative due to change in the fair value will be reflected in interest income and other, net in the condensed consolidated statements of operations. As of April 30, 2020, the fair value of the Convertible Note investment was measured at \$5.0 million.

Recently Adopted Accounting Pronouncements

In June 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2016-13, *Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*, which was subsequently amended by ASU No. 2018-19, *Codification Improvements to Topic 326, Financial Instruments - Credit*

Losses, in November 2018. Subsequently, the FASB issued ASU No. 2019-04, ASU No. 2019-05, ASU No. 2019-10, and ASU No. 2019-11 to provide additional guidance on the credit losses standard. ASU No. 2016-13 and the related updates replace the existing incurred loss impairment model with an expected credit loss model and requires a financial asset measured at amortized cost to be presented at the net amount expected to be collected. The guidance is effective for the annual periods in fiscal years beginning after December 15, 2019, and interim periods therein. We adopted the standard as of February 1, 2020, using the modified retrospective method of applying the new standard at the adoption date. Our adoption did not result in any cumulative effect adjustment on our condensed consolidated financial statements upon adoption as of February 1, 2020.

In August 2018, the FASB issued ASU No. 2018-15, *Intangibles—Goodwill and Other—Internal-use Software (subtopic 350-40): Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement that is a Service Contract*. The amendment aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software (and hosting arrangements that include an internal-use software license). The guidance is effective for the annual periods in fiscal years beginning after December 15, 2019, and interim periods therein. We adopted ASU No. 2018-15, prospectively, as of February 1, 2020, and our adoption did not have a material impact on the condensed consolidated financial statements.

2. Revenue Recognition

Disaggregation of Revenue

The following table summarizes revenue by region based on the billing address of customers:

	Three Months Ended April 30,			
	2020		2019	
	Amount	Percentage of Revenue	Amount	Percentage of Revenue
(in thousands, except percentages)				
Americas	\$ 245,633	75 %	\$ 98,160	80 %
Asia Pacific (“APAC”)	31,278	9	10,441	9
Europe, Middle East, and Africa (“EMEA”)	51,256	16	13,387	11
Total	\$ 328,167	100 %	\$ 121,988	100 %

Contract Balances

We receive payments from customers based on a billing schedule as established in our customer contracts. Accounts receivable are recorded when we contractually have the right to consideration. In some arrangements, a right to consideration for our performance under the customer contract may occur before invoicing to the customer, resulting in an unbilled accounts receivable. The amount of unbilled accounts receivable included within accounts receivable, net of allowances in the condensed consolidated balance sheets was \$19.6 million and \$12.5 million as of April 30, 2020 and January 31, 2020, respectively.

Contract liabilities consist of deferred revenue. Revenue is deferred when we have the right to invoice in advance of performance under a customer contract. The current portion of deferred revenue balances is recognized over the next 12 months. The amount of revenue recognized during the three months ended April 30, 2020 and 2019 that was included in deferred revenue at the beginning of each period was \$98.0 million and \$53.6 million, respectively.

Remaining Performance Obligation

The terms of our subscription agreements are monthly, annual, and multiyear, and we may bill for the full term in advance or on an annual or monthly basis, depending on the billing terms with customers. As of April 30, 2020, the aggregate amount of the transaction price allocated to our remaining performance obligations was \$1.1 billion, which consists of both billed consideration in the amount of \$551.8 million and unbilled consideration in the amount of \$516.1 million that we expect to recognize as revenue. We expect to recognize 72% of our remaining performance obligations as revenue over the next 12 months and the remainder thereafter.

3. Marketable Securities

As of April 30, 2020 and January 31, 2020, our marketable securities consisted of the following:

	April 30, 2020			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(in thousands)			
Commercial paper	\$ 11,892	\$ —	\$ —	\$ 11,892
Agency bonds	157,493	285	(56)	157,722
Corporate and other debt securities	392,575	1,780	(344)	394,011
U.S. government agency securities	49,871	218	—	50,089
Treasury bills	2,996	4	—	3,000
Marketable securities	<u>\$ 614,827</u>	<u>\$ 2,287</u>	<u>\$ (400)</u>	<u>\$ 616,714</u>

	January 31, 2020			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
	(in thousands)			
Commercial paper	\$ 37,894	\$ —	\$ —	\$ 37,894
Agency bonds	141,157	49	(43)	141,163
Corporate and other debt securities	320,407	775	(16)	321,166
U.S. government agency securities	71,794	45	(2)	71,837
Marketable securities	<u>\$ 571,252</u>	<u>\$ 869</u>	<u>\$ (61)</u>	<u>\$ 572,060</u>

We review the individual securities that have unrealized losses on a regular basis to evaluate whether or not any security has experienced and expect to experience credit losses which resulted in the decline in fair value. We evaluate, among other factors, whether we have the intention to sell any of these marketable securities and whether it is more likely than not that we will be required to sell any of them before recovery of the amortized cost basis. We have not recorded an allowance for credit losses, as we believe any such losses would be immaterial based on the high-grade credit rating for each of our marketable securities as of the end of each period. There were no material realized gains or losses from available-for-sale securities that were reclassified out of accumulated other comprehensive income for the three months ended April 30, 2020 and 2019.

The following table presents the contractual maturities of our marketable securities as of April 30, 2020 and January 31, 2020:

	As of	
	April 30, 2020	January 31, 2020
	(in thousands)	
Less than one year	\$ 326,287	\$ 315,900
Due in one to five years	290,427	256,160
Total	<u>\$ 616,714</u>	<u>\$ 572,060</u>

4. Fair Value Measurements

The following table presents information about our financial instruments that are measured at fair value on a recurring basis and indicate the fair value hierarchy of the valuation inputs utilized to determine such fair value:

	April 30, 2020			
	Fair Value	Level 1	Level 2	Level 3
(in thousands)				
Financial Assets:				
Money market funds	\$ 220,739	\$ 220,739	\$ —	\$ —
Cash equivalents	220,739	220,739	—	—
Commercial paper	11,892	—	11,892	—
Agency bonds	157,722	—	157,722	—
Corporate and other debt securities	394,011	—	394,011	—
U.S. government agency securities	50,089	—	50,089	—
Treasury bills	3,000	—	3,000	—
Marketable securities	616,714	—	616,714	—
Certificate of deposit included in prepaid expenses and other current assets	100	—	100	—
Certificates of deposit included in other assets, noncurrent	2,296	—	2,296	—
Convertible Note included in other assets, noncurrent	5,000	—	—	5,000
Total financial assets	\$ 844,849	\$ 220,739	\$ 619,110	\$ 5,000

	January 31, 2020			
	Fair Value	Level 1	Level 2	Level 3
(in thousands)				
Financial Assets:				
Money market funds	\$ 96,486	\$ 96,486	\$ —	\$ —
Commercial paper	4,994	—	4,994	—
Agency bonds	9,999	—	9,999	—
Cash equivalents	111,479	96,486	14,993	—
Commercial paper	37,894	—	37,894	—
Agency bonds	141,163	—	141,163	—
Corporate and other debt securities	321,166	—	321,166	—
U.S. government agency securities	71,837	—	71,837	—
Marketable securities	572,060	—	572,060	—
Certificate of deposit included in prepaid expenses and other current assets	100	—	100	—
Certificates of deposit included in other assets, noncurrent	2,301	—	2,301	—
Total financial assets	\$ 685,940	\$ 96,486	\$ 589,454	\$ —

We classify our highly liquid money market funds within Level 1 of the fair value hierarchy because they are valued based on quoted market prices in active markets. We classify our commercial paper, agency bonds, corporate bonds, corporate and other debt securities, U.S. government agency securities, treasury bills, and certificates of deposit within Level 2 because they are valued using inputs other than quoted prices that are directly or indirectly observable in the market, including readily available pricing sources for the identical underlying security which may not be actively traded. We classify the Convertible Note as Level 3 due to the lack of relevant observable market data over fair value inputs, such as the probability weighting of the various scenarios that can impact settlement of the arrangement.

As of April 30, 2020 and January 31, 2020, the carrying amount of the equity investment was \$13.5 million and \$3.0 million, respectively. We classify the equity investment as Level 3 within the fair value hierarchy only if an impairment or

observable adjustment is recognized during the period, as it is based on an observable transaction price at the transaction date and other unobservable inputs, such as volatility.

5. Balance Sheet Components

Prepaid Expenses and Other Current Assets

Prepaid expenses and other current assets consisted of the following:

	As of	
	April 30, 2020	January 31, 2020
	(in thousands)	
Restricted cash from international employee stock sales	\$ 267,091	\$ 48,547
Prepaid expenses	64,306	22,320
Other	4,627	4,141
Prepaid expenses and other current assets	<u>\$ 336,024</u>	<u>\$ 75,008</u>

Property and Equipment, Net

Property and equipment consisted of the following:

	As of	
	April 30, 2020	January 31, 2020
	(in thousands)	
Computer and office equipment	\$ 56,655	\$ 51,375
Leasehold improvements	18,134	18,215
Software	14,125	10,855
Furniture and fixtures	3,972	3,949
Property and equipment, gross	92,886	84,394
Less: accumulated depreciation and amortization	(32,407)	(27,256)
Property and equipment, net	<u>\$ 60,479</u>	<u>\$ 57,138</u>

Depreciation and amortization expense was \$5.3 million and \$3.3 million for the three months ended April 30, 2020 and 2019, respectively.

Other Assets, Noncurrent

Other assets, noncurrent consisted of the following:

	As of	
	April 30, 2020	January 31, 2020
	(in thousands)	
Equity investment	\$ 13,538	\$ 3,000
Accounts receivable, noncurrent	12,980	9,011
Convertible Note	5,000	—
Other	11,796	10,321
Other assets, noncurrent	<u>\$ 43,314</u>	<u>\$ 22,332</u>

Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities consisted of the following:

	As of	
	April 30, 2020	January 31, 2020
	(in thousands)	
Liabilities to employees and tax authorities from international employee stock sales	\$ 267,917	\$ 49,287
Accrued compensation and benefits	118,632	36,732
Accrued expenses	80,924	17,475
Sales and other tax liabilities	16,777	3,774
Operating lease liabilities, current	8,722	7,675
Other	14,038	7,749
Accrued expenses and other current liabilities	<u>\$ 507,010</u>	<u>\$ 122,692</u>

Other Liabilities, Noncurrent

Other liabilities, noncurrent consisted of the following:

	As of	
	April 30, 2020	January 31, 2020
	(in thousands)	
Sales and other tax liabilities	\$ 38,345	\$ 33,957
Other	2,420	2,329
Other liabilities, noncurrent	<u>\$ 40,765</u>	<u>\$ 36,286</u>

6. Commitments and Contingencies**Non-cancelable Purchase Obligations**

As of April 30, 2020, we had additional outstanding non-cancelable purchase obligations with a term of 12 months or longer of \$18.0 million, related to third-party cloud hosting to meet the significant increase in usage of our services.

Operating Leases Not Yet Commenced

As of April 30, 2020, we had additional operating leases for office space that have not yet commenced with undiscounted future lease payments of \$8.9 million. These operating leases will commence in the fourth quarter of fiscal year 2021.

License Agreement

In May 2020, we entered into a license agreement with MPEG LA, LLC ("MPEGLA") to obtain the rights for future use of licensed intellectual property in exchange for periodic royalty payments. In connection with the license agreement, we agreed to make a royalty payment of \$9.8 million to use the technology until December 31, 2020. In addition, we also agreed to make a one-time payment of \$9.8 million for past use, which was recorded in general and administrative expenses in our condensed consolidated statements of operations for the three months ended April 30, 2020.

Legal Proceedings

Beginning on March 30, 2020, multiple putative class actions were filed against us in various U.S. federal district courts and in one state court relating to our alleged privacy and security practices, including alleged data sharing with third parties (the "U.S. Privacy Class Actions"). The plaintiffs claim violations of a variety of state consumer protection and privacy laws, and also assert state constitutional and common law claims, such as negligence and unjust enrichment. They seek to certify both nationwide and state-specific classes of individuals using our services in certain time periods. The plaintiffs seek various forms of injunctive and monetary relief, including restitution, statutory and actual damages, and attorneys' fees. The federal cases have been transferred to the Northern District of California and have nearly completed the process of being related there for consolidated litigation, with our consent.

On April 7, 2020 and April 8, 2020, securities class action complaints were filed against us and two of our officers in the United States District Court for the Northern District of California. The plaintiffs are purported stockholders of the company.

The complaints allege, among other things, that we violated Sections 10(b) and 20(a) of the Securities Exchange Act of 1934, and Rule 10b-5 by making false and misleading statements and omissions of material fact about our data privacy and security measures. The complaints seek unspecified damages, interest, fees, and costs.

We believe these lawsuits are without merit, and we are vigorously defending ourselves against them. Given the uncertainty of litigation, the preliminary stage of the cases, and the legal standards that must be met for, among other things, class certification and success on the merits, we cannot estimate the reasonably possible loss or range of loss that may result from these actions.

7. Stockholders' Equity and Equity Incentive Plan

Common Stock

In connection with our initial public offering ("IPO") in April 2019, our amended and restated certificate of incorporation became effective, which authorized the issuance of 2,000,000,000 shares of Class A common stock, \$0.001 par value per share and 300,000,000 shares of Class B common stock, \$0.001 par value per share. Class A and Class B common stock are referred to as common stock throughout the notes to the condensed consolidated financial statements, unless otherwise noted.

Equity Incentive Plans

In 2011, we adopted the 2011 Global Share Plan ("2011 Plan"), under which officers, employees, and consultants may be granted various forms of equity incentive compensation at the discretion of the board of directors, including stock options and restricted stock awards. In connection with the IPO, the shares of Class B common stock remaining available for issuance under the 2011 Plan became available for issuance for a corresponding number of shares of our Class A common stock under the 2019 Equity Incentive Plan ("2019 Plan").

In April 2019, we adopted the 2019 Plan, which is a successor to and continuation of our 2011 Plan and which became effective in connection with our IPO. Our 2019 Plan provides for the grant of stock options, stock appreciation rights, restricted stock awards, restricted stock unit ("RSU") awards, performance awards, and other forms of awards. The maximum number of shares of our Class A common stock that may be issued under our 2019 Plan will not exceed 58,300,889 shares of our Class A common stock, which is the sum of (1) 34,000,000 new shares, plus (2) an additional number of shares not to exceed 24,300,889, consisting of (A) shares that remain available for the issuance of awards under our 2011 Plan as of immediately prior to the time our 2019 Plan became effective and (B) shares of Class B common stock subject to outstanding stock options or other stock awards granted under our 2011 Plan that, on or after the 2019 Plan becomes effective, terminate, or expire prior to exercise or settlement; are not issued because the award is settled in cash; are forfeited because of the failure to vest; or are reacquired or withheld (or not issued) to satisfy a tax withholding obligation or the purchase or exercise price, if any, as such shares become available from time to time. In addition, the number of shares of our Class A common stock reserved for issuance under our 2019 Plan will automatically increase on February 1 of each calendar year, starting on February 1, 2020 through February 1, 2029, in an amount equal to (i) 5% of the total number of shares of our common stock (both Class A and Class B) outstanding on January 31 of the fiscal year before the date of each automatic increase, or (ii) a lesser number of shares determined by our board of directors prior to the applicable February 1.

Stock Options

A summary of stock option activity under our equity incentive plan and related information is as follows:

	Stock Options			
	Outstanding Stock Options	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value
	(in thousands, except share, life, and per share data)			
Balance as of January 31, 2020	16,833,009	\$ 5.73	7.6	\$ 1,191,881
Granted	—	\$ —		
Exercised	(3,232,991)	\$ 2.97		
Canceled/forfeited/expired	(52,093)	\$ 4.63		
Balance as of April 30, 2020	13,547,925	\$ 6.39	7.6	\$ 1,744,720
Vested and exercisable as of April 30, 2020	5,449,596	\$ 2.70	7.0	\$ 721,922

As of April 30, 2020, unrecognized stock-based compensation expense related to outstanding unvested stock options was \$69.0 million, which is expected to be recognized over a weighted-average period of 2.6 years.

Restricted Stock Units

A summary of RSU activity under our equity incentive plan and related information is as follows:

	RSUs	
	Unvested RSUs	Weighted-Average Grant Date Fair Value Per Share
Unvested as of January 31, 2020	1,964,668	\$ 79.11
Granted	419,354	\$ 119.62
Vested	(37,518)	\$ 80.36
Canceled/forfeited	(33,653)	\$ 80.78
Unvested as of April 30, 2020	2,312,851	\$ 86.42

As of April 30, 2020, unrecognized stock-based compensation expense related to outstanding unvested RSUs was \$179.4 million, which is expected to be recognized over a weighted-average period of 3.5 years.

2019 Employee Stock Purchase Plan

In April 2019, we adopted the 2019 Employee Stock Purchase Plan (“ESPP”), which became effective in connection with the IPO. A total of 9,000,000 shares of our Class A common stock were initially reserved for issuance under the ESPP. The number of shares of our Class A common stock reserved for issuance will automatically increase on February 1 of each calendar year, beginning on February 1, 2020 through February 1, 2029, by the lesser of (1) 1% of the total number of shares of our common stock (both Class A and Class B) outstanding on the last day of the fiscal year before the date of the automatic increase and (2) 7,500,000 shares; provided that before the date of any such increase, our board of directors may determine that such increase will be less than the amount set forth in clauses (1) and (2).

Under our current ESPP, Class A common stock will be purchased for the accounts of employees participating in the ESPP at a price per share equal to the lesser of (1) 85% of the fair market value of a share of our Class A common stock on the first date of an offering or (2) 85% of the fair market value of a share of our Class A common stock on the date of purchase. No employee may purchase shares under the ESPP at a rate in excess of \$25,000 worth of our Class A common stock based on the fair market value per share of our Class A common stock at the beginning of an offering for each calendar year such purchase right is outstanding or 3,000 shares. The 2019 ESPP provides for, at maximum, 27 months offering periods with four offering dates, generally in June and December of each year. The first offering period began on April 18, 2019. As of April 30, 2020, 490,268 shares of our Class A common stock have been purchased under the ESPP.

As of April 30, 2020, unrecognized stock-based compensation expense related to the ESPP was \$48.2 million, which is expected to be recognized over a weighted-average period of 1.1 years.

Early Exercise of Common Stock Options

Our board of directors authorized certain stock option holders to exercise unvested options to purchase shares of common stock. Shares received from such early exercises are subject to repurchase in the event of the optionee's termination of service, at the original issuance price, until the options are fully vested. As of April 30, 2020 and January 31, 2020, 408,662 and 466,819 shares of Class B common stock, respectively, were subject to repurchase at a weighted-average price of \$2.60 and \$2.58 per share, respectively. The cash proceeds received for unvested shares of common stock recorded within accrued expenses and other current liabilities in the condensed consolidated balance sheets were \$1.1 million and \$1.2 million as of April 30, 2020 and January 31, 2020, respectively.

Shares Reserved for Charitable Donations

During fiscal year 2020, our board of directors approved the issuance of 500,000 shares of Class A common stock for the sole purpose of being transferred to a nonprofit organization to be formed or identified by us at a future time. As of April 30, 2020, 6,844 shares of Class A common stock have been transferred to a nonprofit organization. We recorded a non-cash charge of \$1.0 million for the fair value of the donated shares, which was recorded in general and administrative expense in the condensed consolidated statements of operations for the three months ended April 30, 2020.

Stock-Based Compensation

The stock-based compensation expense by line item in the accompanying condensed consolidated statements of operations is summarized as follows:

	Three Months Ended April 30,	
	2020	2019
	(in thousands)	
Cost of revenue	\$ 3,249	\$ 830
Research and development	5,224	1,164
Sales and marketing	17,123	2,627
General and administrative	3,181	2,041
Total stock-based compensation expense	<u>\$ 28,777</u>	<u>\$ 6,662</u>

8. Income Taxes

The following table provides details of the provision for income taxes:

	Three Months Ended April 30,	
	2020	2019
	(in thousands, except percentages)	
Net income before provision for income taxes	\$ 29,175	\$ 2,530
Provision for income taxes	2,100	316
Effective tax rate	7.2 %	12.5 %

The provision for income taxes was \$2.1 million and \$0.3 million for the three months ended April 30, 2020 and 2019, respectively. The provision for income taxes for the three months ended April 30, 2020 consisted primarily of foreign income taxes and state taxes. For the three months ended April 30, 2020 and 2019, the provision for income taxes differed from the U.S. federal statutory rate primarily due to stock-based compensation and the full valuation allowance on the U.S. and the U.K. deferred tax assets.

The realization of tax benefits of net deferred tax assets is dependent upon future levels of taxable income, of an appropriate character, in the periods the items are expected to be deductible or taxable. Based on the available objective evidence during the three months ended April 30, 2020, we believe it is more likely than not that the tax benefits of the U.S. and the U.K. losses incurred may not be realized. Accordingly, we recorded a full valuation allowance against the tax benefits of the U.S. and the U.K. losses incurred. We intend to maintain the full valuation allowance on the U.S. and the U.K. net deferred tax assets until sufficient positive evidence exists to support a reversal of, or decrease in, the valuation allowance.

During the three months ended April 30, 2020, there were no material changes to the total amount of unrecognized tax benefits.

9. Net Income Per Share Attributable to Common Stockholders

The following table sets forth the computation of basic and diluted net income per share attributable to common stockholders for the periods presented:

	Three Months Ended April 30,			
	2020		2019	
	Class A	Class B	Class A	Class B
(in thousands, except share and per share data)				
Numerator:				
Net income	\$ 14,007	\$ 13,068	\$ 15	\$ 2,199
Less: undistributed earnings attributable to participating securities	—	(39)	—	(2,016)
Net income attributable to common stockholders, basic	\$ 14,007	\$ 13,029	\$ 15	\$ 183
Reallocation of net income attributable to common stockholders	(591)	591	(3)	3
Net income attributable to common stockholders, diluted	\$ 13,416	\$ 13,620	\$ 12	\$ 186
Denominator:				
Weighted-average shares used in computing net income per share attributable to common stockholders, basic	145,004,142	134,886,969	8,393,169	101,315,729
Weighted-average shares used in computing net income per share attributable to common stockholders, diluted	146,472,265	148,712,693	8,393,391	128,034,988
Net income per share attributable to common stockholders, basic	\$ 0.10	\$ 0.10	\$ 0.00	\$ 0.00
Net income per share attributable to common stockholders, diluted	\$ 0.09	\$ 0.09	\$ 0.00	\$ 0.00

The potential shares of common stock that were excluded from the computation of diluted net income per share attributable to common stockholders for the periods presented because including them would have been anti-dilutive are as follows:

	Three Months Ended April 30,			
	2020		2019	
	Class A	Class B	Class A	Class B
Outstanding stock options	205,776	—	161,650	19,663
Unvested RSUs	41,999	—	—	—
Total	247,775	—	161,650	19,663

The table above does not include 493,156 shares of issued Class A common stock held by us as of April 30, 2020 and reserved for the sole purpose of being transferred to a nonprofit organization to be formed or identified by us at a future time.

10. Subsequent Events

On May 7, 2020, we announced the acquisition of Keybase, a secure messaging and file-sharing company. The acquisition helps us strengthen the security of our video communications platform by providing end-to-end encryption expertise that we can leverage as we develop and roll out an end-to-end encryption offering. The total purchase consideration will be paid in cash from our existing balances of cash and cash equivalents.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis of our financial condition and results of operations together with the unaudited condensed consolidated financial statements and related notes included elsewhere in this Quarterly Report on Form 10-Q. This discussion contains forward-looking statements based upon current expectations that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of various factors, including those discussed in the section titled "Risk Factors" and in other parts of this Quarterly Report on Form 10-Q.

Overview

Our mission is to make video communications frictionless.

We provide a video-first communications platform that delivers happiness and fundamentally changes how people interact. We connect people through frictionless and secure video, voice, chat, and content sharing and enable face-to-face video experiences for thousands of people in a single meeting across disparate devices and locations. Our cloud-native platform delivers reliable, high-quality video that is easy to use, manage, and deploy, provides an attractive return on investment, is scalable, and easily integrates with physical spaces and applications. We believe that rich and reliable communications lead to interactions that build greater empathy and trust. We strive to live up to the trust our customers place in us by delivering a communications solution that “just works.” Our goal is to make Zoom Meetings better than in-person meetings. Our 17 co-located data centers located worldwide enable us to provide both high-quality and high-definition, real-time video to our customers even in low-bandwidth environments.

We generate revenue from the sale of subscriptions to our video-first communications platform. Subscription revenue is driven primarily by the number of paid hosts as well as purchases of additional products, including Zoom Rooms, Zoom Video Webinars, and Zoom Phone. A host is any user of our video-first communications platform who initiates a Zoom Meeting and invites one or more participants to join that meeting. We refer to hosts who subscribe to a paid Zoom Meeting plan as “paid hosts.” We define a customer as a separate and distinct buying entity, which can be a single paid host or an organization of any size (including a distinct unit of an organization) that has multiple paid hosts. Our Basic offering is free and gives hosts access to Zoom Meetings with core features but with limitations on the number of attendees and time. Our paid offerings include our Pro, Business, and Enterprise plans, which provide incremental features and functionality, such as different participant limits, administrative controls, and reporting.

Our revenue was \$328.2 million and \$122.0 million for the three months ended April 30, 2020 and 2019, respectively, representing period-over-period growth rate of 169%. We had net income of \$27.1 million and \$2.2 million for the three months ended April 30, 2020 and 2019, respectively. Net cash provided by operating activities was \$259.0 million and \$22.2 million for the three months ended April 30, 2020 and 2019, respectively.

Recent Developments

COVID-19

In December 2019, an outbreak of the COVID-19 disease was first identified and began to spread across the globe. In March 2020, the World Health Organization declared COVID-19 a pandemic, impacting many countries around the world. Governments have instituted lockdown or other similar measures to slow infection rates. Many organizations have resorted to mandating employees to work from home, which has resulted in these organizations seeking out video communication solutions like ours to keep employees as productive as possible, even while working from home. Schools, colleges, and universities globally have also closed as a result of this pandemic. Many of these institutions are utilizing our platform to provide remote instruction to their students. We have temporarily removed the 40-minute time limit for meetings with more than two participants from our free Basic accounts for K-12 schools in certain countries.

All of these factors have driven increased usage of our services and have required us to expand our network and data storage and processing capacity, in both our own co-located data centers as well as through third-party cloud hosting, which is resulting in an increase in our operating costs. Furthermore, a significant portion of the increase in usage of our platform is attributable to free Basic accounts, which do not generate any revenue and require us to incur these additional operating costs to expand our capacity. Therefore, the recent increase in usage of our platform has adversely impacted, and may continue to adversely impact, our gross margin.

In addition, there is no assurance that we will experience an increase in paying customers or that new or existing users will continue to utilize our service after the COVID-19 pandemic has tapered. We may see a decline in paying customers and new users when shelter-in-place measures are released, and individuals are no longer working or attending school from home.

Acquisition of Keybase

In May 2020, we announced the acquisition of Keybase, a secure messaging and file-sharing company. This acquisition helps us strengthen the security of our video communications platform by providing end-to-end encryption expertise that we can leverage as we develop and roll out an end-to-end encryption offering.

Key Factors Affecting Our Performance

Acquiring New Customers

We are focused on continuing to grow the number of customers that use our platform. Our operating results and growth prospects will depend, in part, on our ability to attract new customers. While we believe we have a significant market opportunity that our platform addresses, it is difficult to predict customer adoption rates or the future growth rate and size of the

market for our platform. We will need to continue to invest in sales and marketing in order to address this opportunity by hiring, developing, and retaining talented sales personnel who are able to achieve desired productivity levels in a reasonable period of time.

Expansion of Zoom Across Existing Customers

We believe that there is a large opportunity for growth with many of our existing customers. Many customers have increased the size of their subscriptions as they have expanded their use of our platform across their operations. Some of our larger enterprise customers start with a single deployment of Zoom Meetings with one team, location, or geography, before rolling out our platform throughout their organization. Several of our largest customers have deployed our platform globally to their entire workforce following smaller initial deployments. This expansion in the use of our platform also provides us with opportunities to market and sell additional products to our customers, such as Zoom Phone, Zoom Rooms at each office location, and Zoom Video Webinars. In order for us to address this opportunity to expand the use of our products with our existing customers, we will need to maintain the reliability of our platform and produce new features and functionality that are responsive to our customers' requirements for enterprise-grade solutions.

We quantify our expansion across existing customers through our net dollar expansion rate. Our net dollar expansion rate includes the increase in user adoption within our customers, as our subscription revenue is primarily driven by the number of paid hosts within a customer and the purchase of additional products, and compares our subscription revenue from the same set of customers across comparable periods. We calculate net dollar expansion rate as of a period end by starting with the annual recurring revenue ("ARR") from all customers with more than 10 employees as of 12 months prior ("Prior Period ARR"). We define ARR as the annualized revenue run rate of subscription agreements from all customers at a point in time. We calculate ARR by taking the monthly recurring revenue ("MRR") and multiplying it by 12. MRR is defined as the recurring revenue run-rate of subscription agreements from all customers for the last month of the period, including revenue from monthly subscribers who have not provided any indication that they intend to cancel their subscriptions. We then calculate the ARR from these customers as of the current period end ("Current Period ARR"), which includes any upsells, contraction, and attrition. We divide the Current Period ARR by the Prior Period ARR to arrive at the net dollar expansion rate. For the trailing 12-months calculation, we take an average of the net dollar expansion rate over the trailing 12 months. Our net dollar expansion rate may fluctuate as a result of a number of factors, including the level of penetration within our customer base, expansion of products and features, and our ability to retain our customers. Our trailing 12-month net dollar expansion rate in customers with more than 10 employees was greater than 130% as of April 30, 2020 and 2019.

Innovation and Expansion of Our Platform

We continue to invest resources to enhance the capabilities of our platform. For example, we have recently introduced a number of product enhancements, including new features for Zoom Phone, Zoom Meetings, and Zoom Video Webinars. Third-party developers are also a key component of our strategy for platform innovation, to make it easier for customers and developers to extend our product portfolio with new functionalities. We believe that as more developers and other third parties use our platform to integrate major third-party applications, we will become the ubiquitous platform for communications. We will need to expend additional resources to continue introducing new products, features, and functionality, and supporting the efforts of third parties to enhance the value of our platform with their own applications.

International Expansion

Our platform addresses the communications needs of users worldwide, and we see international expansion as a major opportunity. Our revenue from the rest of world (APAC and EMEA) represented 25% and 20% of our total revenue for the three months ended April 30, 2020 and 2019, respectively. We plan to add local sales support in further select international markets over time. We use strategic partners and resellers to sell in certain international markets where we have limited or no sales presence. While we believe global demand for our platform will continue to increase as international market awareness of Zoom grows, our ability to conduct our operations internationally will require considerable management attention and resources, and is subject to the particular challenges of supporting a rapidly growing business in an environment of multiple languages, cultures, customs, legal and regulatory systems, alternative dispute systems, and commercial markets.

Key Business Metrics

We review the following key business metrics to measure our performance, identify trends, formulate financial projections, and make strategic decisions.

Customers with More Than 10 Employees

Increasing awareness of our platform and its broad range of capabilities has enabled us to substantially expand our customer base, which includes organizations of all sizes across industries. We define a customer as a separate and distinct

buying entity, which can be a single paid host or an organization of any size (including a distinct unit of an organization) that has multiple paid hosts. To better distinguish business customers from our broader customer base, we review the number of customers with more than 10 employees. As of April 30, 2020 and 2019, we had approximately 265,400 and 58,500 customers with more than 10 employees, respectively. When disclosing the number of customers, we round down to the nearest hundred.

Customers Contributing More Than \$100,000 of Trailing 12 Months Revenue

We focus on growing the number of customers that contribute more than \$100,000 of trailing 12 months revenue as a measure of our ability to scale with our customers and attract larger organizations to Zoom. Revenue from these customers represented 23% and 29% of revenue for the three months ended April 30, 2020 and 2019, respectively. As of April 30, 2020 and 2019, we had 769 and 405 customers, respectively, that contributed more than \$100,000 of trailing 12 months revenue, demonstrating our rapid penetration of larger organizations, including enterprises. These customers are a subset of the customers with more than 10 employees.

Non-GAAP Financial Measure

In addition to our results determined in accordance with GAAP, we believe that free cash flow ("FCF"), a non-GAAP financial measure, is useful in evaluating our liquidity.

Free Cash Flow

We define FCF as GAAP net cash provided by operating activities less purchases of property and equipment. We believe that FCF is a useful indicator of liquidity that provides information to management and investors about the amount of cash generated from our operations that, after investments in property and equipment, can be used for future growth. FCF is presented for supplemental informational purposes only, has limitations as an analytical tool, and should not be considered in isolation or as a substitute for analysis of other GAAP financial measures, such as net cash provided by operating activities. It is important to note that other companies, including companies in our industry, may not use this metric, may calculate this metric differently, or may use other financial measures to evaluate their liquidity, all of which could reduce the usefulness of this non-GAAP metric as a comparative measure.

The following table presents a summary of our cash flows for the periods presented and a reconciliation of FCF to net cash used in operating activities, the most directly comparable financial measure calculated in accordance with GAAP:

	Three Months Ended April 30,	
	2020	2019
	(in thousands)	
Net cash provided by operating activities	\$ 258,965	\$ 22,236
Less: purchases of property and equipment	(7,272)	(6,897)
Free cash flow (non-GAAP)	<u>\$ 251,693</u>	<u>\$ 15,339</u>
Net cash used in investing activities	\$ (63,034)	\$ (1,319)
Net cash provided by financing activities	<u>\$ 228,126</u>	<u>\$ 545,252</u>

Components of Results of Operations

Revenue

We derive our revenue from subscription agreements with customers for access to our video-first communications platform. Our customers do not have the ability to take possession of our software. We also provide services, which include professional services, consulting services, and online event hosting, which are generally considered distinct from the access to our video-first communications platform.

Cost of Revenue

Cost of revenue primarily consists of costs related to hosting our video-first communications platform and providing general operating support services to our customers. These costs are related to our co-located data centers, third-party cloud hosting, integrated third-party public switched telephone network ("PSTN") services, personnel-related expenses, amortization of capitalized software development, and allocated overhead. We expect our cost of revenue to increase for the foreseeable future in absolute dollars as we expand our data center capacity and third-party cloud hosting due to increased usage stemming from the COVID-19 pandemic. However, the cost of revenue as a percentage of revenue may decrease over time as we scale our data centers to accommodate usage from our increased customer base.

Operating Expenses

Research and Development

Research and development expenses primarily consist of personnel-related expenses directly associated with our research and development organization, depreciation of equipment used in research and development, and allocated overhead. Research and development costs are expensed as incurred. We plan to increase our investment in research and development for the foreseeable future as we focus on further developing our platform, enhancing its use cases, and strengthening security and privacy. As a result, we expect our research and development expenses to increase both in absolute dollars and as a percentage of revenue for the rest of the current fiscal year.

Sales and Marketing

Sales and marketing expenses primarily consist of personnel-related expenses directly associated with our sales and marketing organization. Other sales and marketing expenses include advertising and promotional events to promote our brand, such as awareness programs, digital programs, public relations, tradeshows, and our user conference, Zoomtopia, and allocated overhead. Sales and marketing expenses also include amortization of deferred contract acquisition costs. We plan to increase our investment in sales and marketing over the foreseeable future, primarily from increased headcount in our sales force and investment in brand and product marketing efforts. As a result, we expect our sales and marketing expenses to increase in absolute dollars for the rest of the current fiscal year, although these expenses may fluctuate as a percentage of revenue from quarter to quarter depending on the timing of various events.

General and Administrative

General and administrative expenses primarily consist of personnel-related expenses associated with our finance, legal, and human resources organizations; professional fees for external legal, accounting, and other consulting services; expected credit losses; insurance; sales and other taxes; and allocated overhead. We expect to increase the size of our general and administrative function to support the growth and complexity of our business. As a result, we expect our general and administrative expenses to increase in absolute dollars for the rest of the current fiscal year. We expect, however, that our general and administrative expenses as a percentage of revenue will decrease in the near future, and slightly increase for the remainder of the current fiscal year.

Interest Income and Other, Net

Interest income and other, net consists primarily of interest income and net accretion earned on our marketable securities as well as remeasurement gains or losses on our equity investment.

Provision for Income Taxes

Provision for income taxes consists primarily of income taxes related to foreign and state jurisdictions where we conduct business.

Results of Operations

The following tables set forth selected condensed consolidated statements of operations data and such data as a percentage of revenue for each of the periods indicated:

	Three Months Ended April 30,	
	2020	2019
	(in thousands)	
Revenue	\$ 328,167	\$ 121,988
Cost of revenue ⁽¹⁾	103,707	24,104
Gross profit	224,460	97,884
Operating expenses:		
Research and development ⁽¹⁾	26,389	13,783
Sales and marketing ⁽¹⁾	121,556	64,041
General and administrative ⁽¹⁾	53,130	18,503
Total operating expenses	201,075	96,327
Income from operations	23,385	1,557
Interest income and other, net	5,790	973
Net income before provision for income taxes	29,175	2,530
Provision for income taxes	2,100	316
Net income	\$ 27,075	\$ 2,214

⁽¹⁾ Includes stock-based compensation expense as follows:

Cost of revenue	\$ 3,249	\$ 830
Research and development	5,224	1,164
Sales and marketing	17,123	2,627
General and administrative	3,181	2,041
Total stock-based compensation expense	\$ 28,777	\$ 6,662

	Three Months Ended April 30,	
	2020	2019
	(as a percentage of revenue)	
Revenue	100 %	100 %
Cost of revenue	32	20
Gross profit	68	80
Operating expenses:		
Research and development	8	11
Sales and marketing	37	53
General and administrative	16	15
Total operating expenses	61	79
Income from operations	7	1
Interest income and other, net	2	1
Net income before provision for income taxes	9	2
Provision for income taxes	1	0
Net income	8 %	2 %

Comparison of the Three Months Ended April 30, 2020 and 2019**Revenue**

	Three Months Ended April 30,		
	2020	2019	% Change
	(in thousands)		
Revenue	\$ 328,167	\$ 121,988	169 %

Revenue for the three months ended April 30, 2020 increased by \$206.2 million, or 169%, compared to the three months ended April 30, 2019. Due to the COVID-19 pandemic, there was an increase in usage of our services as many organizations and healthcare and educational institutions around the world started utilizing our platform to continue their operations. As a result, the increase in revenue was primarily due to subscription services provided to new customers, which accounted for approximately 71% of the increase, and to subscription services provided to existing customers, which accounted for approximately 29% of the increase.

Cost of Revenue

	Three Months Ended April 30,		
	2020	2019	% Change
	(in thousands)		
Cost of revenue	\$ 103,707	\$ 24,104	330 %
Gross profit	224,460	97,884	129 %
Gross margin	68 %	80 %	

Cost of revenue for the three months ended April 30, 2020 increased by \$79.6 million, or 330%, compared to the three months ended April 30, 2019. In response to the COVID-19 pandemic we have temporarily removed the 40-minute time limit for meetings with more than two participants from our free Basic accounts for K-12 schools in certain countries. We also experienced a significant increase in usage from paid users as more companies started utilizing our platform to allow their employees to work remotely. This increase in usage resulted in an increase of \$70.8 million in costs related to third-party cloud hosting, integrated third-party PSTN services and our co-located data centers to support the increase in customers and expanded use of our video-first communications platform by existing customers. The remaining increase was primarily due to an increase of \$7.0 million in personnel-related expenses mainly driven by increased headcount, which includes a \$2.4 million increase in stock-based compensation expense.

Gross margin decreased to 68% for the three months ended April 30, 2020 from 80% for the three months ended April 30, 2019. The decrease in gross margin was due to higher incremental cost from leveraging third-party cloud hosting providers to meet the significant increase in usage as well as the higher percentage of usage from free users.

Operating Expenses**Research and Development**

	Three Months Ended April 30,		
	2020	2019	% Change
	(in thousands)		
Research and development	\$ 26,389	\$ 13,783	91 %

Research and development expense for the three months ended April 30, 2020 increased by \$12.6 million, or 91%, compared to the three months ended April 30, 2019. The increase was primarily due to higher personnel-related expenses of \$10.4 million mainly driven by additional headcount, which includes a \$4.1 million increase in stock-based compensation expense.

Sales and Marketing

	Three Months Ended April 30,		
	2020	2019	% Change
	(in thousands)		
Sales and marketing	\$ 121,556	\$ 64,041	90 %

Sales and marketing expense for the three months ended April 30, 2020 increased by \$57.5 million, or 90%, compared to the three months ended April 30, 2019. The increase in sales and marketing expense was primarily due to higher personnel-related expenses of \$38.1 million mainly driven by additional headcount in our sales force to support the increased demand, which includes a \$14.5 million increase in stock-based compensation expense and a \$3.8 million increase in amortization of deferred contract acquisition costs driven by our increase in revenue. The remaining increase was primarily due to an increase in credit card processing fees of \$11.7 million as a result of increased online payments, an increase of \$3.5 million in professional services primarily to support the surge in sales, and an increase in allocated overhead of \$2.2 million.

General and Administrative

	Three Months Ended April 30,		
	2020	2019	% Change
	(in thousands)		
General and administrative	\$ 53,130	\$ 18,503	187 %

General and administrative expense for the three months ended April 30, 2020 increased by \$34.6 million, or 187%, compared to the three months ended April 30, 2019. The increase in general and administrative expense was primarily due to a one-time payment to MPEGLA of \$9.8 million, higher personnel-related expenses of \$6.4 million mainly driven by additional headcount, which includes a \$1.1 million increase in stock-based compensation expense, an increase of \$4.3 million related to a contingent liability for sales and other indirect tax, an increase of \$4.1 million in professional services composed primarily of legal and other consulting fees, an increase of \$2.4 million related to charitable donations mainly related to COVID-19, an increase of \$2.3 million related to insurance expenses, an increase of \$1.9 million in expenses due to fluctuation in exchange rates, and an increase of \$1.8 million in expensed equipment and software.

Interest Income and Other, Net

	Three Months Ended April 30,		
	2020	2019	% Change
	(in thousands)		
Interest income and other, net	\$ 5,790	\$ 973	495 %

Interest income and other, net for the three months ended April 30, 2020 increased by \$4.8 million, or 495%, compared to the three months ended April 30, 2019. The increase was primarily due to a gain of \$2.5 million related to the remeasurement of our equity investment and an additional \$2.4 million in interest income earned from our investments in marketable securities.

Provision for Income Taxes

	Three Months Ended April 30,		
	2020	2019	% Change
	(in thousands)		
Provision for income taxes	\$ 2,100	\$ 316	565 %

Provision for income taxes for the three months ended April 30, 2020 increased by \$1.8 million, or 565%, compared to the three months ended April 30, 2019. The change in provision for income taxes was primarily due to increases in income attributable to foreign operations.

Liquidity and Capital Resources

As of April 30, 2020, our principal sources of liquidity were cash, cash equivalents, and marketable securities of \$1.1 billion, which were held for working capital purposes. Our marketable securities generally consist of high-grade commercial paper, corporate bonds, agency bonds, corporate and other debt securities, U.S. government agency securities, and treasury bills.

We have financed our operations primarily through customer payments and sales of equity securities. Cash from operations could also be affected by various risks and uncertainties, including, but not limited to, the effects of the COVID-19 pandemic, including timing of cash collections from our customers and other risks detailed in the section titled "Risk Factors." However, based on our current business plan and revenue prospects, we believe our existing cash, cash equivalents, and marketable securities, together with net cash provided by operations, will be sufficient to meet our needs for at least the next 12 months, including the payment of the total purchase consideration for the acquisition of Keybase from existing cash and cash equivalents balances. Our future capital requirements will depend on many factors, including our revenue growth rate, subscription renewal activity, billing frequency, the timing and extent of spending to support further sales and marketing and research and development efforts, as well as expenses associated with our international expansion, and the timing and extent of additional capital expenditures to invest in existing and new office spaces. We may, in the future, enter into arrangements to acquire or invest in complementary businesses, services, and technologies, including intellectual property rights. We may be required to seek additional equity or debt financing. In the event that additional financing is required from outside sources, we may not be able to raise it on terms acceptable to us or at all. If we are unable to raise additional capital when desired, our business, results of operations, and financial condition would be materially and adversely affected.

Cash Flows

The following table summarizes our cash flows for the periods presented:

	Three Months Ended April 30,	
	2020	2019
	(in thousands)	
Net cash provided by operating activities	\$ 258,965	\$ 22,236
Net cash used in investing activities	\$ (63,034)	\$ (1,319)
Net cash provided by financing activities	\$ 228,126	\$ 545,252

Operating Activities

Our largest source of operating cash is cash collections from our customers for subscriptions to our platform. Our primary uses of cash from operating activities are for employee-related expenditures, costs related to hosting our platform, and marketing expenses. Net cash provided by operating activities is impacted by our net income adjusted for certain non-cash items, such as stock-based compensation, depreciation and amortization expenses, as well as the effect of changes in operating assets and liabilities.

Net cash provided by operating activities was \$259.0 million for the three months ended April 30, 2020, compared to \$22.2 million for the three months ended April 30, 2019. The increase in operating cash flow was due to the positive impact from changes in operating assets and liabilities of \$175.8 million, an increase in net income of \$24.9 million, and an increase in non-cash adjustments of \$36.1 million.

Investing Activities

Net cash used in investing activities of \$63.0 million for the three months ended April 30, 2020 was primarily due to net purchases of marketable securities of \$43.9 million, purchase of an equity investment of \$8.0 million, purchases of property and equipment of \$7.3 million, and purchase of a convertible note of \$5.0 million.

Net cash used in investing activities of \$1.3 million for the three months ended April 30, 2019 was primarily due to purchases of property and equipment of \$6.9 million, partially offset by maturities of marketable securities, net of purchases, of \$5.6 million.

Financing Activities

Net cash provided by financing activities of \$228.1 million for the three months ended April 30, 2020 was primarily due to proceeds from international employee stock sales to be remitted to employees and tax authorities, net, of \$218.5 million and proceeds from the exercise of stock options of \$9.6 million.

Net cash provided by financing activities of \$545.3 million for the three months ended April 30, 2019 was primarily due to proceeds from the issuance of Class A common stock in connection with the IPO, net of underwriting discounts and commissions and other offering costs, of \$543.5 million, and the exercise of stock options, net of repurchases, of \$1.8 million.

Commitments and Contractual Obligations

As of April 30, 2020, we had additional outstanding non-cancelable purchase obligations with a term of 12 months or longer of \$18.0 million, related to third-party cloud hosting to meet the significant increase in usage of our services. As of April 30, 2020, we also had additional operating leases for office space that have not yet commenced with undiscounted future lease payments of \$8.9 million.

Additionally, we entered into a license agreement with MPEGLA in May 2020 to obtain the rights for future use of licensed intellectual property in exchange for periodic royalty payments. In connection with the license agreement, we agreed to make a royalty payment of \$9.8 million to use the technology until December 31, 2020. In addition, we also agreed to make a one-time payment of \$9.8 million for past use, which was recorded in general and administrative expenses in our condensed consolidated statements of operations for the three months ended April 30, 2020.

There have been no other material changes to our contractual obligations and commitments from those disclosed in our Management's Discussion and Analysis of Financial Condition and Results of Operations, included in our Annual Report on Form 10-K for the year ended January 31, 2020, filed with the SEC on March 20, 2020.

Off-Balance Sheet Arrangements

Through April 30, 2020, we did not have any relationships with unconsolidated organizations or financial partnerships, such as structured finance or special-purpose entities that would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Critical Accounting Policies and Estimates

Critical accounting policies and estimates are those accounting policies and estimates that are both the most important to the portrayal of our net assets and results of operations and require the most difficult, subjective, or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. These estimates are developed based on historical experience and various other assumptions that we believe to be reasonable under the circumstances. Critical accounting estimates are accounting estimates where the nature of the estimates are material due to the levels of subjectivity and judgment necessary to account for highly uncertain matters or the susceptibility of such matters to change, and the impact of the estimates on financial condition or operating performance is material.

There have been no material changes to our critical accounting policies and estimates as compared to the critical accounting policies and estimates described in our Management's Discussion and Analysis of Financial Condition and Results of Operations, included in our Annual Report on Form 10-K for the year ended January 31, 2020, filed with the SEC on March 20, 2020, except for the allowance for credit losses policy and the investment policy related to the adoption of ASU No. 2016-13 as described in Note 1 to the condensed consolidated financial statements.

Recent Accounting Pronouncements

See "Summary of Business and Significant Accounting Policies" in Note 1 of the notes to our condensed consolidated financial statements included in Part I, Item 1 of this Form 10-Q.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Currency and Exchange Risk

The vast majority of our cash generated from revenue is denominated in U.S. dollars, with a small amount denominated in foreign currencies. Our expenses are generally denominated in the currencies of the jurisdictions in which we conduct our operations, which are primarily in the United States, China, Europe, and Australia. Our results of current and future operations and cash flows are, therefore, subject to fluctuations due to changes in foreign currency exchange rates. The effect of a hypothetical 10% change in foreign currency exchange rates applicable to our business would not have had a material impact on our historical condensed consolidated financial statements for the three months ended April 30, 2020 and 2019. As the impact of foreign currency exchange rates has not been material to our historical operating results, we have not entered into derivative or hedging transactions, but we may do so in the future if our exposure to foreign currency becomes more significant.

Interest Rate Risk

We had cash and cash equivalents of \$488.7 million and marketable securities of \$616.7 million as of April 30, 2020. Cash and cash equivalents consist of bank deposits, money market funds, high-grade commercial paper, and agency bonds. Our marketable securities generally consist of high-grade commercial paper, agency bonds, corporate and other debt securities, and U.S. government agency securities. The cash and cash equivalents and marketable securities are held for working capital.

purposes. Such interest-earning instruments carry a degree of interest rate risk. The primary objective of our investment activities is to preserve principal while maximizing income without significantly increasing risk. We do not enter into investments for trading or speculative purposes and have not used any derivative financial instruments to manage our interest rate risk exposure. Due to the short-term nature of our investments, we have not been exposed to, nor do we anticipate being exposed to, material risks due to changes in interest rates. A hypothetical 10% change in interest rates during any of the periods presented would not have had a material impact on our historical condensed consolidated financial statements for the three months ended April 30, 2020 and 2019.

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our principal executive officer and our principal financial officer, has evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported, within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company’s management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate, to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives, and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on such evaluation, our principal executive officer and principal financial officer have concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

There has been no change in our internal control over financial reporting identified in connection with the evaluation required by Rules 13a-15(d) and 15d-15(d) of the Exchange Act that occurred during the period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II—Other Information

Item 1. LEGAL PROCEEDINGS

Beginning on March 30, 2020, multiple putative class actions were filed against us in various U.S. federal district courts and in one state court relating to our alleged privacy and security practices, including alleged data sharing with third parties (the “U.S. Privacy Class Actions”). The plaintiffs claim violations of a variety of state consumer protection and privacy laws, and also assert state constitutional and common law claims such as negligence and unjust enrichment. They seek to certify both nationwide and state-specific classes of individuals using our services in certain time periods. The plaintiffs seek various forms of injunctive and monetary relief, including restitution, statutory and actual damages, and attorneys’ fees. The federal cases have been transferred to the Northern District of California, and have nearly completed the process of being related there for consolidated litigation, with our consent.

On April 7, 2020, and April 8, 2020, securities class action complaints were filed against us and two of our officers in the United States District Court for the Northern District of California. The plaintiffs are purported stockholders of the company. The complaints allege, among other things, that we violated Sections 10(b) and 20(a) of the Securities Exchange Act of 1934, and Rule 10b-5 by making false and misleading statements and omissions of material fact about our data privacy and security measures. The complaints seek unspecified damages, interest, fees, and costs.

We believe these lawsuits are without merit, and we are vigorously defending ourselves against them. Given the uncertainty of litigation, the preliminary stage of the cases, and the legal standards that must be met for, among other things, class certification and success on the merits, we cannot estimate the reasonably possible loss or range of loss that may result from these actions.

From time to time, we are involved in various other legal proceedings arising from the normal course of business activities. We are not presently a party to any litigation the outcome of which, we believe, if determined adversely to us, would individually, or taken together, have a material adverse effect on our business, operating results, cash flows, or financial condition. Defending such proceedings is costly and can impose a significant burden on management and employees. We may receive unfavorable preliminary or interim rulings in the course of litigation, and there can be no assurances that favorable final outcomes will be obtained.

Item 1A. RISK FACTORS

Investing in our securities involves a high degree of risk. You should carefully consider the risks and uncertainties described below, together with all of the other information in this Quarterly Report on Form 10-Q, including the section titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and our condensed consolidated financial statements and related notes, before making a decision to invest in our securities. The risks and uncertainties described below may not be the only ones we face. If any of the risks actually occur, our business could be materially and adversely affected. In that event, the market price of our Class A common stock could decline, and you could lose part or all of your investment.

Risks Related to Our Business and Our Industry

Our business depends on our ability to attract new customers and hosts, retain and upsell additional products to existing customers, and upgrade free hosts to our paid offerings. Any decline in new customers and hosts, renewals, or upgrades would harm our business.

Our business depends upon our ability to attract new customers and hosts, and maintain and expand our relationships with our customers and hosts, including upselling additional products to our existing customers and upgrading hosts to a paid Zoom Meeting plan. A host is any user of our video-first communications platform who initiates a Zoom Meeting and invites one or more participants to join that meeting. We refer to hosts who subscribe to a paid Zoom Meeting plan as “paid hosts.”

Our business is subscription based, and customers are not obligated to, and may not, renew their subscriptions after their existing subscriptions expire. As a result, we cannot provide assurance that customers will renew their subscriptions utilizing the same tier of their Zoom Meeting plan, upgrade to a higher-priced tier, or purchase additional products, if they renew at all. Renewals of subscriptions to our platform may decline or fluctuate because of several factors, such as dissatisfaction with our products and support, a customer or host no longer having a need for our products, including any new customers or hosts that have subscribed to our services during the COVID-19 pandemic that may subsequently reduce or discontinue their use after the impact of the pandemic has tapered, or the perception that competitive products provide better, more secure, or less expensive options. In addition, some customers downgrade their Zoom Meeting plan or do not renew their subscriptions. Furthermore, as a result of the increased usage of our platform during the COVID-19 pandemic, our customer base has shifted from largely

businesses and enterprises to a mix of businesses, enterprises, and consumers. This shift in mix could result in higher non-renewal rates than we have experienced in the past. We must continually add new customers and hosts to grow our business beyond our current user base and to replace customers and hosts who choose not to continue to use our platform. Finally, any decrease in user satisfaction with our products or support would harm our brand, word-of-mouth referrals, and ability to grow.

We encourage customers to purchase additional products and encourage hosts to upgrade to our paid offerings by recommending additional features and through in-product prompts and notifications. Additionally, we seek to expand within organizations by adding new hosts, having workplaces purchase additional products, or expanding the use of Zoom into other teams and departments within an organization. At the same time, we strive to demonstrate the value of our platform and various product offerings to those hosts that subscribe to our free Zoom Meeting plan, thereby encouraging them to upgrade to a paid Zoom Meeting plan. However, a majority of these hosts, including those that recently subscribed to our free plan during the COVID-19 pandemic as a result of shelter-in-place and work-from-home mandates, may never upgrade to a paid Zoom Meeting plan. If we fail to upsell our customers or upgrade hosts of our free Zoom Meeting plan to a paid subscription or expand the number of paid hosts within organizations, our business would be harmed.

In addition, our user growth rate may slow or decline in the future as our market penetration rates increase and we turn our focus to upgrading our free hosts to a paid Zoom Meeting plan rather than growing the total number of users. If we are not able to continue to expand our user base, our revenue may grow more slowly than expected or decline. Similar to the uncertainty of customers renewing their subscriptions or hosts upgrading to a paid Zoom Meeting plan, we expect our user growth rate to slow or decline once the impact of the COVID-19 pandemic tapers and users return to work or school or are otherwise no longer subject to shelter-in-place mandates.

We have a limited operating history, which makes it difficult to evaluate our prospects and future results of operations.

We were incorporated in 2011. As a result of our limited operating history, our ability to forecast our future results of operations is limited and subject to a number of uncertainties, including our ability to plan for and model future growth and expenses. Our historical revenue growth should not be considered indicative of our future performance. Further, in future periods, our revenue growth could slow or our revenue could decline for a number of reasons, including any reduction in demand for our platform; increased competition; contraction of our overall market; our inability to accurately forecast demand for our platform and plan for capacity constraints; or our failure, for any reason, to capitalize on growth opportunities. The COVID-19 pandemic has also made it difficult to forecast revenue, costs, and expenses, as our platform has recently faced unprecedented usage from free users and new and existing customers, requiring us to devote significant resources to bolster our capacity and infrastructure. We have encountered and will encounter risks and uncertainties frequently experienced by growing companies in rapidly changing industries, such as the risks and uncertainties described herein. If our assumptions regarding these risks and uncertainties, which we use to plan our business, are incorrect or change, or if we do not address these risks successfully, our business would be harmed.

Interruptions, delays, or outages in service from our co-located data centers and a variety of other factors, including increased usage stemming from the COVID-19 pandemic, would impair the delivery of our services, require us to issue credits or pay penalties, and harm our business.

We currently serve our users from various co-located data centers located throughout the world. We also utilize Amazon Web Services and Oracle Cloud for the hosting of certain critical aspects of our business, as well as Microsoft Azure for limited customer-specified managed services. As part of our distributed meeting architecture, we establish private links between data centers that automatically transfer data between various data centers in order to optimize performance on our platform. Damage to, or failure of, these data centers has in the past resulted in and could in the future result in interruptions or delays in our services. In addition, we have experienced, and may in the future experience, other interruptions and delays in our services caused by a variety of other factors, including, but not limited to, infrastructure changes, vendor issues, human or software errors, viruses, security attacks, ransomware or cyber extortion, fraud, general internet availability issues, spikes in usage, and denial of service issues. In some instances, we may not be able to identify the cause or causes of these performance problems within an acceptable period of time. For example, in May 2020, we experienced a partial outage in our services that impacted a subset of our users for a limited number of hours, which we later determined was initially caused by a technical issue with a software implementation. Additionally, in connection with the addition of new data centers or expansion or consolidation of our existing data center facilities or other reasons, we may move or transfer our data and our users' metadata to other data centers, not including our China data center. Despite precautions that we take during this process, any unsuccessful data transfers may impair or cause disruptions in the delivery of our service, and we may incur significant costs in connection with any such move or transfer. Interruptions, delays, or outages in our services would reduce our revenue; may require us to issue credits or pay penalties; may subject us to claims and litigation; and may cause customers and hosts to terminate their subscriptions and adversely affect our ability to attract new customers and hosts. Our ability to attract and retain customers and hosts depends on our ability to provide customers and hosts with a highly reliable platform and even minor interruptions or delays in our services could harm our business.

Additionally, if our data centers are unable to keep up with our increasing needs for capacity, including increased usage stemming from the COVID-19 pandemic, customers may experience delays or interruptions in service as we seek to obtain additional capacity, which could result in the loss of customers who use our video-first communications platform because of its reliability and performance. We plan to continue our practice of opening new data centers to meet increased demand, but we may be unable to bring additional data centers online in a timely manner, including as a result of current shortages for certain parts, such as servers. In addition, to meet short-term capacity needs, we may need to rely increasingly on public cloud providers, including Amazon Web Services and Oracle Cloud, which may result in higher variable costs and harm our business, financial condition, and operating results.

We do not control, or in some cases have limited control over, the operation of the co-located data center facilities we use, and they are vulnerable to damage or interruption from human error; intentional bad acts; earthquakes; floods; fires; hurricanes; war; terrorist attacks; power losses; hardware failures; systems failures; telecommunications failures; disease, such as the COVID-19 pandemic; and similar events, any of which could disrupt our service. In the event of significant physical damage to one of these data centers, it may take a significant period of time to achieve full resumption of our services and our disaster recovery planning may not account for all eventualities. Despite precautions taken at these facilities, the occurrence of a natural disaster, an act of terrorism, or other act of malfeasance, a decision to close the facilities without adequate notice or other unanticipated problems at the facilities would harm our business.

We operate in competitive markets, and we must continue to compete effectively.

The market for communication and collaboration technologies platforms is competitive and rapidly changing. Certain features of our current platform compete in the communication and collaboration technologies market with products offered by:

- legacy web-based meeting providers, including Cisco Webex and LogMeIn GoToMeeting;
- bundled productivity solutions providers with video functionality, including Microsoft Teams and Google G Suite and Meet products;
- UCaaS and legacy PBX providers, including Avaya, RingCentral, and 8x8; and
- consumer-facing platforms that can support small- or medium-sized businesses, including Amazon, Apple and Facebook.

Other large established companies may also make investments in video communications tools. In addition, as we introduce new products and services, and with the introduction of new technologies and market entrants, we expect competition to intensify in the future. For example, we recently introduced Zoom Phone, a cloud phone system that allows customers to replace their existing PBX solution, which will result in increased competition against companies that offer similar services and new competitors that may enter that market in the future. Also, in connection with the travel restrictions and stay-in-place policies resulting from the COVID-19 pandemic, we have seen a significant increase in usage and subscriptions from smaller

customers, many of whom are consumers or small and medium sized businesses. With respect to these smaller customers, we face competition from more consumer-oriented platforms, most of which have more experience with the consumer market than we do. Further, many of our actual and potential competitors benefit from competitive advantages over us, such as greater name recognition; longer operating histories; more varied products and services; larger marketing budgets; more established marketing relationships; third-party integration; greater accessibility across devices or applications; access to larger user bases; major distribution agreements with hardware manufacturers and resellers; and greater financial, technical, and other resources. Some of our competitors may make acquisitions or enter into strategic relationships to offer a broader range of products and services than we do. These combinations may make it more difficult for us to compete effectively. We expect these trends to continue as competitors attempt to strengthen or maintain their market positions.

Demand for our platform is also price sensitive. Many factors, including our marketing, user acquisition, and technology costs, and our current and future competitors' pricing and marketing strategies, can significantly affect our pricing strategies. Certain competitors offer, or may in the future offer, lower-priced or free products, or services that compete with our platform, or may bundle and offer a broader range of products and services than we do. Similarly, certain competitors may use marketing strategies that enable them to acquire customers at a lower cost than we can. Furthermore, third parties could build products similar to ours that rely on open source software. Even if such products do not include all the features and functionality that our platform provides, we could face pricing pressure from these third parties to the extent that users find such alternative products to be sufficient to meet their video communications needs. There can be no assurance that we will not be forced to engage in price-cutting initiatives or other discounts or to increase our marketing and other expenses to attract and retain customers in response to competitive pressures, either of which would harm our business. We, on occasion, offer new customers a free period of time at the beginning of the subscription term that can result in deferred billings or long-term accounts receivable and increase the risk of loss on uncollected accounts receivable.

We may not be able to sustain our revenue growth rate in the future.

We have experienced significant revenue growth in prior periods. You should not rely on the revenue growth of any prior quarterly or annual period as an indication of our future performance. We expect our revenue growth rate to generally decline in future periods. Many factors may contribute to declines in our growth rate, including higher market penetration, increased competition, slowing demand for our platform, especially once the impact of the COVID-19 pandemic tapers and users return to work or school or are otherwise no longer subject to shelter-in-place mandates, a failure by us to continue capitalizing on growth opportunities, and the maturation of our business, among others. If our growth rate declines, investors' perceptions of our business and the trading price of our Class A common stock could be adversely affected.

Our quarterly results may fluctuate significantly and may not fully reflect the underlying performance of our business.

Our quarterly results of operations may vary significantly in the future, and period-to-period comparisons of our results of operations may not be meaningful. Accordingly, the results of any one quarter should not be relied upon as an indication of future performance. Our quarterly results of operations may fluctuate as a result of a variety of factors, many of which are outside of our control, and as a result, may not fully reflect the underlying performance of our business. For example, beginning in the fiscal quarter ended April 30, 2020, we faced unprecedented usage of our video-first communications platform largely due to the COVID-19 pandemic, a significant portion of which is attributable to free Basic accounts, which do not generate any revenue. To meet this increased demand, we have incurred and expect to continue to incur significant costs associated with upgrading our infrastructure and expanding our capacity, including higher variable costs to the extent we have had to rely on public cloud providers rather than our own data centers. Fluctuation in quarterly results may negatively impact the value of our securities. Factors that may cause fluctuations in our quarterly results of operations include, without limitation, those listed below:

- our ability to retain and upgrade customers to higher-priced tiers of Zoom Meeting plans;
- our ability to attract new hosts and upgrade hosts that subscribe to our free Zoom Meeting plan to one of our paid Zoom Meeting plans;
- our ability to hire and retain employees, in particular those responsible for the selling or marketing of our platform;
- our ability to hire, develop, and retain talented sales personnel who are able to achieve desired productivity levels in a reasonable period of time and provide sales leadership in areas in which we are expanding our sales and marketing efforts;
- changes in the way we organize and compensate our sales teams;
- the timing of expenses and recognition of revenue;

- our ability to increase sales to large organizations;
- the length of our sales cycles, especially with respect to sales to large enterprises and highly-regulated industries, including financial services and U.S. federal and state and foreign governmental agencies;
- the amount and timing of operating expenses related to the maintenance and expansion of our business, operations, and infrastructure, as well as international expansion and entry into operating leases; and the hiring and retention of personnel who can build, manage, and maintain our expanded business operations and infrastructure;
- timing and effectiveness of new sales and marketing initiatives;
- changes in our pricing policies or those of our competitors;
- our ability to hire and retain experienced research and development personnel to design new products, features, and functionality that meet our privacy and security standards;
- the timing and success of new products, features, and functionality by us or our competitors;
- interruptions or delays in our service; network outages; or actual, alleged, or perceived privacy violations or issues or security vulnerabilities, incidents, or breaches;
- lawsuits; regulatory actions or investigations; legislator scrutiny; or negative publicity arising from actual, alleged, or perceived privacy violations or issues or security vulnerabilities, incidents, or breaches;
- changes in the competitive dynamics of our industry, including consolidation among competitors;
- changes in laws and regulations that impact our business;
- any large indemnification payments to our users or other third parties;
- the timing of expenses related to any future acquisitions; and
- general economic and market conditions.

Failures in internet infrastructure or interference with broadband access could cause current or potential users to believe that our systems are unreliable, possibly leading our customers and hosts to switch to our competitors, or to cancel their subscriptions to our platform.

Unlike traditional communications and collaborations technologies, our services depend on our users' high-speed broadband access to the internet, usually provided through a cable or digital subscriber line connection. Increasing numbers of users and increasing bandwidth requirements may degrade the performance of our platform due to capacity constraints and other internet infrastructure limitations. As our number of users grow and their usage of communications capacity increases, including increased usage stemming from the COVID-19 pandemic, we will be required to make additional investments in network capacity to maintain adequate data transmission speeds, the availability of which may be limited, or the cost of which may be on terms unacceptable to us. If adequate capacity is not available to us as our user base grows, our network may be unable to achieve or maintain sufficiently high data transmission capacity, reliability, or performance. In addition, if internet service providers and other third parties providing internet services have outages or deteriorations in their quality of service, our users will not have access to our platform or may experience a decrease in the quality of our platform. Furthermore, as the rate of adoption of new technologies increases, the networks our platform relies on may not be able to sufficiently adapt to the increased demand for these services, including ours. Frequent or persistent interruptions could cause current or potential users to believe that our systems or platform are unreliable, leading them to switch to our competitors or to avoid our platform, which could permanently harm our business.

In addition, users who access our platform through mobile devices, such as smartphones and tablets, must have a high-speed connection, such as 3G, 4G, 5G, LTE, satellite, or Wi-Fi, to use our services and applications. Currently, this access is provided by companies that have significant and increasing market power in the broadband and internet access marketplace, including incumbent phone companies, cable companies, satellite companies, and wireless companies. Some of these providers offer products and subscriptions that directly compete with our own offerings, which can potentially give them a competitive advantage. Also, these providers could take measures that degrade, disrupt, or increase the cost of user access to third-party services, including our platform, by restricting or prohibiting the use of their infrastructure to support or facilitate third-party services or by charging increased fees to third parties or the users of third-party services, any of which would make our platform less attractive to users and reduce our revenue.

On January 4, 2018, the Federal Communications Commission ("FCC") released an order reclassifying broadband internet access as an information service, subject to certain provisions of Title I of the Communications Act. The order requires broadband providers to publicly disclose accurate information regarding network management practices, performance

characteristics, and commercial terms of their broadband internet access services sufficient to enable consumers to make informed choices regarding the purchase and use of such services, and entrepreneurs and other small businesses to develop, market, and maintain internet offerings. The new rules went into effect on June 11, 2018. Numerous parties have filed judicial challenges to the order, and on October 1, 2019, the United States Court of Appeals for the District of Columbia Circuit released a decision that affirmed nearly all of the new rules, but reversed the FCC's decision to prohibit all state and local regulation targeted at broadband internet service, requiring case-by-case determinations as to whether state and local regulation conflicts with the FCC's rules. The court also required the FCC to reexamine three issues from the order but allowed the order to remain in effect, while the FCC conducts that review. The original parties to the appeal may seek additional review of the order from the full Court of Appeals or the Supreme Court. In addition, a number of states are adopting or considering legislation or executive actions that would regulate the conduct of broadband providers. As a result, we cannot predict whether the FCC order or state initiatives will be modified, overturned, or vacated by legal action of the court, federal legislation, or the FCC. Under the new rules, broadband internet access providers may be able to charge web-based services such as ours for priority access, which could result in increased costs and a loss of existing customers and hosts, impair our ability to attract new customers and hosts, and harm our business.

As we increase sales to large organizations, our sales cycles could lengthen, and we could experience greater deployment challenges.

As our business evolves, we may need to invest more resources into sales to large organizations. Large organizations typically undertake a significant evaluation and negotiation process due to their leverage, size, organizational structure, and approval requirements, all of which can lengthen our sales cycle. We may also face unexpected deployment challenges with large organizations or more complicated deployment of our platform. Large organizations may demand additional features, support services and pricing concessions, or require additional security management or control features. We may spend substantial time, effort, and money on sales efforts to large organizations without any assurance that our efforts will produce any sales or that these customers will deploy our platform widely enough across their organization to justify our substantial up-front investment. As a result, we anticipate increased sales to large organizations will lead to higher up-front sales costs and greater unpredictability in our business, results of operations, and financial condition.

We generate revenue from sales of subscriptions to our platform, and any decline in demand for our platform or for communications and collaboration technologies in general would harm our business.

We generate, and expect to continue to generate, revenue from the sale of subscriptions to our platform. As a result, widespread acceptance and use of communications and collaboration technologies in general, and our platform in particular, is critical to our future growth and success. If the communications and collaboration technologies market fails to grow, or grows more slowly than we currently anticipate, or if any new customers or hosts that have subscribed to our services during the COVID-19 pandemic subsequently reduce or discontinue their use after the impact of the pandemic has tapered, demand for our platform could be negatively affected.

Changes in user preferences for communications and collaboration technologies may have a disproportionately greater impact on us than if we offered multiple platforms or disparate products. Demand for communications and collaboration technologies in general, and our platform in particular, is affected by a number of factors, many of which are beyond our control. Some of these potential factors include:

- general awareness of the communications and collaboration technologies category;
- availability of products and services that compete with ours;
- security and privacy;
- new modes of communications and collaboration that may be developed in the future;
- ease of adoption and use;
- features and platform experience;
- reliability of our platform, including frequency of outages;
- performance;
- brand;
- user support; and
- pricing.

The communications and collaboration technologies market is subject to rapidly changing user demand and trends in preferences. If we fail to successfully predict and address these changes and trends, meet user demands, or achieve more widespread market acceptance of our platform, our business would be harmed.

We have experienced net losses in the past, and we expect to increase our expenses in the future, which could prevent us from maintaining profitability.

Although we generated net income of \$27.1 million for the three months ended April 30, 2020, we have incurred net losses in the past and could incur net losses in the future. We intend to continue to expend significant funds to expand our direct sales force and marketing efforts to attract new customers and hosts and to develop and enhance our products and for general corporate purposes, including operations, hiring additional personnel, including through acquisitions of other businesses, upgrading our infrastructure, and addressing security and privacy issues, including those stemming from the unprecedented numbers of first-time users during the COVID-19 pandemic who may not have full IT support or established protocols like our enterprise customers, and expanding into new geographical markets. To the extent we are successful in increasing our user base, we may also incur increased losses because, other than sales commissions, the costs associated with acquiring customers and hosts are generally incurred up front, while the subscription revenue is generally recognized ratably over the subscription term, which can be monthly, annual, or on a multiyear basis. Our efforts to grow our business may be costlier than we expect, and we may not be able to increase our revenue enough to offset our higher operating expenses. We may incur significant losses in the future for a number of reasons, including as a result of the other risks described herein, and unforeseen expenses, difficulties, complications, delays, and other unknown events. For example, we have faced unprecedented usage during the COVID-19 pandemic and, to meet this increased demand, have incurred and expect to continue to incur significant costs associated with upgrading our infrastructure and expanding our capacity, including higher variable costs to the extent we have to rely on public cloud providers rather than our own data centers. Despite these significant investments, a majority of these new hosts using our platform on a free Basic account may never upgrade to a paid Zoom Meeting plan. If we are unable to achieve and sustain profitability, the value of our business and Class A common stock may significantly decrease. Furthermore, it is difficult to predict the size and growth rate of our market, customer demand for our platform, user adoption and renewal of our platform, the entry of competitive products and services, or the success of existing competitive products and services. As a result, we may not achieve or maintain profitability in future periods. If we fail to grow our revenue sufficiently to keep pace with our investments and other expenses, our business would be harmed.

The experience of our users depends upon the interoperability of our platform across devices, operating systems, and third-party applications that we do not control, and if we are not able to maintain and expand our relationships with third parties to integrate our platform with their solutions, our business may be harmed.

One of the most important features of our platform is its broad interoperability with a range of diverse devices, operating systems, and third-party applications. Our platform is accessible from the web and from devices running Windows, Mac OS, iOS, Android, and Linux. We also have integrations with Atlassian, Dropbox, Google, Microsoft, Salesforce, Slack, and a variety of other productivity, collaboration, data management, and security vendors. We are dependent on the accessibility of our platform across these and other third-party operating systems and applications that we do not control. For example, given the broad adoption of Microsoft Office and other productivity software, it is important that we are able to integrate with this software. Several of our competitors own, develop, operate, or distribute operating systems, app stores, co-located data center services, and other software, and also have material business relationships with companies that own, develop, operate, or distribute operating systems, applications markets, co-located data center services, and other software that our platform requires in order to operate. Moreover, some of these competitors have inherent advantages developing products and services that more tightly integrate with their software and hardware platforms or those of their business partners.

Third-party services and products are constantly evolving, and we may not be able to modify our platform to assure its compatibility with that of other third parties following development changes. In addition, some of our competitors may be able to disrupt the operations or compatibility of our platform with their products or services, or exert strong business influence on our ability to, and terms on which we, operate and distribute our platform. For example, we currently offer products that directly compete with several large technology companies that we rely on to ensure the interoperability of our platform with their products or services. As our respective products evolve, we expect this level of competition to increase. Should any of our competitors modify their products or standards in a manner that degrades the functionality of our platform or gives preferential treatment to competitive products or services, whether to enhance their competitive position or for any other reason, the interoperability of our platform with these products could decrease and our business could be harmed.

In addition, we provide, develop, and create applications for our platform partners that integrate our platform with our partners' various offerings. For example, our Zoom Meetings product integrates with tools offered by companies, such as Atlassian and Dropbox, to help teams get more done together. If we are not able to continue and expand on existing and new relationships to integrate our platform with our partners' solutions, or there are quality issues with our products or service interruptions of our products that integrate with our partners' solutions, our business will be harmed.

We may not be able to respond to rapid technological changes, extend our platform, or develop new features.

The communications and collaboration technologies market is characterized by rapid technological change and frequent new product and service introductions. Our ability to grow our user base and increase revenue from customers will depend heavily on our ability to enhance and improve our platform; introduce new features and products; and interoperate across an increasing range of devices, operating systems, and third-party applications. Our customers may require features and capabilities that our current platform does not have. We invest significantly in research and development, and our goal is to focus our spending on measures that improve quality and ease of adoption, enhance privacy and security, and create organic user demand for our platform. There is no assurance that our enhancements to our platform or our new product experiences, features, or capabilities will be compelling to our users or gain market acceptance. If our research and development investments do not accurately anticipate user demand or if we fail to develop our platform in a manner that satisfies user preferences and requirements in a timely and cost-effective manner, we may fail to retain our existing users or increase demand for our platform.

The introduction of new products and services by competitors or the development of entirely new technologies to replace existing offerings could make our platform obsolete or adversely affect our business, results of operations, and financial condition. We may experience difficulties with software development, design, or marketing that could delay or prevent our development, introduction, or implementation of new product experiences, features, or capabilities. We have in the past experienced delays in our internally planned release dates of new features and capabilities and there can be no assurance that new product experiences, features, or capabilities will be released according to schedule. Any delays could result in adverse publicity, loss of revenue or market acceptance, or claims by users brought against us, all of which could harm our business. Moreover, new productivity features to our platform may require substantial investment, and we have no assurance that such investments will be successful. If customers and hosts do not widely adopt our new product experiences, features, and capabilities, we may not be able to realize a return on our investment. If we are unable to develop, license, or acquire new features and capabilities to our platform on a timely and cost-effective basis, or if such enhancements do not achieve market acceptance, our business would be harmed.

The failure to effectively develop and expand our marketing and sales capabilities could harm our ability to increase our customer base and achieve broader market acceptance of our platform.

Our ability to increase our customer and host base and achieve broader market acceptance of our products and services will depend to a significant extent on our ability to expand our marketing and sales operations. We plan to continue expanding our sales force and strategic partners, both domestically and internationally. If we are unable to hire a sufficient number of qualified sales personnel in the near term, our future revenue growth and business could be adversely impacted.

Identifying and recruiting qualified sales representatives and training them is time consuming and resource intensive, and they may not be fully trained and productive for a significant amount of time. We also plan to dedicate significant resources to sales and marketing programs, including internet and other online advertising. All of these efforts will require us to invest significant financial and other resources. In addition, the cost to acquire customers and hosts is high due to these marketing and sales efforts. Our business will be harmed if our efforts do not generate a correspondingly significant increase in revenue. We will not achieve anticipated revenue growth from expanding our sales force if we are unable to hire, develop, and retain talented sales personnel, our new sales personnel are unable to achieve desired productivity levels in a reasonable period of time, or if our sales and marketing programs are not effective.

Our security measures have been compromised in the past and may be compromised in the future. If our security measures are compromised in the future or if our information technology fails, this could harm our reputation, expose us to significant fines and liability, impair our sales, and harm our business. In addition, our products and services may be perceived as not being secure. This perception may result in customers and hosts curtailing or ceasing their use of our products, our incurring significant liabilities, and our business being harmed.

Our operations involve the storage and transmission of customer and user data or information, and security incidents have occurred in the past, and may occur in the future, resulting in unauthorized access to, loss or unauthorized disclosure of, or inadvertent disclosure of, this information, regulatory investigations or enforcement actions, litigation, indemnity obligations, and other possible liabilities, as well as negative publicity, which could damage our reputation, impair our sales, and harm our business. Cyberattacks and other malicious internet-based activity continue to increase, and cloud-based platform providers of products and services have been and are expected to continue to be targeted. In addition to traditional computer “hackers,” we face security risks from malicious code (such as viruses and worms), employee theft, misuse of information or systems, sophisticated nation-state and nation-state supported actors, and advanced persistent threat intrusions. Moreover, security incidents can result in interruptions, delays, or outages in our operations and services, including due to ransomware or denial-of-service attacks. Despite significant efforts to create security barriers to such threats, it is virtually impossible for us to entirely mitigate these risks. If our security measures are compromised as a result of third-party action, employee, customer,

host or user error, malfeasance, stolen or fraudulently obtained log-in credentials, or otherwise, our reputation would be damaged; our data, information or intellectual property, or those of our customers, may be destroyed, stolen, or otherwise compromised; our business may be harmed; and we could incur significant liability. We have not always been able in the past and may be unable in the future to anticipate or prevent threats or techniques used to detect or exploit vulnerabilities in our services or software or third-party software, or obtain unauthorized access to or compromise our systems because they change frequently and are generally not detected until after an incident has occurred. In addition, security researchers and other individuals have in the past and will continue in the future to actively search for and exploit actual and potential vulnerabilities in our software or services. This activity may increase because of increased demand for our services and increased media scrutiny of our video-first communications platform, and can lead to additional adverse publicity, reputational harm, extortion threats, business and operational interruptions, additional expenses, litigation, regulatory investigations and actions, and substantial harm to our business. For example, in July 2019, a security researcher published a blog highlighting concerns with the Zoom Meeting platform, including certain video-on features. We were able to release updates to the software addressing these vulnerabilities, and we are not aware of any customers being affected or meetings compromised by these vulnerabilities. In most cases customers are responsible for installing this update to the software, and their software is subject to these vulnerabilities until they do so. Additionally, in March 2020, a security researcher reported certain vulnerabilities related to Zoom's MacOS version that could have allowed an unauthorized person to gain root access to a user's system. We cannot be certain that we will be able to address any vulnerabilities in our software that we may become aware of in the future, or there may be delays in developing patches that can be effectively deployed to address vulnerabilities. We expect similar issues to arise in the future as Zoom's products and services are more widely adopted, and as we continue to expand the features and functionality of existing products and introduce new products. We expect to expend significant resources in an effort to protect against security incidents and to mitigate, detect, and remediate actual and potential vulnerabilities. Security incidents and vulnerabilities, and concerns regarding privacy, data protection, and information security may cause some of our customers and hosts to stop using our solutions and fail to renew their subscriptions. This discontinuance in use or failure to renew could substantially harm our business. Further, as we rely on third-party and public-cloud infrastructure, we depend in part on third-party security measures to protect against unauthorized access, cyberattacks, and the mishandling of data and information. In addition, failures to meet customers' and hosts' expectations with respect to security and confidentiality of their data and information could damage our reputation and affect our ability to retain customers and hosts, attract new customers and hosts, and grow our business. In addition, cybersecurity events or security vulnerabilities could result in breaches of our agreements with customers, lawsuits against us (including class action litigation), regulatory investigations or actions, and significant increases in costs, including costs for remediating the effects of such an event, lost revenue due to network downtime, and a decrease in customer, host, and user trust; increases in insurance premiums due to cybersecurity incidents, increased costs to address cybersecurity issues, and attempts to prevent future incidents; fines, penalties, judgments and settlements, and attorney fees; and harm to our business and our reputation because of any such incident.

Many governments have enacted laws requiring companies to provide notice of data security incidents involving certain types of personal data. Such laws are inconsistent, and compliance in the event of a widespread data breach is costly. In addition, some of our customers require us to notify them of data security breaches. Security compromises experienced by our competitors, our customers, or us may lead to public disclosures, which may lead to widespread negative publicity. In addition, while more than half of our employees are based in the United States, like many similarly situated technology companies, we have a sizable number of research and development personnel in China, which could expose us to market and media scrutiny regarding the perceived integrity of our platform or data security and privacy features. Any security compromise in our industry, whether actual or perceived, could harm our reputation, erode confidence in the effectiveness of our security measures; negatively affect our ability to attract new customers and hosts; cause existing customers to elect not to renew their subscriptions; or subject us to third-party lawsuits, regulatory investigations, proceedings, and fines, or other action or liability, which could harm our business and reputation. Increased usage of our services, novel uses of our services, and additional awareness of Zoom and our brand could lead to greater public scrutiny of, press related to, or a negative perception of our information security and potential vulnerabilities associated with, our platform. For example, in connection with the COVID-19 pandemic, we opened our platform to unprecedented numbers of first-time users without fully considering the challenges it would bring to those who did not have full IT support or established protocols for security and privacy like our enterprise customers. As a result, we have experienced negative publicity related to meeting disruption, security, and privacy issues. Such unfavorable publicity and scrutiny could result in material reputational harm, a loss of customer and user confidence, increased regulatory or litigation exposure, additional expenses, and other harm to our business.

There can be no assurance that any limitations of liability provisions in our subscription agreements, terms of use or other agreements would be enforceable or adequate or would otherwise protect us from any such liabilities or damages with respect to any particular claim. We also cannot be sure that our existing general liability insurance coverage and coverage for cyber liability or errors or omissions will continue to be available on acceptable terms or will be available in sufficient amounts to cover one or more large claims or that the insurer will not deny coverage as to any future claim. The successful assertion of one or more large claims against us that exceed available insurance coverage, or the occurrence of changes in our insurance

policies, including premium increases or the imposition of large deductible or co-insurance requirements, would harm our business.

The actual or perceived failure by us, our customers, partners or vendors to comply with stringent and evolving privacy, data protection, and information security laws, regulations, standards, policies, and contractual obligations could harm our reputation and business or subject us to significant fines and liability.

We receive, store, process, generate, use, and share personal information and other customer and user content necessary to provide our service and ensure it is delivered effectively, to operate our business, for legal and marketing purposes, and for other business-related purposes. There are numerous federal, state, local, and international laws and regulations regarding privacy, data protection, information security and the collection, storing, sharing, use, processing, transfer, disclosure, and protection of personal information and other content, the scope of which is changing, subject to differing interpretations and may be inconsistent among countries, or conflict with other rules. We are also subject to the terms of our privacy policies and contractual obligations to third parties related to privacy, data protection, and information security. We strive to comply with applicable laws, certifications, documentation, publications, regulations, standards, policies, and other obligations relating to privacy, data protection, and information security to the extent possible. Although we endeavor to comply with our published policies, publications, certifications, and documentation, we may at times fail to do so or may be perceived to have failed to do so. Moreover, despite our efforts, we may not be successful in achieving compliance if our employees or vendors do not comply with our published policies, certifications, and documentation. Such failures can subject us to potential international, local, state and federal legal or regulatory action if our published policies, certifications, and documentation are found to be inaccurate, incomplete, deceptive, unfair, or misrepresentative of our actual practices. The regulatory framework for privacy and data protection worldwide is, and is likely to remain, uncertain for the foreseeable future, which we expect will increase our compliance costs and exposure to liability, and it is possible that these or other actual or alleged obligations may be interpreted and applied in a manner that is inconsistent from one jurisdiction to another and may conflict with other rules or our practices. Increased usage of our services, novel uses of our services, and additional awareness of Zoom and our brand stemming from the COVID-19 pandemic could make it more difficult for us to comply with our contractual obligations, our published policies, our publications, our certifications, our documentation, standards, regulations, and applicable laws related to privacy, data protection, and information security, and has and could result in greater public scrutiny of, press related to, or a negative perception of our privacy, data protection, and information security practices. The failure to comply and greater public scrutiny of our privacy, data protection, and information security practices could result in material reputational harm, a loss of customer and user confidence, increased regulatory or litigation exposure, additional expenses, and other harm to our business.

We also expect that there will continue to be new or amended laws, regulations, and industry standards concerning privacy, data protection, and information security proposed and enacted in various jurisdictions. For example, in May 2018, the General Data Protection Regulation (“GDPR”) went into effect in the EU. The GDPR imposes more stringent data protection requirements and requires us and our customers to give more detailed disclosures about how we collect, use and share personal information; contractually commit to data protection measures in our contracts with clients; maintain adequate data security measures; notify regulators and affected individuals of certain data breaches; meet extensive privacy governance and documentation requirements; and honor individuals’ data protection rights, including their rights to access, correct and delete their personal information. The GDPR provides greater penalties for noncompliance than previous data protection laws. Companies that violate the GDPR can face private litigation, restrictions on data processing, and fines of up to the greater of 20 million Euros or 4% of their worldwide annual revenue. Our or our customers’, partners’, or vendors’ failure to comply with the GDPR could lead to significant fines imposed by regulators or restrictions on our ability to process personal information as needed to provide our product and services. We may also be obligated to assist our customers, partners, and vendors with their own compliance obligations under the GDPR, which could require expenditure of significant resources. Assisting our customers, partners, and vendors in complying with the GDPR, or complying with the GDPR ourselves, may cause us to incur substantial operational costs or require us to change our business practices.

Further, following a referendum in June 2016 in which voters in the U.K. approved an exit from the EU, the U.K. government formally left the EU on January 31, 2020, known as Brexit. Pursuant to the withdrawal arrangements agreed to between the U.K. and the EU, the U.K. is subject to a transition period until December 31, 2020, during which EU rules will continue to apply (the “Brexit Transition Period”). Negotiations between the U.K. and the EU are expected to continue in relation to the customs and trading relationship between the U.K. and the EU following the expiry of the Brexit Transition Period. The effects of Brexit have been and are expected to continue to be far-reaching. Brexit and the perceptions as to its impact may adversely affect business activity and economic conditions globally, and could continue to contribute to instability in global financial markets. Brexit could also have the effect of disrupting the free movement of goods, services, and people between the U.K. and the EU. In addition, Brexit could lead to legal uncertainty and potentially divergent national laws and regulations as the U.K. determines which EU laws to replace or replicate. The full effects of Brexit are uncertain and will remain so until after the Brexit Transition Period and the U.K. and EU reach a definitive resolution with regards to outstanding trade and legal matters. Given these possibilities and others we may not anticipate, as well as the lack of comparable precedent,

the full extent to which our business, results of operations, and financial condition could be adversely affected by Brexit is uncertain. Brexit has also created uncertainty with regard to the regulation of data protection in the U.K. In particular, although the U.K. enacted a Data Protection Act in May 2018 that is designed to be consistent with the GDPR, uncertainty remains regarding how data transfers to and from the U.K. will be regulated.

Additionally, although we have self-certified under the U.S.-EU and U.S.-Swiss Privacy Shield Frameworks with regard to our transfer of certain personal data from the European Economic Area (“EEA”) and Switzerland to the United States, there is currently litigation challenging various EU mechanisms for adequate data transfers, and it is uncertain whether various mechanisms, such as the Privacy Shield Frameworks or European Commission’s Standard Contractual Clauses for transfers of personal information, will be invalidated by the European courts. In addition, our self-certification may be challenged or investigated by regulators in the United States and Europe. Loss of our ability to lawfully transfer personal information out of the EEA may require us to expand our data processing capabilities in the EEA at significant expense and may make our products and services less attractive to certain customers regulated by the GDPR. Additionally, other countries outside of the EEA have passed or are considering passing laws requiring local data residency, which could increase the cost and complexity of delivering our products and services and operating our business.

States have also begun to introduce more comprehensive privacy legislation. For example, the California Consumer Privacy Act of 2018 (“CCPA”), which went into effect on January 1, 2020, affords consumers expanded privacy protections. Aspects of the CCPA and its interpretation and enforcement remain uncertain. The potential effects of the CCPA are far-reaching and may require us to modify our data processing practices and policies and to incur substantial costs and expenses in an effort to comply. For example, the CCPA gives California residents expanded rights to access and require deletion of their personal information, opt out of certain personal information sharing, and receive detailed information about how their personal information is used. The CCPA also provides for civil penalties for violations, as well as a private right of action for data breaches that may increase data breach litigation. For example, multiple putative class actions have been filed against us claiming, among other things, purported violations of a variety of state consumer protection and privacy laws, including the CCPA. See Part II, Item 1 “Legal Proceedings” for additional information. The CCPA could mark the beginning of a trend toward more stringent privacy legislation in the United States, as other states may follow California’s lead and increase protections for their residents. The CCPA has already prompted a number of proposals for new federal and state privacy legislation that, if passed, could increase our potential liability, increase our compliance costs and adversely affect our business. In addition, effective October 1, 2019, Nevada amended its existing Security of Personal Information Law (“SPI Law”) to now require, among other things, that businesses provide an online mechanism or toll-free phone number to intake requests from consumers to opt out of the sale of their personal data.

States have also begun to introduce more comprehensive privacy legislation. For example, the California Consumer Privacy Act of 2018 (“CCPA”), which went into effect on January 1, 2020, affords consumers expanded privacy protections. Aspects of the CCPA and its interpretation and enforcement remain uncertain. The potential effects of the CCPA are far-reaching and may require us to modify our data processing practices and policies and to incur substantial costs and expenses in an effort to comply. For example, the CCPA gives California residents expanded rights to access and require deletion of their personal information, opt out of certain personal information sharing, and receive detailed information about how their personal information is used. The CCPA also provides for civil penalties for violations, as well as a private right of action for data breaches that may increase data breach litigation. For example, multiple putative class actions have been filed against us claiming, among other things, purported violations of a variety of state consumer protection and privacy laws, including the CCPA. See Part II, Item 1 “Legal Proceedings” for additional information. The CCPA could mark the beginning of a trend toward more stringent privacy legislation in the United States, as other states may follow California’s lead and increase protections for their residents. The CCPA has already prompted a number of proposals for new federal and state privacy legislation that, if passed, could increase our potential liability, increase our compliance costs and adversely affect our business. In addition, effective October 1, 2019, Nevada amended its existing Security of Personal Information Law (“SPI Law”) to now require, among other things, that businesses provide an online mechanism or toll-free phone number to intake requests from consumers to opt out of the sale of their personal data.

The Children’s Online Privacy Protection Act (“COPPA”) applies to operators of commercial websites and online services directed to U.S. children under the age of 13 that collect personal information from children, and to operators of general audience websites with actual knowledge that they are collecting personal information from U.S. children under the age of 13. We provide video communications services to schools, school districts, and school systems to support traditional, virtual, and hybrid classrooms, distance learning, educational office hours, guest lectures, and other services. As part of these services, Zoom may be used by students, including students under the age of 13, and we collect personal information from such students on behalf of our school subscribers. School subscribers must contractually consent to Zoom’s information practices on behalf of students, prior to students using the services. In addition, the GDPR prohibits certain processing of the personal information of children under the age of 13-16 (depending on the country) without parental consent. The CCPA requires companies to obtain the consent of children in California under 16 (or parental consent for children under 13) before selling their personal information. COPPA is subject to interpretation by courts and other governmental authorities, including the FTC, and the FTC

is authorized to promulgate, and has promulgated, revisions to regulations implementing provisions of COPPA. Although we strive to ensure that our platform and applications are compliant with applicable provisions of COPPA, GDPR, and CCPA, these provisions may be modified, interpreted, or applied in new manners that we may be unable to anticipate or prepare for appropriately, and we may incur substantial costs or expenses in attempting to modify our systems, platform, applications, or other technology to address changes in COPPA, GDPR, CCPA, or interpretations thereof. If we fail to accurately anticipate the application, interpretation, or legislative expansion of COPPA, GDPR, and CCPA, we could be subject to governmental enforcement actions, data processing restrictions, litigation, fines and penalties, or adverse publicity. Moreover, as a result of any such failures, we could be in breach of our K-12 school customer contracts, and our customers could lose trust in us, which could harm our reputation and business.

With laws and regulations, such as the GDPR in the EU as well as the CCPA, SPI Law, and COPPA in the United States imposing relatively burdensome obligations, and with substantial uncertainty over the interpretation and application of these and other laws and regulations, we have faced and may face additional challenges in addressing their requirements and making necessary changes to our policies and practices, and may incur significant costs and expenses in an effort to do so, any of which could materially adversely affect our business and operating results. Additional uses of our services arising out of increased demand associated with the COVID-19 pandemic may require us to address additional privacy, data protection, and information security laws, regulations, standards, policies, and contractual obligations. Any failure or perceived failure by us to comply with such laws, regulations, standards, policies, and contractual obligations, or our privacy policies, publications, certifications, or documentation could lead to governmental investigations or enforcement actions (including investigations or actions by state attorneys general, federal regulators, and international regulators), litigation (including class action litigation), claims, or public statements against us by consumer advocacy groups or others, and could result in significant liability, fines or penalties, or cause our users to lose trust in us, which could have an adverse effect on our reputation and business. We have in the past and may in the future receive inquiries or be subject to investigations by various government entities regarding, among other things, our privacy, data protection, and information security practices. The result of these proceedings could impact our brand reputation, subject us to monetary remedies and costs, interrupt or require us to change our business practices, divert resources and the attention of management from our business, or subject us to other remedies that adversely affect our business. We also face litigation regarding our privacy and security practices. See Part II, Item 1 “Legal Proceedings” for additional information. Furthermore, the costs of compliance with, and other burdens imposed by, the laws, regulations, and policies that are applicable to the businesses of our users may limit the adoption and use of, and reduce the overall demand for, our platform and services, which could have an adverse impact on our business.

Additionally, we rely on the administrators of our customers in the healthcare and education industries to obtain the necessary consents from users of our products and services and to ensure their account settings are configured correctly for their compliance under applicable laws and regulations. Furthermore, if third parties we work with, such as vendors or developers, violate applicable laws, regulations, or our policies, such violations may also put our users’ content at risk and could in turn have an adverse effect on our business. Any significant change to applicable laws, regulations, or industry practices regarding the collection, use, retention, security, or disclosure of our users’ content, or regarding the manner in which the express or implied consent of users for the collection, use, retention, or disclosure of such content is obtained, could increase our costs and require us to modify our services and features, possibly in a material manner, which we may be unable to complete and may limit our ability to store and process user data or develop new services and features.

Increased usage of our services and additional awareness of Zoom and our brand stemming from the COVID-19 pandemic could lead to greater public scrutiny of, press related to, or a negative perception of our collection, use, storage, disclosure, and processing of personal information, and our privacy policies and practices. For example, users and customers, particularly those that are new to Zoom, may not necessarily have their own IT controls like those of a larger organization to configure our service in a manner that provides them with control over user settings. This has resulted in reports of users and customers experiencing meeting disruptions by malicious actors. Additional unfavorable publicity and scrutiny could result in material reputational harm, a loss of customer and user confidence, increased regulatory or litigation exposure, additional expenses and other harm to our business.

Our business depends on a strong brand, and if we are not able to maintain and enhance our brand, our ability to expand our base of users will be impaired and our business will be harmed.

We believe that our brand identity and awareness have contributed to our success and have helped fuel our efficient go-to-market strategy. We connect people through frictionless and secure video, voice, chat, and content sharing. We also believe that maintaining and enhancing the Zoom brand is critical to expanding our base of customers, hosts, and users and, in particular, conveying to users and the public that the Zoom brand consists of a broad communications platform, rather than just one distinct product. For example, if users incorrectly view the Zoom brand primarily as a video conferencing point solution or utility rather than as a platform with multiple communications solutions, or have a negative perception of our privacy and security, then our market position may be detrimentally impacted at such time as a competitor introduces a new or better product. We anticipate that, as our market becomes increasingly competitive, maintaining and enhancing our brand may

become increasingly difficult and expensive. Any unfavorable publicity or perception of our platform, including any delays or interruptions in service due to capacity constraints stemming from increased usage due to the COVID-19 pandemic, or of our privacy or security features, or of the providers of communication and collaboration technologies generally, could adversely affect our reputation and our ability to attract and retain hosts. Similarly, any unfavorable perception of our company, including due to any actual or perceived violation by our employees of our policies, such as our Code of Business Conduct and Ethics, could cause us reputational harm and customer loss, impact our financial performance, expose us to litigation, and harm our business, among other things. If we fail to promote and maintain the Zoom brand, including consumer and public perception of our platform or our company, or if we incur excessive expenses in this effort, our business will be harmed.

We may not successfully manage our growth or plan for future growth.

Since our founding in 2011, we have experienced rapid growth. For example, our headcount has grown from 1,958 full-time employees as of April 30, 2019, to 2,854 full-time employees as of April 30, 2020, with employees located both in the United States and internationally. The growth and expansion of our business places a continuous, significant strain on our management, operational, and financial resources. Further growth of our operations to support our user base, our expanding third-party relationships, our information technology systems, and our internal controls and procedures may not be adequate to support our operations. In addition, as we continue to grow, we face challenges of integrating, developing, and motivating a rapidly growing employee base in various countries around the world. Certain members of our management have not previously worked together for an extended period of time, and some do not have experience managing a public company, which may affect how they manage our growth. Managing our growth will also require significant expenditures and allocation of valuable management resources.

In addition, our rapid growth may make it difficult to evaluate our future prospects. Our ability to forecast our future results of operations is subject to a number of uncertainties, including our ability to effectively plan for and model future growth. We have encountered in the past, and may encounter in the future, risks and uncertainties frequently experienced by growing companies in rapidly changing industries. If we fail to achieve the necessary level of efficiency in our organization as it grows, or if we are not able to accurately forecast future growth, our business would be harmed.

Our business may be significantly affected by a change in the economy, including any resulting effect on consumer or business spending.

Our business may be affected by changes in the economy generally, including as a result of the COVID-19 pandemic and any resulting effect on spending by our customers. While some of our customers may consider our platform to be a cost-saving purchase, decreasing the need for business travel, others may view a subscription to our platform as a discretionary purchase, and our customers may reduce their discretionary spending on our platform during an economic downturn. Given current economic conditions, we could experience a reduction in demand and loss of customers, especially if the effects of the current economic environment have a prolonged impact on various industries that our video-first communications platform addresses. We would lose customers as a result of customers ceasing to do business, and we could experience a material increase in longer payment cycles and greater difficulty in collecting accounts receivable from certain customers. While we have seen increased usage stemming from the COVID-19 pandemic, a significant portion of the increase in usage of our platform is attributable to free Basic accounts, which do not generate any revenue. Moreover, there is no assurance that we will experience an increase in paying customers once the pandemic tapers, particularly in light of the economic downturn. Similarly, given the shift in our customer base from largely businesses and enterprises to a mix of businesses, enterprises, and consumers due to the COVID-19 pandemic, we expect that we will see higher rates of non-renewals than we have experienced historically.

Our ability to sell subscriptions to our platform could be harmed by real or perceived material defects or errors in our platform.

The software technology underlying our platform is inherently complex and may contain material defects or errors, particularly when new products are first introduced or when new features or capabilities are released. We have from time to time found defects or errors in our platform, and new defects or errors in our existing platform or new products may be detected in the future by us or our users. There can be no assurance that our existing platform and new products will not contain defects. Any real or perceived errors, failures, vulnerabilities, or bugs in our platform could result in negative publicity or lead to data security, access, retention, or other performance issues, all of which could harm our business. The costs incurred in correcting such defects or errors may be substantial and could harm our business. Moreover, the harm to our reputation and legal liability related to such defects or errors may be substantial and would harm our business.

We also utilize hardware purchased or leased and software and services licensed from third parties to offer our platform. Any defects in, or unavailability of, our or third-party hardware, software, or services that cause interruptions to the availability of our services, loss of data, or performance issues could, among other things:

- cause a reduction in revenue or delay in market acceptance of our platform;

- require us to issue refunds to our customers or expose us to claims for damages;
- cause us to lose existing hosts and make it more difficult to attract new customers and hosts;
- divert our development resources or require us to make extensive changes to our platform, which would increase our expenses;
- increase our technical support costs; and
- harm our reputation and brand.

If we were to lose the services of our Chief Executive Officer or other members of our senior management team, we may not be able to execute our business strategy.

Our success depends in a large part upon the continued service of key members of our senior management team. In particular, our founder, President and Chief Executive Officer, Eric S. Yuan, is critical to our overall management, as well as the continued development of our products, services, the Zoom platform, our culture, our strategic direction, engineering, and our global operations, including regions such as the United States, EMEA and APAC. All of our executive officers are at-will employees, and we do not maintain any key person life insurance policies. The loss of any member of our senior management team would harm our business.

The failure to attract and retain additional qualified personnel or to maintain our happiness-centric company culture could harm our business and culture and prevent us from executing our business strategy.

To execute our business strategy, we must attract and retain highly qualified personnel. Competition for executives, software developers, sales personnel, and other key employees in our industry is intense. In particular, we compete with many other companies for software developers with high levels of experience in designing, developing, and managing software for communication and collaboration technologies, as well as for skilled sales and operations professionals. At times, we have experienced, and we may continue to experience, difficulty in hiring and retaining employees with appropriate qualifications, and we may not be able to fill positions in a timely manner or at all. We completed our initial public offering in April 2019 and potential candidates may not perceive our compensation package, including our equity awards, as favorably as employees hired prior to our initial public offering. In addition, our recruiting personnel, methodology, and approach may need to be altered to address a changing candidate pool and profile. We may not be able to identify or implement such changes in a timely manner. If we fail to attract new personnel or fail to retain and motivate our current personnel, our business could be harmed.

Many of the companies with which we compete for experienced personnel have greater resources than we have, and some of these companies may offer more attractive compensation packages. Particularly in the San Francisco Bay Area, job candidates and existing employees carefully consider the value of the equity awards they receive in connection with their employment. If the perceived value of our equity awards declines, or if the mix of equity and cash compensation that we offer is unattractive, it may adversely affect our ability to recruit and retain highly skilled employees. Job candidates may also be threatened with legal action under agreements with their existing employers if we attempt to hire them, which could impact hiring and result in a diversion of our time and resources. Additionally, laws and regulations, such as restrictive immigration laws, may limit our ability to recruit internationally. We must also continue to retain and motivate existing employees through our compensation practices, company culture, and career development opportunities. If we fail to attract new personnel or to retain our current personnel, our business would be harmed.

We believe that a critical component to our success and our ability to retain our best people is our culture. As we continue to grow and develop a public company infrastructure, we may find it difficult to maintain our happiness-centric company culture. Transparency is also an important part of our culture, and one that we practice every day. As we continue to grow, maintaining this culture of transparency will present its own challenges that we will need to address, including the type of information and level of detail that we share with our employees.

In addition, following our initial public offering, many of our employees are now able to receive significant proceeds from sales of our equity in the public markets, which may reduce their motivation to continue to work for us. Moreover, this liquidity could create disparities in wealth among our employees, which may harm our culture and relations among employees and our business.

We are continuing to expand our operations outside the United States, where we may be subject to increased business and economic risks that could harm our business.

Our platform addresses the communications needs of users worldwide, and we see international expansion as a major opportunity. Our revenue from APAC and EMEA collectively represented 25% and 20% of our total revenue for the three months ended April 30, 2020 and 2019, respectively. We plan to add local sales support in further select international markets over time. Our customers include multinational corporations with global users, and we expect to continue to expand our

international operations, which may include opening offices in new jurisdictions and providing our platform in additional languages to support the needs of these multinational corporations. Any new markets or countries into which we attempt to allow users to access our services or sell subscriptions to our platform may not be receptive. For example, if we are not able to satisfy certain government- and industry-specific requirements, we may experience service outages or other adverse consequences which would impair our ability to expand further into certain markets. In addition, our ability to manage our business and conduct our operations internationally in the future may require considerable management attention and resources and is subject to the particular challenges of supporting a rapidly growing business in an environment of multiple languages, cultures, customs, legal and regulatory systems, alternative dispute systems, and commercial markets. Future international expansion will require investment of significant funds and other resources. We also face risks related to recruiting and retaining talented and capable employees outside the United States, including complying with complex employment- and compensation-related laws, regulations and practices in these international jurisdictions, and maintaining our company culture across all of our offices. We may also be unable to grant equity compensation to employees in certain countries outside of the United States due to the complexities of local laws and regulations. This may require us to offer equally compelling alternatives to supplement our compensation, such as long-term cash compensation plans or increased short-term cash compensation, in order to continue to attract and retain employees in these jurisdictions.

Operating internationally subjects us to new risks and may increase risks that we currently face, including risks associated with:

- providing our platform and operating our business across a significant distance, in different languages and among different cultures, including the potential need to modify our platform and features to ensure that they are culturally appropriate and relevant in different countries;
- compliance with applicable international laws and regulations, including laws and regulations with respect to privacy, information security, telecommunications requirements, data protection, consumer protection and unsolicited email, and the risk of penalties to us and individual members of management or employees if our practices are deemed to be out of compliance;
- management of an employee base in jurisdictions that may not give us the same employment and retention flexibility as does the United States;
- operating in jurisdictions that do not protect intellectual property rights to the same extent as does the United States and the practical enforcement of such intellectual property rights outside of the United States;
- foreign government interference with our non-core intellectual property that resides outside of the United States, such as the risk of changes in foreign laws that could restrict our ability to use our intellectual property outside of the foreign jurisdiction in which we developed it;
- integration with partners outside of the United States;
- compliance by us and our business partners with anti-corruption laws, import and export control laws, tariffs, trade barriers, economic sanctions, and other regulatory limitations on our ability to provide our platform in certain international markets;
- foreign exchange controls that might require significant lead time in setting up operations in certain geographic territories and might prevent us from repatriating cash earned outside the United States;
- political and economic instability, including as a result of the United Kingdom's ("U.K.") withdrawal from the European Union ("EU"), and other political tensions between countries in which we do business;
- changes in diplomatic and trade relationships, including the imposition of new trade restrictions, trade protection measures, import or export requirements, trade embargoes, and other trade barriers;
- generally longer payment cycles and greater difficulty in collecting accounts receivable, a risk that may increase as a result of the impact of COVID-19 on our customers' ability to pay for our service on a timely basis;
- double taxation of our international earnings and potentially adverse tax consequences due to changes in the income and other tax laws of the United States or the international jurisdictions in which we operate, including the imposition of digital services taxes; and
- higher costs of doing business internationally, including increased accounting, travel, infrastructure, and legal compliance costs.

Compliance with laws and regulations applicable to our global operations substantially increases our cost of doing business in international jurisdictions. We may be unable to keep current with changes in laws and regulations as they occur. Although we have implemented policies and procedures designed to support compliance with these laws and regulations, there

can be no assurance that we will always maintain compliance or that all of our employees, contractors, partners, and agents will comply. Any violations could result in enforcement actions, fines, civil and criminal penalties, damages, injunctions, or reputational harm. If we are unable to comply with these laws and regulations or manage the complexity of our global operations successfully, we may need to relocate or cease operations in certain foreign jurisdictions. For example, while our engineering team is headquartered in the United States, we employ a product development team that has a relatively significant footprint in China today, where personnel costs are less expensive than in many other geographies. This product development team carries out the design and architecture decisions made by our U.S. engineering team. In May 2020, we announced the opening of two new research and development centers in Phoenix, Arizona and Pittsburgh, Pennsylvania. As a result of this expansion, we could experience, among other things, higher operating expenses, which would adversely impact our operating margins and harm our business.

Changes in government trade policies, including the imposition of tariffs and export restrictions, could limit our ability to sell our products to certain customers, which may materially adversely affect our sales and results of operations.

The U.S. or foreign governments may take administrative, legislative, or regulatory action that could materially interfere with our ability to sell products in certain countries, particularly in China. For example, the current U.S. Administration has threatened tougher trade terms with China and other countries, leading to the imposition, or announcement of future imposition, of substantially higher U.S. Section 301 tariffs on roughly \$500 billion of imports from China. In response, China imposed or proposed new or higher tariffs on U.S. products. While the imposition of these tariffs did not have a direct, material adverse impact on our business during the three months ended April 30, 2020, the direct and indirect effects of tariffs and other restrictive trade policies are difficult to measure and are only one part of a larger U.S./China economic and trade policy disagreement. The effects of the recently imposed and proposed tariffs are uncertain because of the dynamic nature of governmental action and responses. Sustained uncertainty about, or worsening of, current global economic conditions and further escalation of trade tensions between the United States and its trading partners, especially China, could result in a global economic slowdown and long-term changes to global trade, including retaliatory trade restrictions that restrict our ability to operate in China. We cannot predict what actions may ultimately be taken with respect to tariffs or trade relations between the United States and China or other countries, what products may be subject to such actions, or what actions may be taken by the other countries in retaliation. Any further deterioration in the relations between the United States and China could exacerbate these actions and other governmental intervention. Any alterations to our business strategy or operations made in order to adapt to or comply with any such changes would be time-consuming and expensive, and certain of our competitors may be better suited to withstand or react to these changes.

Further, in May 2019, President Trump issued an executive order that invoked national emergency economic powers to implement a framework to regulate the acquisition or transfer of information communications technology in transactions that imposed undue national security risks. The executive order is subject to implementation by the Secretary of Commerce and applies to contracts entered into prior to the effective date of the order. In addition, the U.S. Commerce Department has implemented additional restrictions and may implement further restrictions that would affect conducting business with certain Chinese companies. Due to the uncertainty regarding the timing, content, and extent of any such changes in policy, we cannot assure you that we will successfully mitigate any negative impact. Depending upon their duration and implementation, these tariffs, the executive order and its implementation, and other regulatory actions could materially affect our business, including in the form of increased cost of revenue, decreased margins, increased pricing for customers, and reduced sales.

We recognize revenue from subscriptions to our platform over the terms of these subscriptions. Consequently, increases or decreases in new sales may not be immediately reflected in our results of operations and may be difficult to discern.

We recognize revenue from subscriptions to our platform over the terms of these subscriptions. As a result, a portion of the revenue we report in each quarter is derived from the recognition of deferred revenue relating to subscriptions entered into during previous quarters. Consequently, a decline in new or renewed subscriptions in any single quarter may have an immaterial impact on the revenue that we recognize for that quarter. However, such a decline will negatively affect our revenue in future quarters. Accordingly, the effect of significant downturns in sales and potential changes in our pricing policies or rate of customer expansion or retention may not be fully reflected in our results of operations until future periods. In addition, a significant portion of our costs is expensed as incurred, while revenue is recognized over the term of the subscription. As a result, growth in the number of new customers and hosts could continue to result in our recognition of higher costs and lower revenue in the earlier periods of our subscriptions. Finally, our subscription-based revenue model also makes it difficult for us to rapidly increase our revenue through additional sales in any period, as revenue from new customers or from existing customers that increase their use of our platform or upgrade to a higher-priced tier of Zoom Meeting plan must be recognized over the applicable subscription term.

Any failure to offer high-quality support for our customers and hosts may harm our relationships with our customers and hosts and, consequently, our business.

We have designed our platform to be easy to adopt and use with minimal to no support necessary. However, if we experience increased user demand for support, we may face increased costs that may harm our results of operations. Surging demand during the COVID-19 pandemic has required us to allocate additional resources to support our expanded user base, including many hosts and customers who are using our platform for the first time. In addition, as we continue to grow our operations and support our global user base, we need to be able to continue to provide efficient support that meets our customers and hosts' needs globally at scale. Customers and hosts receive additional support features, and the number of our hosts has grown significantly, which will put additional pressure on our support organization. If we are unable to provide efficient user support globally at scale or if we need to hire additional support personnel, including as a result of increased demand during the COVID-19 pandemic, our business may be harmed. Our new customer and host signups are highly dependent on our business reputation and on positive recommendations from our existing customers and hosts. Any failure to maintain high-quality support, or a market perception that we do not maintain high-quality support for our customers and hosts, would harm our business.

Our results of operations may be harmed if we are required to collect sales or other related taxes for our subscription services in jurisdictions where we have not historically done so.

We collect sales tax in a number of jurisdictions. One or more states or countries may seek to impose incremental or new sales, use, or other tax collection obligations on us. A successful assertion by a state, country, or other jurisdiction that we should have been or should be collecting additional sales, use, or other taxes could, among other things, result in substantial tax payments, create significant administrative burdens for us, discourage potential customers from subscribing to our platform due to the incremental cost of any such sales or other related taxes, or otherwise harm our business.

We may be subject to liabilities on past sales for taxes, surcharges, and fees.

We currently collect and remit applicable sales tax in jurisdictions where we, through our employees, have a presence and where we have determined, based on legal precedents in the jurisdiction, that sales of our platform are classified as taxable. We do not currently collect and remit other state and local excise, utility user and ad valorem taxes, fees, or surcharges that may apply to our customers and hosts. We believe that we are not otherwise subject to, or required to collect, any additional taxes, fees, or surcharges imposed by state and local jurisdictions because we do not have a sufficient physical presence or "nexus" in the relevant taxing jurisdiction or such taxes, fees, or surcharges do not apply to sales of our platform in the relevant taxing jurisdiction. However, there is uncertainty as to what constitutes sufficient physical presence or nexus for a state or local jurisdiction to levy taxes, fees, and surcharges for sales made over the internet, and there is also uncertainty as to whether our characterization of our platform as not taxable in certain jurisdictions will be accepted by state and local taxing authorities. Additionally, we have not historically collected value-added tax ("VAT") or goods and services tax ("GST") on sales of our platform because we make all of our sales through our office in the United States, and we believe, based on information provided to us by our customers, that most of our sales are made to business customers.

Taxing authorities may challenge our position that we do not have sufficient nexus in a taxing jurisdiction or that our platform is not taxable in the jurisdiction and may decide to audit our business and operations with respect to sales, use, telecommunications, VAT, GST, and other taxes, which could result in increased tax liabilities for us or our customers and hosts, which could harm our business.

The application of indirect taxes (such as sales and use tax, VAT, GST, business tax, and gross receipts tax) to businesses that transact online, such as ours, is a complex and evolving area. Following the recent U.S. Supreme Court decision in *South Dakota v. Wayfair, Inc.*, states are now free to levy taxes on sales of goods and services based on an "economic nexus," regardless of whether the seller has a physical presence in the state. As a result, it may be necessary to reevaluate whether our activities give rise to sales, use, and other indirect taxes as a result of any nexus in those states in which we are not currently registered to collect and remit taxes. Additionally, we may need to assess our potential tax collection and remittance liabilities based on existing economic nexus laws' dollar and transaction thresholds. We continue to analyze our exposure for such taxes and liabilities and have accrued \$38.3 million and \$34.0 million as of April 30, 2020, and January 31, 2020, respectively, for loss contingencies resulting from these potential taxes and liabilities. The application of existing, new, or future laws, whether in the United States or internationally, could harm our business. There have been, and will continue to be, substantial ongoing costs associated with complying with the various indirect tax requirements in the numerous markets in which we conduct or will conduct business.

We are subject to governmental export and import controls that could impair our ability to compete in international markets due to licensing requirements and subject us to liability if we are not in compliance with applicable laws.

Our platform and associated products are subject to various restrictions under U.S. export control and sanctions laws and regulations, including the U.S. Department of Commerce's Export Administration Regulations ("EAR") and various economic and trade sanctions regulations administered by the U.S. Department of the Treasury's Office of Foreign Assets Control ("OFAC"). The U.S. export control laws and U.S. economic sanctions laws include restrictions or prohibitions on the sale or supply of certain products and services to U.S.-embargoed or U.S.-sanctioned countries, governments, persons, and entities, and also require authorization for the export of certain encryption items. In addition, various countries regulate the import of certain encryption technology, including through import permitting and licensing requirements and have enacted or could enact laws that could limit our ability to distribute our platform or could limit our hosts' ability to implement our platform in those countries.

Although we have taken precautions to prevent our platform and associated products from being accessed or used in violation of such laws, we have inadvertently allowed our platform and associated products to be accessed or used by some customers in apparent violation of U.S. economic sanction laws. In addition, we may have inadvertently made our software products available to some customers, including users in embargoed or sanctioned countries, in apparent violation of the EAR. As a result, we submitted initial and final voluntary self-disclosures concerning potential violations of U.S. sanctions and export control laws and regulations to OFAC and the U.S. Department of Commerce's Bureau of Industry and Security ("BIS").

In June 2019, OFAC and BIS issued us warning letters as their final enforcement responses to these potential violations, but no fines or penalties were assessed. If we are found to be in violation of U.S. economic sanctions or export control laws in the future, it could result in fines and penalties. We may also be adversely affected through other penalties, reputational harm, loss of access to certain markets, or otherwise. While we are working to implement additional controls designed to prevent similar activity from occurring in the future, these controls may not be fully effective.

Changes in our platform, or changes in export, sanctions, and import laws, may delay the introduction and sale of subscriptions to our platform in international markets; prevent our customers with international operations from using our platform; or, in some cases, prevent the access or use of our platform to and from certain countries, governments, persons, or entities altogether. Further, any change in export or import regulations, economic sanctions or related laws, shift in the enforcement or scope of existing regulations or change in the countries, governments, persons, or technologies targeted by such regulations could result in decreased use of our platform or in our decreased ability to export or sell our platform to existing or potential customers with international operations. Any decreased use of our platform or limitation on our ability to export or sell our platform would likely harm our business.

We utilize our network of resellers to sell our products and services, and our failure to effectively develop, manage, and maintain our indirect sales channels would harm our business.

Our future success depends on our continued ability to establish and maintain a network of channel relationships, and we expect that we will need to maintain and expand our network as we expand into international markets. A small portion of our revenue is derived from our network of sales agents and resellers, which we refer to collectively as resellers, many of which sell or may in the future decide to sell their own products and services or services from other communications solutions providers. Loss of or reduction in sales through these third parties could reduce our revenue. Our competitors may in some cases be effective in causing our reseller or potential reseller to favor their products and services or prevent or reduce sales of our products and services. Recruiting and retaining qualified resellers in our network and training them in our technology and product offerings requires significant time and resources. If we decide to further develop and expand our indirect sales channels, we must continue to scale and improve our processes and procedures to support these channels, including investment in systems and training. Many resellers may not be willing to invest the time and resources required to train their staff to effectively sell our platform. If we fail to maintain relationships with our resellers, fail to develop relationships with new resellers in new markets, or expand the number of resellers in existing markets or fail to manage, train, or provide appropriate incentives to our existing resellers, our ability to increase the number of new customers and hosts and increase sales to existing customers could be adversely impacted, which would harm our business.

Our results of operations, which are reported in U.S. dollars, could be adversely affected if currency exchange rates fluctuate substantially in the future.

We sell to customers globally and have international operations primarily in Australia, China, and the U.K. As we continue to expand our international operations, we will become more exposed to the effects of fluctuations in currency exchange rates. Although the majority of our cash generated from revenue is denominated in U.S. dollars, a small amount is denominated in foreign currencies, and our expenses are generally denominated in the currencies of the jurisdictions in which we conduct our operations. For the three months ended April 30, 2020 and 2019, 14.9% and 8.3% of our revenue, respectively, and 13.1% and 16.0% of our expenses, respectively, were denominated in currencies other than U.S. dollars. Because we conduct business in currencies other than U.S. dollars but report our results of operations in U.S. dollars, we also face remeasurement exposure to fluctuations in currency exchange rates, which could hinder our ability to predict our future results.

and earnings and could materially impact our results of operations. We do not currently maintain a program to hedge exposures to non-U.S. dollar currencies.

Our sales to government entities are subject to a number of additional challenges and risks.

We expect to increase our sales to U.S. federal and state and foreign governmental agency customers. For example, we announced in May 2019 that we received authorization under the U.S. Federal Risk and Authorization Management Program (“FedRAMP”) that allows U.S. federal government agencies and contractors to securely use our Zoom for Government offering. The additional risks and challenges associated with doing business with governmental entities include, but are not limited to, the following:

- selling to governmental entities can be more competitive, expensive, and time-consuming than selling to private entities, often requiring significant up-front time and expense without any assurance that these efforts will generate a sale;
- government certification requirements may change, or we may be unable to achieve or sustain one or more government certifications, including FedRAMP, and in doing so restrict our ability to sell into the government sector until we have attained such certificates;
- governmental entities may have significant leverage in negotiations, thereby enabling such entities to demand contract terms that differ from what we generally agree to in our standard agreements, including, for example, most-favored-nation clauses; and
- government demand and payment for our products may be influenced by public sector budgetary cycles and funding authorizations, with funding reductions or delays having an adverse impact on public sector demand for our products.

To the extent that we become more reliant on contracts with government entities in the future, our exposure to such risks and challenges could increase, which in turn could adversely impact our business.

Our current products, as well as products, features, and functionality that we may introduce in the future, may not be widely accepted by our customers and hosts or may receive negative attention or may require us to compensate or reimburse third parties, any of which may lower our margins and harm our business.

Our ability to engage, retain, and increase our base of customers and hosts and to increase our revenue will depend on our ability to successfully create new products, features, and functionality, both independently and together with third parties. We may introduce significant changes to our existing products or develop and introduce new and unproven products, including technologies with which we have little or no prior development or operating experience. These new products and updates may fail to engage, retain, and increase our base of customers and hosts or may create lag in adoption of such new products. New products may initially suffer from performance and quality issues that may negatively impact our ability to market and sell such products to new and existing customers and hosts. The short- and long-term impact of any major change to our products, or the introduction of new products, is particularly difficult to predict. If new or enhanced products fail to engage, retain, and increase our base of customers and hosts, we may fail to generate sufficient revenue, operating margin, or other value to justify our investments in such products, any of which may harm our business in the short term, long term, or both. In addition, our current products, as well as products, features, and functionality that we may introduce in the future, may require us to compensate or reimburse third parties. For example, our new cloud phone system, Zoom Phone, is a PBX phone solution that requires us to compensate carriers that operate the PSTN. As a result, a portion of the payments that we will receive from customers that will use our Zoom Phone product will be allocated towards compensating these telephone carriers, which lowers our margins for Zoom Phone as compared to our other products. In addition, new products that we introduce in the future may similarly require us to compensate or reimburse third parties, all of which would lower our profit margins for any such new products. If this trend continues with our new and existing products, including Zoom Phone, it could harm our business.

Estimates of our market opportunity and forecasts of market growth may prove to be inaccurate, and even if the market in which we compete achieves the forecasted growth, our business could fail to grow at similar rates, if at all.

Market opportunity estimates and growth forecasts for the markets in which we compete, including those we have generated ourselves, are subject to significant uncertainty and are based on assumptions and estimates that may not prove to be accurate. Not every organization covered by our market opportunity estimates will necessarily buy video communications platforms, and some or many of those organizations may choose to continue using legacy communication methods or point solutions offered by our competitors. It is impossible to build every product feature that every customer or host wants, and our competitors may develop and offer features that our platform does not provide. The variables that go into the calculation of our market opportunity are subject to change over time, and there is no guarantee that any particular number or percentage of the organizations covered by our market opportunity estimates will purchase our solutions at all or generate any particular level of

revenue for us. Even if the markets in which we compete meet the size estimates and growth forecasts, our business could fail to grow for a variety of reasons outside of our control, including competition in our industry. If any of these risks materializes, it could harm our business and prospects.

We may be subject to, or assist law enforcement with enforcement of, a variety of U.S. and international laws that could result in claims, increase the cost of operations or otherwise harm our business due to changes in the laws, changes in the interpretations of the laws, greater enforcement of the laws, or investigations into compliance with the laws.

We may be subject to, or assist law enforcement with enforcement of, various laws, including those covering copyright, indecent content, child protection, consumer protection, telecommunications services, taxation, and similar matters. There have been instances where improper or illegal content has been shared on our platform without our knowledge. As a service provider and as a matter of policy, we do not monitor user meetings. However, to ensure user safety and prevent conduct that is illegal, violent or harmful to others, we enforce our terms of service through use of a mix of tools that suggest when such activity may be occurring on our platform. We also recently created an in-product security feature that allows the host or co-host of a meeting to easily select a meeting participant that may be engaging in illegal or harmful behavior and send a report about that behavior to our trust and safety team for evaluation. Our trust and safety team may take further action as appropriate, including suspension or termination of the participant's account or referral to law enforcement. While to date we have not been subject to material legal or administrative actions as a result of improper or illegal content, the laws in this area are currently in a state of flux and vary widely between jurisdictions. Accordingly, it may be possible that in the future we and our competitors may be subject to legal actions along with the users who shared such content. In addition, regardless of any legal liability we may face, our reputation could be harmed should there be an incident generating extensive negative publicity about the content shared on our platform. Such publicity would harm our business.

We are also subject to consumer protection laws that may affect our sales and marketing efforts, including laws related to subscriptions, billing, and auto-renewal. These laws, as well as any changes in these laws, could adversely affect our self-serve model and make it more difficult for us to retain and upgrade customers and attract new customers and hosts. Additionally, we have in the past, are currently, and may from time to time in the future become the subject of inquiries and other actions by regulatory authorities as a result of our business practices, including our subscription, billing, and auto-renewal policies. Consumer protection laws may be interpreted or applied by regulatory authorities in a manner that could require us to make changes to our operations or incur fines, penalties, or settlement expenses, which may result in harm to our business.

Our platform depends on the ability of our customers, hosts, and users to access the internet, and our platform has been blocked or restricted in some countries for various reasons. If we fail to anticipate developments in the law, or fail for any reason to comply with relevant law, our platform could be further blocked or restricted, and we could be exposed to significant liability that could harm our business.

We are also subject to various U.S. and international anti-corruption laws, such as the U.S. Foreign Corrupt Practices Act of 1977, amended, and the U.K. Bribery Act 2010, as well as other similar anti-bribery and anti-kickback laws and regulations. These laws and regulations generally prohibit companies and their employees and intermediaries from authorizing, offering, or providing improper payments or benefits to government officials and other recipients for improper purposes. Although we take precautions to prevent violations of these laws, our exposure for violating these laws increases as we continue to expand our international presence, and any failure to comply with such laws could harm our business.

Zoom Phone is subject to U.S. federal and international regulation, and other products we may introduce in the future may also be subject to U.S. federal, state, or international laws, rules, and regulations. Any failure to comply with such laws, rules, and regulations could harm our business and expose us to liability.

Federal Regulation

Zoom Phone is provided through our wholly owned subsidiary, Zoom Voice Communications, Inc., which is regulated by the FCC as an interconnected voice over internet protocol (“VoIP”) service provider. As a result, Zoom Phone is subject to existing or potential FCC regulations, including, but not limited to, regulations relating to privacy, disability access, porting of numbers, federal Universal Service Fund (“USF”), contributions and other regulatory assessments, emergency calling/Enhanced 911 (“E-911”), and law enforcement access. Congress or the FCC may expand the scope of Zoom Phone’s regulatory obligations at any time. In addition, FCC classification of Zoom Phone as a common carrier or telecommunications service could result in additional federal and state regulatory obligations. If we do not comply with any current or future state regulations that apply to our business, we could be subject to substantial fines and penalties, we may have to restructure our product offerings, exit certain markets, or raise the price of our products, any of which could ultimately harm our business and results of operations. Any enforcement action by the FCC, which may be a public process, would hurt our reputation in the industry, possibly impair our ability to sell Zoom Phone to our customers and harm our business.

State Regulation

State telecommunications regulation of Zoom Phone is generally preempted by the FCC. However, states are allowed to assess state USF contributions, E-911 fees, and other surcharges. A number of states require us to contribute to state USF and pay E-911 and other assessments and surcharges, while others are actively considering extending their programs to include the products we offer. We generally pass USF, E-911 fees, and other surcharges through to our customers where we are permitted to do so, which may result in our products becoming more expensive. We expect that state public utility commissions will continue their attempts to apply state telecommunications regulations to services like Zoom Phone. If we do not comply with any current or future state regulations that apply to our business, we could be subject to substantial fines and penalties, we may have to restructure our product offerings, exit certain markets, or raise the price of our products, any of which could harm our business.

International Regulation

As we expand internationally, we may be subject to telecommunications, consumer protection, privacy, data protection, and other laws and regulations in the foreign countries where we offer our products. If we do not comply with any current or future international regulations that apply to our business, we could be subject to substantial fines and penalties, we may have to restructure our product offerings, exit certain markets, or raise the price of our products, any of which could harm our business.

We are currently, and may be in the future, party to intellectual property rights claims and other litigation matters, which, if resolved adversely, could harm our business.

We protect our intellectual property through patents, copyrights, trademarks, domain names, and trade secrets and, from time to time, are subject to litigation based on allegations of infringement, misappropriation, or other violations of intellectual property or other rights. Some companies, including some of our competitors, own large numbers of patents, copyrights, and trademarks, which they may use to assert claims against us. As we face increasing competition and gain an increasingly high profile, the possibility of intellectual property rights claims, commercial claims, and other assertions against us grows. We have in the past been, are currently, and may from time to time in the future become, a party to litigation and disputes related to our intellectual property, our business practices, and our platform. While we intend to defend these lawsuits vigorously and believe that we have valid defenses to these claims, litigation can be costly and time consuming, divert the attention of our management and key personnel from our business operations and dissuade potential customers from subscribing to our services, which would harm our business. Furthermore, with respect to these lawsuits, there can be no assurances that favorable outcomes will be obtained. We may need to settle litigation and disputes on terms that are unfavorable to us, or we may be subject to an unfavorable judgment that may not be reversible upon appeal. The terms of any settlement or judgment may require us to cease some or all of our operations or pay substantial amounts to the other party. In addition, our agreements with certain larger customers include certain provisions for indemnifying them against liabilities if our services infringe a third party's intellectual property rights, which could require us to make payments to our customers. During the course of any litigation or dispute, we may make announcements regarding the results of hearings and motions and other interim developments. If securities analysts and investors regard these announcements as negative, the market price of our Class A common stock may decline. With respect to any intellectual property rights claim, we may have to seek a license to continue practices found to be in violation of third-party rights, which may not be available on reasonable terms and may significantly increase our operating expenses. A license to continue such practices may not be available to us at all, and we may be required to develop alternative non-infringing technology or practices or discontinue the practices. The development of alternative, non-infringing technology or practices could require significant effort and expense. Our business could be harmed as a result.

Our failure to protect our intellectual property rights and proprietary information could diminish our brand and other intangible assets.

We primarily rely and expect to continue to rely on a combination of patent, patent licenses, trade secret and domain name protection, trademark and copyright laws, as well as confidentiality and license agreements with our employees, consultants, and third parties, to protect our intellectual property and proprietary rights. We make business decisions about when to seek patent protection for a particular technology and when to rely upon copyright or trade secret protection, and the approach we select may ultimately prove to be inadequate. Even in cases where we seek patent protection, there is no assurance that the resulting patents will effectively protect every significant feature of our products. In addition, we believe that the protection of our trademark rights is an important factor in product recognition, protecting our brand and maintaining goodwill. If we do not adequately protect our rights in our trademarks from infringement and unauthorized use, any goodwill that we have developed in those trademarks could be lost or impaired, which could harm our brand and our business. Third parties may knowingly or unknowingly infringe our proprietary rights; third parties may challenge our proprietary right; pending and future patent, trademark, and copyright applications may not be approved; and we may not be able to prevent infringement without incurring substantial expense. We have also devoted substantial resources to the development of our proprietary technologies and related processes. In order to protect our proprietary technologies and processes, we rely in part on trade secret laws and

confidentiality agreements with our employees, consultants, and third parties. These agreements may not effectively prevent disclosure of confidential information and may not provide an adequate remedy in the event of unauthorized disclosure of confidential information. In addition, others may independently discover our trade secrets, in which case we would not be able to assert trade secret rights, or develop similar technologies and processes. Further, the laws of certain foreign countries do not provide the same level of protection of corporate proprietary information and assets such as intellectual property, trademarks, trade secrets, know-how, and records, as the laws of the United States. For instance, the legal systems of certain countries, particularly certain developing countries, do not favor the enforcement of patents and other intellectual property protection. As a result, we may encounter significant problems in protecting and defending our intellectual property or proprietary rights abroad. Additionally, we may also be exposed to material risks of theft or unauthorized reverse engineering of our proprietary information and other intellectual property, including technical data, manufacturing processes, data sets, or other sensitive information. Our efforts to enforce our intellectual property rights in such foreign countries may be inadequate to obtain a significant commercial advantage from the intellectual property that we develop, which could have a material adverse effect on our business, financial condition, and results of operations. Costly and time-consuming litigation could be necessary to enforce and determine the scope of our proprietary rights. If the protection of our proprietary rights is inadequate to prevent use or appropriation by third parties, the value of our platform, brand, and other intangible assets may be diminished, and competitors may be able to more effectively replicate our platform and its features. Any of these events would harm our business.

If we experience excessive fraudulent activity or cannot meet evolving credit card association merchant standards, we could incur substantial costs and lose the right to accept credit cards for payment, which could cause our customer and paid host base to decline significantly.

A large portion of our customers authorize us to bill their credit card accounts directly for our products. If customers pay for their subscriptions with stolen credit cards, we could incur substantial third-party vendor costs for which we may not be reimbursed. Further, our customers provide us with credit card billing information online or over the phone, and we do not review the physical credit cards used in these transactions, which increases our risk of exposure to fraudulent activity. We also incur charges, which we refer to as chargebacks, from the credit card companies for claims that the customer did not authorize the credit card transaction for our products, something that we have experienced in the past. If the number of claims of unauthorized credit card transactions becomes excessive, we could be assessed substantial fines for excess chargebacks, and we could lose the right to accept credit cards for payment. In addition, credit card issuers may change merchant standards, including data protection and documentation standards, required to utilize their services from time to time. If we fail to maintain compliance with current merchant standards or fail to meet new standards, the credit card associations could fine us or terminate their agreements with us, and we would be unable to accept credit cards as payment for our products. Our products may also be subject to fraudulent usage and schemes, including third parties accessing customer accounts or viewing and recording data from our communications solutions. These fraudulent activities can result in unauthorized access to customer accounts and data, unauthorized use of our products, and charges and expenses to customers for fraudulent usage. We may be required to pay for these charges and expenses with no reimbursement from the customer, and our reputation may be harmed if our products are subject to fraudulent usage. Although we implement multiple fraud prevention and detection controls, we cannot assure you that these controls will be adequate to protect against fraud. Substantial losses due to fraud or our inability to accept credit card payments would cause our customer base to significantly decrease and would harm our business.

Our business could be disrupted by catastrophic events.

Occurrence of any catastrophic event, including earthquake, fire, flood, tsunami or other weather event, power loss, telecommunications failure, software or hardware malfunctions, cyber-attack, war, terrorist attack, disease, or health epidemics, could result in lengthy interruptions in our service. In particular, our U.S. headquarters and some of the data centers we utilize are located in the San Francisco Bay Area, a region known for seismic activity, and our insurance coverage may not compensate us for losses that may occur in the event of an earthquake or other significant natural disaster. In addition, acts of terrorism could cause disruptions to the internet or the economy as a whole. Even with our disaster recovery arrangements, our service could be interrupted. Moreover, if our systems were to fail or be negatively impacted as a result of a natural disaster or other event, our ability to deliver products to our users would be impaired, or we could lose critical data. If we are unable to develop adequate plans to ensure that our business functions continue to operate during and after a disaster and to execute successfully on those plans in the event of a disaster or emergency, our business would be harmed.

We also face risks related to health epidemics, such as the COVID-19 pandemic, which has impacted virtually every country in the world. An outbreak of a contagious disease, and other adverse health developments could have an adverse effect on global economic conditions and on our business. The effects could include business and service disruptions, such as the temporary closure of our facilities, restrictions on our employees' ability to travel to support our facilities and services, and difficulties in hiring new employees. We have removed the 40-minute time limit from our free Basic accounts for customers in K-12 schools in certain countries. While we have seen increased usage of our service globally, a significant portion of such increase is attributable to free Basic accounts, which do not generate any revenue. We cannot make any assurances that we will

experience an increase in paying customers or that new or existing users will continue to utilize our services at the same levels after the outbreak has tapered. Furthermore, such increased usage by free Basic account users during this time has required and will continue to require us to expand our network capacity which will increase our operating costs.

We may have exposure to greater than anticipated tax liabilities, which could harm our business.

While to date we have not incurred significant income taxes in operating our business, we are subject to income taxes in the United States and various jurisdictions outside of the United States. Our effective tax rate could fluctuate due to changes in the proportion of our earnings and losses in countries with differing statutory tax rates. Our tax expense could also be impacted by changes in non-deductible expenses; changes in excess tax benefits of stock-based compensation expense; changes in the valuation of, or our ability to use, deferred tax assets and liabilities; the applicability of withholding taxes and effects from acquisitions.

The provision for taxes on our condensed consolidated financial statements could also be impacted by changes in accounting principles; changes in U.S. federal, state, or international tax laws applicable to corporate multinationals, such as the recent legislation enacted in the United States, other fundamental changes in law currently being considered by many countries; and changes in taxing jurisdictions' administrative interpretations, decisions, policies, and positions. Further, the Organization for Economic Co-operation and Development ("OECD") and the Inclusive Framework of G20 and other countries have issued proposals related to the taxation of the digital economy. In addition, several countries including France, Turkey, and India have proposed or enacted Digital Services Taxes ("DST"), many of which would apply to revenues derived from digital services. Future developments related to such proposals, in particular any unilateral actions outside of the OECD's Inclusive Framework such as the imposition of DST rules, could have an adverse impact on our effective tax rate and/or harm our business by increasing our future tax obligations.

We are subject to review and audit by U.S. federal, state, local, and foreign tax authorities. Such tax authorities may disagree with tax positions we take, and if any such tax authority were to successfully challenge any such position, our business could be harmed. We may also be subject to additional tax liabilities due to changes in non-income-based taxes resulting from changes in federal, state, or international tax laws; changes in taxing jurisdictions' administrative interpretations, decisions, policies, and positions; results of tax examinations, settlements, or judicial decisions; changes in accounting principles, changes to our business operations, including acquisitions; as well as the evaluation of new information that results in a change to a tax position taken in a prior period.

Our ability to use our net operating loss carryforwards and certain other tax attributes may be limited.

As of January 31, 2020, we had \$148.0 million of U.S. federal and \$88.2 million of state net operating loss carryforwards available to reduce future taxable income, which will begin to expire in 2032 for federal and 2027 for state tax purposes. It is possible that we will not generate taxable income in time to use these net operating loss carryforwards before their expiration or at all. Under legislative changes made in December 2017, as modified by the federal tax law changes enacted in March 2020, U.S. federal net operating losses incurred in tax years beginning after December 31, 2017 and in future years may be carried forward indefinitely, but, for tax years beginning after December 31, 2020, the deductibility of such net operating losses is limited. In addition, the federal and state net operating loss carryforwards and certain tax credits may be subject to significant limitations under Section 382 and Section 383 of the Internal Revenue Code of 1986, as amended (the "Code"), respectively, and similar provisions of state law. Under those sections of the Code, if a corporation undergoes an "ownership change," the corporation's ability to use its pre-change net operating loss carryforwards and other pre-change attributes, such as research tax credits, to offset its post-change income or tax may be limited. In general, an "ownership change" will occur if there is a cumulative change in our ownership by "5-percent shareholders" that exceeds 50 percentage points over a rolling three-year period. Similar rules may apply under state tax laws. We have completed a Section 382 review and have determined that none of the operating losses will expire solely due to Section 382 limitation(s). However, we may experience ownership changes in the future as a result of future shifts in our stock ownership, some of which may be outside of our control. If an ownership change occurs and our ability to use our net operating loss carryforwards and tax credits is materially limited, it would harm our business by effectively increasing our future tax obligations.

Our reported results of operations may be adversely affected by changes in accounting principles generally accepted in the United States.

Generally accepted accounting principles in the United States are subject to interpretation by the FASB, the SEC, and various bodies formed to promulgate and interpret appropriate accounting principles. A change in these principles or interpretations could have a significant effect on our reported results of operations and may even affect the reporting of transactions completed before the announcement or effectiveness of a change. It is also difficult to predict the impact of future changes to accounting principles or our accounting policies, any of which could harm our business.

We may need additional capital, and we cannot be certain that additional financing will be available on favorable terms, or at all.

Historically, we have funded our operations and capital expenditures primarily through equity issuances and cash generated from our operations. Although we currently anticipate that our existing cash and cash equivalents and cash flow from operations will be sufficient to meet our cash needs for the foreseeable future, we may require additional financing. We evaluate financing opportunities from time to time, and our ability to obtain financing will depend, among other things, on our development efforts, business plans, operating performance, and condition of the capital markets at the time we seek financing. We cannot assure you that additional financing will be available to us on favorable terms when required, or at all. If we raise additional funds through the issuance of equity or equity-linked or debt securities, those securities may have rights, preferences, or privileges senior to the rights of our Class A common stock, and our stockholders may experience dilution.

Our use of third-party open source software could negatively affect our ability to offer and sell subscriptions to our platform and subject us to possible litigation.

We have incorporated, and may in the future incorporate, third-party open source software in our technologies. Open source software is generally licensed by its authors or other third parties under open source licenses. From time to time, companies that use third-party open source software have faced claims challenging the use of such open source software and requesting compliance with the open source software license terms. Accordingly, we may be subject to suits by parties claiming ownership of what we believe to be open source software or claiming non-compliance with the applicable open source licensing terms. Some open source software licenses require end-users who use, distribute or make available across a network software and services that include open source software to offer aspects of the technology that incorporates the open source software for no cost. We may also be required to make publicly available source code (which in some circumstances could include valuable proprietary code) for modifications or derivative works we create based upon incorporating or using the open source software and/or to license such modifications or derivative works under the terms of the particular open source license. Additionally, if a third-party software provider has incorporated open source software into software that we license from such provider, we could be required to disclose any of our source code that incorporates or is a modification of our licensed software. While we use tools designed to help us monitor and comply with the licenses of third-party open source software and protect our valuable proprietary source code, we may inadvertently use third-party open source software in a manner that exposes us to claims of non-compliance with the terms of their licenses, including claims of intellectual property rights infringement or for breach of contract. Furthermore, there exists today an increasing number of types of open source software licenses, almost none of which have been tested in courts of law to provide guidance of their proper legal interpretations. If we were to receive a claim of non-compliance with the terms of any of these open source licenses, we may be required to publicly release certain portions of our proprietary source code. We could also be required to expend substantial time and resources to re-engineer some of our software. Any of the foregoing could disrupt and harm our business.

In addition, the use of third-party open source software typically exposes us to greater risks than the use of third-party commercial software because open source licensors generally do not provide warranties or controls on the functionality or origin of the software. Use of open source software may also present additional security risks because the public availability of such software may make it easier for hackers and other third parties to determine how to compromise our platform. Any of the foregoing could harm our business and could help our competitors develop products and services that are similar to or better than ours.

If we fail to maintain an effective system of disclosure controls and internal control over financial reporting, our ability to produce timely and accurate condensed consolidated financial statements or comply with applicable regulations could be impaired.

We are subject to the reporting requirements of the Exchange Act, the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act") and the rules and regulations of the applicable listing standards of The Nasdaq Stock Market. We expect that the requirements of these rules and regulations will continue to increase our legal, accounting, and financial compliance costs; make some activities more difficult, time-consuming, and costly; and place significant strain on our personnel, systems, and resources.

The Sarbanes-Oxley Act requires, among other things, that we maintain effective disclosure controls and procedures and internal control over financial reporting. We are continuing to develop and refine our disclosure controls and other procedures that are designed to ensure that information required to be disclosed by us in the reports that we will file with the SEC is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms and that information required to be disclosed in reports under the Exchange Act is accumulated and communicated to our principal executive and financial officers. We are also continuing to improve our internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, we have

expended, and anticipate that we will continue to expend, significant resources, including accounting-related costs and significant management oversight.

Our current controls and any new controls that we develop may become inadequate because of changes in conditions in our business. In addition, changes in accounting principles or interpretations could also challenge our internal controls and require that we establish new business processes, systems, and controls to accommodate such changes. We have limited experience with implementing the systems and controls that will be necessary to operate as a public company, as well as adopting changes in accounting principles or interpretations mandated by the relevant regulatory bodies. Additionally, if these new systems, controls, or standards and the associated process changes do not give rise to the benefits that we expect or do not operate as intended, it could adversely affect our financial reporting systems and processes, our ability to produce timely and accurate financial reports, or the effectiveness of internal control over financial reporting. Moreover, our business may be harmed if we experience problems with any new systems and controls that result in delays in their implementation or increased costs to correct any post-implementation issues that may arise.

Further, weaknesses in our disclosure controls and internal control over financial reporting may be discovered in the future. Any failure to develop or maintain effective controls or any difficulties encountered in their implementation or improvement could harm our business or cause us to fail to meet our reporting obligations and may result in a restatement of our condensed consolidated financial statements for prior periods. Any failure to implement and maintain effective internal control over financial reporting also could adversely affect the results of periodic management evaluations and annual independent registered public accounting firm attestation reports regarding the effectiveness of our internal control over financial reporting that we will eventually be required to include in our periodic reports that will be filed with the SEC. Ineffective disclosure controls and procedures and internal control over financial reporting could also cause investors to lose confidence in our reported financial and other information, which would likely have a negative effect on the trading price of our Class A common stock. In addition, if we are unable to continue to meet these requirements, we may not be able to remain listed on The Nasdaq Stock Market. We will be required to provide an annual management report on the effectiveness of our internal control over financial reporting commencing with our next Annual Report on Form 10-K.

Our independent registered public accounting firm is not required to formally attest to the effectiveness of our internal control over financial reporting until our first Annual Report filed with the SEC where we are an accelerated filer or a large accelerated filer. We expect that we will be required to provide our public accounting firm's attestation to the effectiveness of our internal control over financial reporting with our next Annual Report on Form 10-K. At such time, our independent registered public accounting firm may issue a report that is adverse in the event it is not satisfied with the level at which our internal control over financial reporting is documented, designed, or operating. Any failure to maintain effective disclosure controls and internal control over financial reporting could harm our business and could cause a decline in the trading price of our Class A common stock.

We have acquired and may continue to acquire other businesses or receive offers to be acquired, which could require significant management attention, disrupt our business, or dilute stockholder value.

We have made and may continue in the future to make acquisitions of other companies, products, and technologies. For example, we recently announced our acquisition of Keybase Inc. We have limited experience in acquisitions. We may not be able to find suitable acquisition candidates and we may not be able to complete acquisitions on favorable terms, if at all. If we do complete acquisitions, we may not ultimately strengthen our competitive position or achieve our goals, and any acquisitions we complete could be viewed negatively by users, developers, or investors. In addition, we may not be able to integrate acquired businesses successfully or effectively manage the combined company following an acquisition. If we fail to successfully integrate our acquisitions, or the people or technologies associated with those acquisitions, into our company, the results of operations of the combined company could be adversely affected. Any integration process will require significant time and resources, require significant attention from management and disrupt the ordinary functioning of our business, and we may not be able to manage the process successfully, which could harm our business. In addition, we may not successfully evaluate or utilize the acquired technology and accurately forecast the financial impact of an acquisition transaction, including accounting charges.

We may have to pay cash, incur debt, or issue equity securities to pay for any such acquisition, each of which could affect our financial condition or the value of our capital stock. The sale of equity to finance any such acquisitions could result in dilution to our stockholders. If we incur more debt, it would result in increased fixed obligations and could also subject us to covenants or other restrictions that would impede our ability to flexibly operate our business.

Risks Related to Ownership of Our Class A Common Stock

The trading price of our Class A common stock may be volatile, and you could lose all or part of your investment.

The trading price of our Class A common stock has been and will likely continue to be volatile and could be subject to fluctuations in response to various factors, some of which are beyond our control. For example, in connection with the COVID-19 pandemic, we have experienced an increase in the usage of our video-first communications platform, and as a result, the trading price of our Class A common stock has significantly increased, while at the same time, the broader market has experienced significant declines and volatility. There are no assurances that the trading price of our Class A common stock will continue at this level for any period of time. Moreover, the trading price of our Class A common stock could experience a significant decrease once the scope and impact of the COVID-19 pandemic is better understood. These fluctuations could cause you to lose all or part of your investment in our Class A common stock. Factors that could cause fluctuations in the trading price of our Class A common stock include the following:

- price and volume fluctuations in the overall stock market from time to time;
- volatility in the trading prices and trading volumes of technology stocks;
- changes in operating performance and stock market valuations of other technology companies generally, or those in our industry in particular;
- sales of shares of our Class A common stock by us or our stockholders;
- failure of securities analysts to maintain coverage of us, changes in financial estimates by securities analysts who follow our company, or our failure to meet these estimates or the expectations of investors;
- the financial projections we may provide to the public, any changes in those projections, or our failure to meet those projections;
- announcements by us or our competitors of new products, features, or services;
- the public's reaction to our press releases, other public announcements, and filings with the SEC;
- rumors and market speculation involving us or other companies in our industry;
- actual or anticipated changes in our results of operations or fluctuations in our results of operations;
- actual or anticipated developments in our business, our competitors' businesses, or the competitive landscape generally;
- litigation involving us, our industry, or both, or investigations by regulators into our operations or those of our competitors;
- developments or disputes concerning our intellectual property or other proprietary rights;
- announced or completed acquisitions of businesses, products, services, or technologies by us or our competitors;
- new laws or regulations or new interpretations of existing laws or regulations applicable to our business;
- changes in accounting standards, policies, guidelines, interpretations, or principles;
- any significant change in our management; and
- general economic conditions and slow or negative growth of our markets.

In addition, in the past, following periods of volatility in the overall market and in the market price of a particular company's securities, securities class action litigation has often been instituted against these companies. This litigation, if instituted against us, could result in substantial costs and a diversion of our management's attention and resources.

The dual class structure of our common stock as contained in our amended and restated certificate of incorporation has the effect of concentrating voting control with those stockholders who held our stock prior to our initial public offering, including our executive officers, employees, and directors and their affiliates, limiting your ability to influence corporate matters.

Our Class B common stock has 10 votes per share and our Class A common stock has one vote per share. As of April 30, 2020, the holders of our outstanding Class B common stock held 87.2% of the voting power of our outstanding capital stock, with our directors, executive officers and 5% stockholders and their respective affiliates holding 73.1% of such voting power in the aggregate. As of April 30, 2020, our founder, President and Chief Executive Officer, Eric S. Yuan, together with his affiliates, held approximately 15.8% of our outstanding capital stock but controlled approximately 33.9% of the voting power of our outstanding capital stock. Therefore, these holders have significant influence over our management and affairs and over all matters requiring stockholder approval, including election of directors and significant corporate transactions, such as a merger or other sale of Zoom or our assets, for the foreseeable future. Each share of Class B common stock will be automatically converted into one share of Class A common stock upon the earliest of (i) the date that is six months following the death or

incapacity of Mr. Yuan, (ii) the date that is six months following the date that Mr. Yuan is no longer providing services to us or his employment is terminated for cause, (iii) the date specified by the holders of a majority of the then outstanding shares of Class B common stock, voting as a separate class, and (iv) the 15-year anniversary of the closing of our initial public offering.

In addition, the holders of Class B common stock collectively will continue to be able to control all matters submitted to our stockholders for approval even if their stock holdings represent less than a majority of the outstanding shares of our common stock. This concentrated control will limit your ability to influence corporate matters for the foreseeable future, and, as a result, the market price of our Class A common stock could be adversely affected.

Future transfers by holders of Class B common stock will generally result in those shares converting to Class A common stock, which will have the effect, over time, of increasing the relative voting power of those holders of Class B common stock who retain their shares in the long term. If, for example, Mr. Yuan retains a significant portion of his holdings of Class B common stock for an extended period of time, he could, in the future, control a majority of the combined voting power of our Class A and Class B common stock. As a board member, Mr. Yuan owes a fiduciary duty to our stockholders and must act in good faith in a manner he reasonably believes to be in the best interests of our stockholders. As a stockholder, even a controlling stockholder, Mr. Yuan is entitled to vote his shares in his own interests, which may not always be in the interests of our stockholders generally.

In addition, in July 2017, FTSE Russell and Standard & Poor's announced that they would cease to allow most newly public companies utilizing dual- or multi-class capital structures to be included in their indices. Affected indices include the Russell 2000 and the S&P 500, S&P MidCap 400, and S&P SmallCap 600, which together make up the S&P Composite 1500. Under the announced policies, our dual-class capital structure would make us ineligible for inclusion in any of these indices, and as a result, mutual funds, exchange-traded funds, and other investment vehicles that attempt to passively track these indices will not be investing in our stock. These policies are new, and it is as of yet unclear what effect, if any, they will have on the valuations of publicly traded companies excluded from the indices, but it is possible that they may depress these valuations or depress our trading volume compared to those of other similar companies that are included.

Future sales and issuances of our capital stock or rights to purchase capital stock could result in additional dilution of the percentage ownership of our stockholders and could cause our stock price to decline.

Future sales and issuances of our capital stock or rights to purchase our capital stock could result in substantial dilution to our existing stockholders. We may sell Class A common stock, convertible securities, and other equity securities in one or more transactions at prices and in a manner as we may determine from time to time. If we sell any such securities in subsequent transactions, investors may be materially diluted. New investors in such subsequent transactions could gain rights, preferences, and privileges senior to those of holders of our Class A common stock.

Substantial future sales of shares of our Class A common stock and Class B common stock could cause the market price of our Class A common stock to decline.

Sales of a substantial number of shares of our Class A common stock and Class B common stock (after automatically converting to Class A common stock) in the public market, or the perception that these sales might occur, could depress the market price of our Class A common stock.

In addition, certain of our stockholders have registration rights that would require us to register shares owned by them for public sale in the United States. We have also filed a registration statement to register shares reserved for future issuance under our equity compensation plans. As a result, subject to the satisfaction of applicable exercise periods and applicable volume and restrictions that apply to affiliates, the shares issued upon exercise of outstanding stock options or upon settlement of outstanding RSU awards are available for immediate resale in the United States in the open market.

Sales of our shares could also impair our ability to raise capital through the sale of additional equity securities in the future and at a price we deem appropriate. These sales could also cause the trading price of our Class A common stock to fall and make it more difficult for you to sell shares of our Class A common stock.

Provisions in our corporate charter documents and under Delaware law may prevent or frustrate attempts by our stockholders to change our management or hinder efforts to acquire a controlling interest in us, and the market price of our Class A common stock may be lower as a result.

There are provisions in our certificate of incorporation and bylaws that may make it difficult for a third party to acquire, or attempt to acquire, control of Zoom, even if a change in control was considered favorable by our stockholders.

Our charter documents also contain other provisions that could have an anti-takeover effect, such as:

- establishing a classified board of directors so that not all members of our board of directors are elected at one time;

- permitting the board of directors to establish the number of directors and fill any vacancies and newly created directorships;
- providing that directors may only be removed for cause;
- prohibiting cumulative voting for directors;
- requiring super-majority voting to amend some provisions in our certificate of incorporation and bylaws;
- authorizing the issuance of “blank check” preferred stock that our board of directors could use to implement a stockholder rights plan;
- eliminating the ability of stockholders to call special meetings of stockholders;
- prohibiting stockholder action by written consent, which requires all stockholder actions to be taken at a meeting of our stockholders; and
- our dual-class common stock structure as described above.

Moreover, because we are incorporated in Delaware, we are governed by the provisions of Section 203 of the Delaware General Corporation Law, which prohibit a person who owns 15% or more of our outstanding voting stock from merging or combining with us for a period of three years after the date of the transaction in which the person acquired in excess of 15% of our outstanding voting stock, unless the merger or combination is approved in a prescribed manner. Any provision in our certificate of incorporation or our bylaws or Delaware law that has the effect of delaying or deterring a change in control could limit the opportunity for our stockholders to receive a premium for their shares of our Class A common stock and could also affect the price that some investors are willing to pay for our Class A common stock.

Our amended and restated certificate of incorporation designates the Court of Chancery of the State of Delaware and the federal district courts of the United States of America as the exclusive forums for certain disputes between us and our stockholders, which could limit our stockholders’ ability to choose the judicial forum for disputes with us or our directors, officers, or employees.

Our amended and restated certificate of incorporation provides that, unless we consent in writing to the selection of an alternative forum, the sole and exclusive forum for the following types of actions or proceedings under Delaware statutory or common law: (i) any derivative action or proceeding brought on our behalf; (ii) any action asserting a claim of breach of a fiduciary duty owed by any of our directors, officers, or other employees to us or our stockholders; (iii) any action arising pursuant to any provision of the Delaware General Corporation Law, or the certificate of incorporation or the amended and restated bylaws; or (iv) any other action asserting a claim that is governed by the internal affairs doctrine shall be the Court of Chancery of the State of Delaware (or, if the Court of Chancery does not have jurisdiction, the federal district court for the District of Delaware), in all cases subject to the court having jurisdiction over indispensable parties named as defendants. In addition, our amended and restated certificate of incorporation provides that the federal district courts of the United States of America will be the exclusive forum for resolving any complaint asserting a cause of action arising under the Securities Act.

Any person or entity purchasing or otherwise acquiring any interest in any of our securities shall be deemed to have notice of and consented to these provisions. These exclusive-forum provisions may limit a stockholder’s ability to bring a claim in a judicial forum of its choosing for disputes with us or our directors, officers, or other employees, which may discourage lawsuits against us and our directors, officers and other employees. If a court were to find either exclusive-forum provision in our amended and restated certificate of incorporation to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving the dispute in other jurisdictions, which could harm our results of operations.

Our Class A common stock market price and trading volume could decline if securities or industry analysts do not publish research or publish inaccurate or unfavorable research about our business.

The trading market for our Class A common stock depends in part on the research and reports that securities or industry analysts publish about us or our business. The analysts’ estimates are based upon their own opinions and are often different from our estimates or expectations. If one or more of the analysts who cover us downgrade our Class A common stock or publish inaccurate or unfavorable research about our business, the price of our securities would likely decline. If one or more securities analysts cease coverage of us or fail to publish reports on us regularly, demand for our securities could decrease, which might cause the price and trading volume of our Class A common stock to decline.

We incur costs and demands upon management as a result of complying with the laws and regulations affecting public companies in the United States, which may harm our business.

As a public company listed in the United States, we incur significant additional legal, accounting, and other expenses. In addition, changing laws, regulations, and standards relating to corporate governance and public disclosure, including

regulations implemented by the SEC and The Nasdaq Stock Market, may increase legal and financial compliance costs and make some activities more time consuming. These laws, regulations, and standards are subject to varying interpretations, and as a result, their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies. We intend to invest resources to comply with evolving laws, regulations, and standards, and this investment may result in increased general and administrative expenses and a diversion of management's time and attention from revenue-generating activities to compliance activities. If, notwithstanding our efforts, we fail to comply with new laws, regulations, and standards, regulatory authorities may initiate legal proceedings against us and our business may be harmed.

Failure to comply with these rules might also make it more difficult for us to obtain certain types of insurance, including director and officer liability insurance, and we might be forced to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. The impact of these events would also make it more difficult for us to attract and retain qualified persons to serve on our board of directors, on committees of our board of directors, or as members of senior management.

We are an "emerging growth company," and we intend to comply only with reduced disclosure requirements applicable to emerging growth companies. As a result, our Class A common stock could be less attractive to investors.

We are an "emerging growth company," as defined in the Jumpstart Our Business Startups Act, and for as long as we continue to be an emerging growth company, we may choose to take advantage of exemptions from various reporting requirements applicable to other public companies but not to emerging growth companies, including not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and shareholder approval of any golden parachute payments not previously approved. We will remain an emerging growth company until the earlier of (i) the last day of the fiscal year (a) following the fifth anniversary of the completion of our IPO; (b) in which we have total annual gross revenue of more than \$1.07 billion; or (c) in which we are deemed to be a large accelerated filer, which means the market value of our common stock held by non-affiliates exceeds \$700 million as of the prior July 31 and (ii) the date on which we have issued more than \$1.0 billion in non-convertible debt during the prior three-year period. We cannot predict if investors will find our Class A common stock less attractive if we choose to rely on these exemptions. If some investors find our Class A common stock less attractive as a result of any choices to reduce future disclosure, there may be a less active trading market for our Class A common stock, and our stock price may be more volatile.

We do not intend to pay dividends for the foreseeable future.

We have never declared nor paid cash dividends on our capital stock. We currently intend to retain any future earnings to finance the operation and expansion of our business, and we do not expect to declare or pay any dividends in the foreseeable future. As a result, stockholders must rely on sales of their Class A common stock after price appreciation as the only way to realize any future gains on their investment.

FIFTH AMENDMENT TO OFFICE LEASE

This Fifth Amendment to Office Lease (this "Fifth Amendment") is made and entered into by and between **KBSIII ALMADEN FINANCIAL PLAZA, LLC**, a Delaware limited liability company ("Landlord"), and **ZOOM VIDEO COMMUNICATIONS, INC.**, a Delaware corporation ("Tenant"), and shall be effective for all purposes as of the date that Landlord executes this Fifth Amendment as reflected in the signature page below (the "Effective Date").

WITNESSETH:

WHEREAS, Landlord and Tenant are parties to that certain Office Lease dated August 1, 2016 (the "Original Lease"), as amended by (i) that certain First Amendment to Office Lease dated October 31, 2016 (the "First Amendment"), (ii) that certain Second Amendment to Office Lease dated August 8, 2018 (the "Second Amendment"), (iii) that certain Third Amendment to Office Lease dated March 13, 2019 (the "Third Amendment"), and (iv) that certain Fourth Amendment to Office Lease dated May 13, 2019 (the "Fourth Amendment;" the Original Lease, as so amended, being the "Lease"), pursuant to which Tenant is currently leasing from Landlord certain premises containing a total of 87,025 square feet of Rentable Area consisting of (i) that certain 17,576 square feet of Rentable Area designated as Suite 400 (the "Suite 400 Space") in the building known as 55 Almaden Boulevard San Jose, California (the "55 Almaden Building"), (ii) that certain 17,639 square feet of Rentable Area designated as Suite 500 (the "Suite 500 Space") in the 55 Almaden Building, (iii) that certain 17,514 square feet of Rentable Area designated as Suite 600 (the "Suite 600 Space") in the 55 Almaden Building, (iv) that certain 13,271 square feet of Rentable Area designated as Suite 300 (the "Suite 300 Space") in the building known as One Almaden, San Jose, California ("One Almaden Building"), (v) that certain 13,291 square feet of Rentable Area designated as Suite 900 (the "Suite 900 Space") in the One Almaden Building, and (v) that certain 7,734 square feet of Rentable Area designated as Suite 1150 (the "Suite 1150 Space") in the One Almaden Building (collectively with the Suite 400 Space, Suite 500 Space, Suite 600 Space, the Suite 300 Space, the Suite 900 Space and Suite 1150 Space referred to herein as the "Existing Premises"), all being in the multi-office building project known as The Almaden (the "Project");

WHEREAS, Tenant desires to further expand the "Premises" under the Lease;

WHEREAS, Landlord and Tenant desire to expand the Premises and further amend the Lease as more particularly described hereinbelow;

NOW, THEREFORE, pursuant to the foregoing, and in consideration of the mutual covenants and agreements contained herein and in the Lease, the receipt and sufficiency of which are hereby acknowledged, the Lease is hereby amended as follows:

1. Defined Terms. All capitalized terms used herein shall have the same meaning as defined in the Lease, unless otherwise defined in this Fifth Amendment.
2. Expansion of Premises.
 - (a) Eleventh Floor Expansion Space. Subject to the satisfaction of the Eleventh Floor Condition (as set forth below), effective as of the later to occur of (i) the earlier to occur of (A) the date that the Eleventh Floor Improvements are Substantially Completed, (B) the date that the Eleventh Floor Improvements would have been Substantially Completed but for Tenant Delays, or (C) the date that Tenant, or any person occupying any of the Eleventh Floor Expansion Space with Tenant's permission, commences business operations from the Eleventh Floor Expansion Space, or (ii) December 1, 2020 (the later of (i) and (ii) being the "Eleventh Floor Expansion Commencement Date"), the Premises shall be expanded to

include that certain 5,497 square foot of Rentable Area designated as Suites 1100 & 1110 (the "Eleventh Floor Expansion Space") in the One Almaden Building, for a term that is coterminous with the Lease Term, which is currently scheduled to expire in February 28, 2029. The Eleventh Floor Expansion Space is more particularly shown in Exhibit A-1 attached hereto and incorporated herein for all purposes. The terms "Eleventh Floor Expansion Improvements," "Substantially Completed" and "Tenant Delays" are defined in the work letter attached hereto as Exhibit B-1. Following the Eleventh Floor Expansion Commencement Date, Landlord may prepare and deliver to Tenant a commencement certificate confirming the Eleventh Floor Expansion Commencement Date, which Tenant shall acknowledge by executing a copy and returning it to Landlord. If Tenant fails to sign and return the commencement certificate to Landlord within ten (10) business days of its receipt from Landlord, the commencement certificate as sent by Landlord shall be deemed to have correctly set forth the Eleventh Floor Expansion Commencement Date and the other matters addressed in the commencement certificate. Failure of Landlord to send the commencement certificate shall have no effect on the Eleventh Floor Expansion Commencement Date. Tenant acknowledges that the Eleventh Floor Expansion Space is currently occupied by a third party tenant and Tenant's expansion into the Eleventh Floor Expansion Space is expressly contingent upon Landlord relocating such existing tenant to other space on the tenth floor of the One Almaden Building pursuant to an amendment to such tenant's lease in a form acceptable to Landlord in its sole and absolute discretion (the "Eleventh Floor Condition"). If the Eleventh Floor Condition is not satisfied, then Tenant shall not expand into the Eleventh Floor Expansion Space and all of the terms in this Fifth Amendment relating to the Eleventh Floor Expansion Space shall be null and void and of no force or effect. In such case, Tenant shall continue to expand into the Second Floor Expansion Space and the terms of this Fifth Amendment relating to such Second Floor Expansion Space shall continue in full force and effect. Landlord shall advise Tenant in writing if and when the Eleventh Floor Condition is satisfied. If Landlord fails to provide such written notice to Tenant by April 1, 2020, then it shall be deemed that Landlord was unable to satisfy the Eleventh Floor Condition. If the Eleventh Floor Condition is timely satisfied and Landlord does not Substantially Complete the Eleventh Floor Expansion Improvements by the Completion Date (as defined below), then Tenant, as Tenant's sole and exclusive remedy, shall receive an extension of the Eleventh Floor Expansion Space Abatement Period (as defined below) for each day that the Eleventh Floor Expansion Improvements are not Substantially Completed following the Completion Date. The term "Completion Date" shall mean December 1, 2020; provided, however, the Completion Date shall be postponed one (1) day for each day of Tenant Delay and one (1) day for each day that one or more Force Majeure Delays occur. The term "Force Majeure Delay" shall mean any delays in the performance of Landlord's obligations under this Lease being defined in this Lease as an event of Force Majeure (as more fully described and defined in Paragraph 19(w) of the Original Lease)

- (b) Second Floor Expansion Space. Effective as of the later to occur of (i) the earlier to occur of (A) the date that the Second Floor Improvements are Substantially Completed, (B) the date that the Second Floor Improvements would have been Substantially Completed but for Tenant Delays, or (C) the date that Tenant, or any person occupying any of the Second Floor Expansion Space with Tenant's permission, commences business operations from the Second Floor Expansion Space, or (ii) December 1, 2020 (the later of (i) and (ii) being the "Second Floor Expansion Commencement Date"), the Premises shall be expanded to include that certain 10,394 square foot of Rentable Area designated as Suites 200 & 240 (the "Second Floor Expansion Space") in the One Almaden Building, for a term that is coterminous with the Lease Term, which is currently scheduled to expire in February 28, 2029. The Second Floor Expansion Space is more particularly shown in Exhibit A-2

attached hereto and incorporated herein for all purposes. The terms "Second Floor Improvements," "Substantially Completed" and "Tenant Delays" are defined in the work letter attached hereto as Exhibit B-2. Following the Second Floor Expansion Commencement Date, Landlord may prepare and deliver to Tenant a commencement certificate confirming the Second Floor Expansion Commencement Date, which Tenant shall acknowledge by executing a copy and returning it to Landlord. If Tenant fails to sign and return the commencement certificate to Landlord within ten (10) business days of its receipt from Landlord, the commencement certificate as sent by Landlord shall be deemed to have correctly set forth the Second Floor Expansion Commencement Date and the other matters addressed in the commencement certificate. Failure of Landlord to send the commencement certificate shall have no effect on the Second Floor Expansion Commencement Date. If Landlord does not Substantially Complete the Second Floor Improvements by the Completion Date (as defined below), then Tenant, as Tenant's sole and exclusive remedy, shall receive an extension of the Second Floor Expansion Space Abatement Period (as defined below) for each day that the Second Floor Improvements are not Substantially Completed following the Completion Date. The term "Completion Date" shall mean December 1, 2020; provided, however, the Completion Date shall be postponed one (1) day for each day of Tenant Delay and one (1) day for each day that one or more Force Majeure Delays occur. The term "Force Majeure Delay" shall mean any delays in the performance of Landlord's obligations under this Lease being defined in this Lease as an event of Force Majeure (as more fully described and defined in Paragraph 19(w) of the Original Lease).

3. Confirmation of the Premises. If the Eleventh Floor Condition is not satisfied, then Tenant shall not expand into the Eleventh Floor Expansion Space and as a result the Premises shall only be expanded by the Second Floor Expansion Space. In such case, following the occurrence of the Second Floor Expansion Commencement Date, the "Premises" under the Lease shall be deemed to contain a total of 97,419 square feet of Rentable Area, consisting of the Suite 400 Space (which is located in the 55 Almaden Building), Suite 500 Space (which is located in the 55 Almaden Building), Suite 600 Space (which is located in the 55 Almaden Building), Suite 900 Space (which is located in the One Almaden Building), Suite 1150 Space (which is located in the One Almaden Building), Suite 300 Space (which is located in the One Almaden Building) and the Second Floor Expansion Space (which is located in the One Almaden Building). In the event the Eleventh Floor Condition is satisfied, then following the occurrence of both the Eleventh Floor Expansion Commencement Date and the Second Floor Expansion Commencement Date, the "Premises" under the Lease shall be deemed to contain a total of 102,916 square feet of Rentable Area, consisting of the Suite 400 Space (which is located in the 55 Almaden Building), Suite 500 Space (which is located in the 55 Almaden Building), Suite 600 Space (which is located in the 55 Almaden Building), Suite 900 Space (which is located in the One Almaden Building), Suite 1150 Space (which is located in the One Almaden Building), Suite 300 Space (which is located in the One Almaden Building), the Second Floor Expansion Space (which is located in the One Almaden Building), and the Eleventh Floor Expansion Space (which is located in the One Almaden Building). If the Eleventh Floor Expansion Commencement Date occurs prior to the Second Floor Expansion Commencement Date, then for the time period from the Eleventh Floor Expansion Commencement Date through the day immediately preceding the Second Floor Expansion Commencement Date, the "Premises" shall be deemed to consist of 92,522 and thereafter, upon the occurrence of the Second Floor Expansion Commencement Date, the "Premises" shall be deemed to be 102,916 square feet of Rentable Area as described above.
4. Basic Annual Rent.

- (a) Existing Premises. Tenant shall continue to pay Basic Annual Rent for the Existing Premises in accordance with the terms and conditions of the Lease.
- (b) Eleventh Floor Expansion Space. In addition, provided the Eleventh Floor Condition is satisfied, then commencing on the Eleventh Floor Expansion Commencement Date and continuing thereafter for the remainder of the Lease Term, Tenant shall also pay Basic Annual Rent for the Eleventh Floor Expansion Space as follows:

<u>Period</u>	<u>Monthly Installment</u>
Months 1 – 12*	\$28,765.60**
Months 13 – 24	\$29,557.17
Months 25 – 36	\$30,372.48
Months 37 – 48	\$31,212.26
Months 49 – 60	\$32,077.23
Months 61 – 72	\$32,968.14
Months 73 – 84	\$33,885.79
Months 85 – 96	\$34,830.96
Month 97 – 02/28/2029	\$35,804.49

*The “Months” in the foregoing rent table denote the calendar months following the Eleventh Floor Expansion Commencement Date. If the Eleventh Floor Expansion Commencement Date is a day other than the first day of a calendar month, then the period “Months 1 – 12” shall consist of the partial month in which the Eleventh Floor Expansion Commencement Date occurred plus the next twelve (12) full calendar months in order to ensure that each escalation of Basic Annual Rent occurs on the first day of a calendar month.

**Provided that Tenant is not in default under this Lease past applicable notice and cure periods, then Landlord hereby agrees to partially abate the Basic Annual Rent with respect to the Eleventh Floor Expansion Space for the full three (3) month period commencing on the first day of the second (2nd) full calendar month following the Eleventh Floor Expansion Commencement Date and continuing through the last day of the fourth (4th) full calendar month following the Eleventh Floor Expansion Commencement Date (such period being the “Eleventh Floor Expansion Space Abatement Period”) so that during this partial abatement period, the Basic Annual Rent payable by Tenant for the Eleventh Floor Expansion Space shall equal \$2,380.00 per month. Notwithstanding anything herein to the contrary, prior to the occurrence of the scheduled abatement of the Basic Annual Rent, Landlord may pay to Tenant the sum scheduled to be abated, in which case the abatement of Basic Annual Rent shall not occur and Tenant shall pay Basic Annual Rent in the amount required in the Basic Annual Rent schedule above.

- (c) Second Floor Expansion Space. In addition, commencing on the Second Floor Expansion Commencement Date and continuing thereafter for the remainder of the Lease Term, Tenant shall also pay Basic Annual Rent for the Second Floor Expansion Space as follows:

<u>Period</u>	<u>Monthly Installment</u>
Months 1 – 12*	\$53,851.50**
Months 13 – 24	\$55,332.65
Months 25 – 36	\$56,858.22
Months 37 – 48	\$58,429.57
Months 49 – 60	\$60,048.06
Months 61 – 72	\$61,715.10

Months 73 – 84	\$63,432.15
Months 85 – 96	\$65,200.72
Month 97 – 02/28/2029	\$67,022.34

*The “Months” in the foregoing rent table denote the calendar months following the Second Floor Expansion Commencement Date. If the Second Floor Expansion Commencement Date is a day other than the first day of a calendar month, then the period “Months 1 – 12” shall consist of the partial month in which the Second Floor Expansion Commencement Date occurred plus the next twelve (12) full calendar months in order to ensure that each escalation of Basic Annual Rent occurs on the first day of a calendar month.

**Provided that Tenant is not in default under this Lease past applicable notice and cure periods, then Landlord hereby agrees to partially abate the Basic Annual Rent with respect to the Second Floor Expansion Space for the one (1) month period commencing on the first day of the second (2nd) full calendar month following the Second Floor Expansion Commencement Date and continuing through the last day of such second (2nd) full calendar month following the Second Floor Expansion Commencement Date (such period being the “Second Floor Expansion Space Abatement Period”) so that during this partial abatement period, the Basic Annual Rent payable by Tenant for the Second Floor Expansion Space shall equal \$4,480.00 per month. Notwithstanding anything herein to the contrary, prior to the occurrence of the scheduled abatement of the Basic Annual Rent, Landlord may pay to Tenant the sum scheduled to be abated, in which case the abatement of Basic Annual Rent shall not occur and Tenant shall pay Basic Annual Rent in the amount required in the Basic Annual Rent schedule above.

5. Additional Rent.

- (a) Existing Premises. Tenant shall continue to pay Additional Rent with respect to the Existing Premises in accordance with the terms of the Lease.
- (b) Eleventh Floor Expansion Space. In addition thereto, with respect to the Eleventh Floor Expansion Space, in the event the Eleventh Floor Condition is satisfied, commencing on the Eleventh Floor Expansion Commencement Date and continuing thereafter through the Lease Term, Tenant shall pay, as Additional Rent, the Tenant’s Proportionate Share of Operating Costs attributable to the Eleventh Floor Expansion Space in excess of those Operating Costs incurred in the Base Year and for purposes of performing such calculations: (i) the Tenant’s Proportionate Share of the One Almaden Building with respect to the Eleventh Floor Expansion Space shall be deemed to equal 3.5149% (5,497 rsf / 156,392 rsf), (ii) the Tenant’s Proportionate Share of the Project with respect to the Eleventh Floor Expansion Space shall be deemed to equal 1.321% (5,497 rsf / 416,126 rsf), (iii) the Base Year with respect to the Eleventh Floor Expansion Space shall be deemed to be the calendar year 2021, and (iv) any references to the “Building” in the Lease shall mean and refer to the One Almaden Building. The cap on Controllable Operating Costs set forth in Paragraph 3(l) of the Original Lease shall apply with respect to the Eleventh Floor Expansion Space, however, for purposes of calculating such cap, the phrase “first calendar year” as set forth in the third line of Paragraph 3(l) shall be amended to be “2021 calendar year”.
- (c) Second Floor Expansion Space. In addition thereto, with respect to the Second Floor Expansion Space, commencing on the Second Floor Expansion Commencement Date and

continuing thereafter through the Lease Term, Tenant shall pay, as Additional Rent, the Tenant's Proportionate Share of Operating Costs attributable to the Second Floor Expansion Space in excess of those Operating Costs incurred in the Base Year and for purposes of performing such calculations: (i) the Tenant's Proportionate Share of the One Almaden Building with respect to the Second Floor Expansion Space shall be deemed to equal 6.6461% (10,394 rsf / 156,392 rsf), (ii) the Tenant's Proportionate Share of the Project with respect to the Second Floor Expansion Space shall be deemed to equal 2.4978% (10,394 rsf / 416,126 rsf), (iii) the Base Year with respect to the Second Floor Expansion Space shall be deemed to be the calendar year 2021, and (iv) any references to the "Building" in the Lease shall mean and refer to the One Almaden Building. The cap on Controllable Operating Costs set forth in Paragraph 3(l) of the Original Lease shall apply with respect to the Second Floor Expansion Space, however, for purposes of calculating such cap, the phrase "first calendar year" as set forth in the third line of Paragraph 3(l) shall be amended to be "2021 calendar year".

6. Condition of Premises.

- (a) Eleventh Floor Expansion Space. Notwithstanding anything in the Lease to the contrary, if the Eleventh Floor Condition is satisfied, then Tenant shall lease the Eleventh Floor Expansion Space and agrees to accept the entirety of the Eleventh Floor Expansion Space from Landlord, in its existing "AS-IS", "WHERE-IS" and "WITH ALL FAULTS" condition, and, except as provided in the Lease, Landlord shall have no obligation whatsoever to refurbish or otherwise improve any portion of the Eleventh Floor Expansion Space at any time during the Lease Term; provided, however, Landlord hereby agrees to provide Tenant with an allowance equal to \$604,670.00 (which is equal to \$110.00 per square foot of Rentable Area in the Eleventh Floor Expansion Space) (the "Eleventh Floor Allowance") to be used towards the construction of improvements to the Eleventh Floor Expansion Space pursuant to the work letter attached hereto as Exhibit B-1 and incorporated herein for all purposes. In the event the Eleventh Floor Condition is not satisfied, then Tenant shall have no rights with respect to the Eleventh Floor Allowance.
- (b) Second Floor Expansion Space. Notwithstanding anything in the Lease to the contrary, Tenant shall lease the Second Floor Expansion Space and agrees to accept the entirety of the Second Floor Expansion Space from Landlord, in its existing "AS-IS", "WHERE-IS" and "WITH ALL FAULTS" condition, and, except as provided in the Lease, Landlord shall have no obligation whatsoever to refurbish or otherwise improve any portion of the Second Floor Expansion Space at any time during the Lease Term; provided, however, Landlord hereby agrees to provide Tenant with an allowance equal to \$1,143,340.00 (which is equal to \$110.00 per square foot of Rentable Area in the Second Floor Expansion Space) (the "Second Floor Allowance") to be used towards the construction of improvements to the Second Floor Expansion Space pursuant to the work letter attached hereto as Exhibit B-2 and incorporated herein for all purposes.

7. Parking.

- (a) Eleventh Floor Expansion Space. Notwithstanding anything to the contrary in Paragraph 9(a) of the Second Amendment, the Standard Parking Allocation applicable to the Eleventh Floor Expansion Space shall equal 3.1 unreserved parking spaces per 1,000 rentable square feet in the Eleventh Floor Expansion Space. Accordingly, as of the Eleventh Floor Expansion Commencement Date, Tenant shall be allocated a total of seventeen (17) unreserved parking spaces. The parking charges for the Standard Parking Allocation attributable to the Eleventh Floor Expansion Space are incorporated into the Basic Annual

Rent amounts for the Eleventh Floor Expansion Space reflected in the rent schedule in Paragraph 4(b) above and, as a result, there is no separate charge payable for by Tenant for such Standard Parking Allocation attributable to the Eleventh Floor Expansion Space; provided, however, in the event the prevailing rate increases after the Effective Date (such incremental increase being the "Increased Rate Amount") for unreserved parking spaces in the Project, then Tenant shall pay such Increased Rate Amount (as such amount may increase from time to time) as a separate charge (plus any applicable taxes) for each unreserved parking space provided to Tenant in the Standard Parking Allocation attributed to the Eleventh Floor Expansion Space.

- (b) Second Floor Expansion Space. Notwithstanding anything to the contrary in Paragraph 9(a) of the Second Amendment, the Standard Parking Allocation applicable to the Second Floor Expansion Space shall equal 3.1 unreserved parking spaces per 1,000 rentable square feet in the Second Floor Expansion Space. Accordingly, as of the Second Floor Expansion Commencement Date, Tenant shall be allocated a total of thirty-two (32) unreserved parking spaces. The parking charges for the Standard Parking Allocation attributable to the Second Floor Expansion Space are incorporated into the Basic Annual Rent amounts for the Second Floor Expansion Space reflected in the rent schedule in Paragraph 4(c) above and, as a result, there is no separate charge payable for by Tenant for such Standard Parking Allocation attributable to the Second Floor Expansion Space; provided, however, in the event there is an Increased Rate Amount for unreserved parking spaces in the Project, then Tenant shall pay such Increased Rate Amount (as such amount may increase from time to time) as a separate charge (plus any applicable taxes) for each unreserved parking space provided to Tenant in the Standard Parking Allocation attributed to the Second Floor Expansion Space.
8. Prepaid Rent. Concurrently with the execution of this Fifth Amendment, Tenant shall pay to Landlord the sum of \$82,617.10, which shall be applied towards the Basic Annual Rent first becoming due with respect to the Eleventh Floor Expansion Space and Second Floor Expansion Space.
10. Renewal Option. Tenant shall continue to have the renewal option set forth in Exhibit C to the Second Amendment and such renewal option shall apply to the Eleventh Floor Expansion Space (but only to the extent the Eleventh Floor Condition is satisfied such that Tenant leases the Eleventh Floor Expansion Space) and the Second Floor Expansion Space. In the event that tenant elects to exercise the renewal option, it shall be required to exercise it for the entirety of the Premises then being leased by Tenant (*i.e.*, it cannot exercise the renewal option for only a portion of the Premises being leased).
11. 55 Almaden - Suite 800 Space. Tenant hereby acknowledges that the Suite 800 Existing Tenant (as defined in Paragraph 13 of the Third Amendment) in the 55 Almaden Building exercised its renewal option. As a result, Tenant shall not expand into the Suite 800 Space and the terms of Paragraph 13 of the Third Amendment are deemed null and void and of no force or effect.
12. Brokers. Landlord and Tenant each warrant that it has had no dealings with any broker or agent other than CBRE, Inc., representing Tenant, and Cushman & Wakefield U.S., Inc., representing Landlord (collectively, the "Broker") in connection with the negotiation or execution of this Fifth Amendment, and Landlord and Tenant each agree to indemnify the other and hold the other harmless from and against any and all costs, expenses, or liability for commissions or other compensations or charges claimed by any broker or agent, other than the Broker, who claim to have represented the indemnifying party with respect to this Fifth Amendment or otherwise claim a commission with respect to this Fifth Amendment due to their dealings with the indemnifying party.

Landlord shall pay the Broker a leasing commission in connection with this Fifth Amendment pursuant to a separate written agreement between Landlord and such Broker.

13. OFAC. Tenant certifies, represents, warrants and covenants that: (i) it is not acting and will not act, directly or indirectly, for or on behalf of any person, group, entity, or nation named by any Executive Order or the United States Treasury Department as a terrorist, "Specially Designated National and Blocked Person", or other banned or blocked person, entity, nation or transaction pursuant to any law, order, rule, or regulation that is enforced or administered by the Office of Foreign Assets Control; and (ii) it is not engaged in this transaction, directly or indirectly on behalf of, or instigating or facilitating this transaction, directly or indirectly on behalf of, any such person, group, entity or nation. Tenant hereby agrees to defend (with counsel reasonably acceptable to Landlord), indemnify and hold harmless Landlord and its designated property management company, and their respective partners, members, affiliates and subsidiaries, and all of their respective officers, directors, shareholders, employees, servants, partners, representatives, insurers and agents from and against any and all claims or damages arising from or related to any such breach of the foregoing certifications, representations, warranties and covenants.
14. Miscellaneous. With the exception of those terms and conditions specifically modified and amended herein, the herein referenced Lease shall remain in full force and effect in accordance with all its terms and conditions. In the event of any conflict between the terms and provisions of this Fifth Amendment and the terms and provisions of the Lease, the terms and provisions of this Fifth Amendment shall supersede and control.
15. Counterparts/Facsimiles. This Fifth Amendment may be executed in any number of counterparts, each of which shall be deemed an original, and all of such counterparts shall constitute one agreement. To facilitate execution of this Fifth Amendment, the parties may execute and exchange telefaxed or e-mailed counterparts of the signature pages and such counterparts shall serve as originals.
16. ELECTRONIC SIGNATURES/COUNTERPARTS. Signatures to this Fifth Amendment transmitted by telecopy or electronic signatures shall be valid and effective to bind the party so signing. To facilitate execution of this Fifth Amendment, the parties may execute this Fifth Amendment via counterparts and exchange facsimile or pdf copies of such executed counterparts via telefax or e-mail, and such telefaxed or e-mailed facsimile counterparts shall serve as originals. **FURTHER, THE PARTIES HERETO EXPRESSLY CONSENT, STIPULATE AND AGREE THAT THIS FIFTH AMENDMENT MAY BE ELECTRONICALLY SIGNED. THE PARTIES AGREE THE ELECTRONIC SIGNATURES APPEARING ON THIS FIFTH AMENDMENT SHALL BE TREATED, FOR PURPOSES OF VALIDITY, ENFORCEABILITY AS WELL AS ADMISSIBILITY, THE SAME AS HAND-WRITTEN SIGNATURES.**

EXHIBIT B-1
WORK LETTER
(ELEVENTH FLOOR EXPANSION IMPROVEMENTS)

(a) Eleventh Floor Expansion Improvements. Landlord, at Tenant's sole cost and expense, agrees to furnish or perform those items of construction and those improvements to the Eleventh Floor Expansion Space (the "Eleventh Floor Expansion Improvements") specified in the Eleventh Floor Final Plans to be agreed to by Landlord and Tenant as set forth in Paragraph (b) below; provided, however, Landlord shall pay for the cost of such Eleventh Floor Expansion Improvements up to the extent of the Eleventh Floor Allowance (as defined in Paragraph 6(a) of this Fifth Amendment) as set forth in Paragraph (e) below. Notwithstanding anything herein to the contrary, except as provided in the next following sentence, the Eleventh Floor Allowance shall only be used towards improvements to the Eleventh Floor Expansion Space and in no event shall any portion of such allowance be applied towards improvements to any portion of the Existing Premises or the Second Floor Expansion Space. If there are any unused amounts from the Eleventh Floor Allowance remaining after completion of the Eleventh Floor Expansion Improvements, then Tenant shall be permitted to use such unused portion of the Eleventh Floor Allowance (but in no event in excess of \$137,425.00 out of any such remaining unused portion) towards the cost to complete the Second Floor Expansion Improvements pursuant to Exhibit B-2 attached hereto.

(b) Space Planner. Landlord has retained a space planner (the "Space Planner") to prepare certain plans, drawings and specifications (the "Eleventh Floor Temporary Plans") for the construction of the Eleventh Floor Expansion Improvements to be installed in the Eleventh Floor Expansion Space by a general contractor selected by Landlord pursuant to this Work Letter. Tenant shall deliver to Space Planner within twenty (20) days after the execution of this Fifth Amendment, all necessary information required by the Space Planner to complete the Eleventh Floor Temporary Plans. Tenant shall have five (5) business days after its receipt of the proposed Eleventh Floor Temporary Plans to review the same and notify Landlord in writing of any comments or required changes, or to otherwise give its approval or disapproval of such proposed Eleventh Floor Temporary Plans. If Tenant fails to give written comments to or approve the Eleventh Floor Temporary Plans within such five (5) business day period, then Tenant shall be deemed to have approved the Eleventh Floor Temporary Plans as submitted. Landlord shall have five (5) business days following its receipt of Tenant's comments and objections to redraw the proposed Eleventh Floor Temporary Plans in compliance with Tenant's request and to resubmit the same for Tenant's final review and approval or comment within five (5) business days of Tenant's receipt of such revised plans. Such process shall be repeated twice and if at such time final approval by Tenant of the proposed Eleventh Floor Temporary Plans has not been obtained, then Landlord shall complete such Eleventh Floor Temporary Plans, at Tenant's sole cost and expense, and it shall be deemed that Tenant has approved the Eleventh Floor Temporary Plans. Once Tenant has approved or has been deemed to have approved the Eleventh Floor Temporary Plans, then the approved (or deemed approved) Eleventh Floor Temporary Plans shall be thereafter known as the "Eleventh Floor Final Plans". The Eleventh Floor Final Plans shall include the complete and final layout, plans and specifications for the Eleventh Floor Expansion Space showing all doors, light fixtures, electrical outlets, telephone outlets, wall coverings, plumbing improvements (if any), data systems wiring, floor coverings, wall coverings, painting, any other improvements to the Eleventh Floor Expansion Space beyond the shell and core improvements provided by Landlord and any demolition of existing improvements in the Eleventh Floor Expansion Space. The improvements shown in the Eleventh Floor Final Plans shall (i) utilize Landlord's building standard materials and methods of construction, (ii) be compatible with the shell and core improvements and the design, construction and equipment of the Premises, and (iii) comply with all applicable laws, rules, regulations, codes and ordinances.

(c) Bids. As soon as practicable following the approval of the Eleventh Floor Final Plans, Landlord shall (i) obtain a written non-binding itemized estimate of the costs of all Eleventh Floor Expansion Improvements shown in the Eleventh Floor Final Plans as prepared by McLarney Construction (MCI) (or, if McLarney Construction is unable to provide a construction schedule satisfactory to Landlord in its reasonable judgment, then Landlord shall have the right obtain a written non-binding itemized estimate of the costs from another general contractor selected by Landlord and utilize such other contractor in lieu of McLarney Construction), and (ii) if required by applicable law, codes or ordinances, submit the Eleventh Floor Final Plans to the appropriate governmental agency for the issuance of a building permit or other required governmental approvals prerequisite to commencement of construction of such Eleventh Floor Expansion Improvements ("Permits"). Tenant acknowledges that any cost estimates are prepared by the general contractor and Landlord shall not be liable to Tenant for any inaccuracy in any such estimate. Within five (5) business days after receipt of the written non-binding cost estimate prepared by the general contractor, Tenant shall either (A) give its written approval thereof and authorization to proceed with construction or (B) immediately request the Space Planner to modify or revise the Eleventh Floor Final Plans in any manner desired by Tenant to decrease the cost of the Eleventh Floor Expansion Improvements. If Tenant is silent during such five (5) business day period, then Tenant shall be deemed to have approved such non-binding cost estimate as set forth in Clause (A) above. If the Eleventh Floor Final Plans are revised pursuant to Clause (B) above, then Landlord shall request that the general contractor provide a revised cost estimate to Tenant based upon the revisions to the Eleventh Floor Final Plans. Such modifications and revisions shall be subject to Landlord's reasonable approval and shall be in accordance with the standards set forth in Paragraph (b) of this Work Letter. Within ten (10) business days after receipt of the general contractor's original written cost estimate and the description, if any, of any Tenant Delay, Tenant shall give its final approval of the Eleventh Floor Final Plans to Landlord which shall constitute authorization to commence the construction of the Eleventh Floor Expansion Improvements in accordance with the Eleventh Floor Final Plans, as modified or revised. Tenant shall signify its final approval by signing a copy of each sheet or page of the Eleventh Floor Final Plans and delivering such signed copy to Landlord.

(d) Construction. Landlord shall commence construction of the Eleventh Floor Expansion Improvements within ten (10) days following the later of (i) the approval of the Eleventh Floor Final Plans, or (ii) Landlord's receipt of any necessary Permits. Landlord shall diligently pursue completion of construction of the Eleventh Floor Expansion Improvements and use its commercially reasonable efforts to complete construction of the Eleventh Floor Expansion Improvements as soon as reasonably practicable. Notwithstanding anything in this Fifth Amendment or in this Work Letter to the contrary, the Eleventh Floor Allowance, as specified in Paragraph 6(a) of this Fifth Amendment, shall be used only for the construction of the Eleventh Floor Expansion Improvements, and if construction of the Eleventh Floor Expansion Improvements is not completed by June 30, 2021 (the "Construction Termination Date") as a result of an aggregate of one hundred twenty (120) days of Tenant Delays, then Landlord's obligation to provide the Eleventh Floor Allowance, as specified in Paragraph 6(a) of this Fifth Amendment, shall terminate and become null and void, and Tenant shall be deemed to have waived its rights in and to said Eleventh Floor Allowance.

(e) Eleventh Floor Allowance. Subject to the terms and provisions of this Work Letter, Landlord shall pay the cost of the Eleventh Floor Expansion Improvements (the "Work") up to the amount of the Eleventh Floor Allowance. If the amount of the lowest qualified bid to perform the Work exceeds the Eleventh Floor Allowance, Tenant shall bear the cost of such excess and shall pay the estimated cost of such excess to Landlord prior to commencement of construction of such Eleventh Floor Expansion Improvements and a final adjusting payment based upon the actual costs of the Eleventh Floor Expansion Improvements shall be made when the Eleventh Floor Expansion Improvements are completed. If the cost of the Work is less than such amount, then, except as set forth in the final sentence of Paragraph (a) of this Exhibit B-1, Tenant shall not receive any credit whatsoever for the difference

between the actual cost of the Work and the Eleventh Floor Allowance. All remaining amounts due to Landlord shall be paid upon the earlier of Substantial Completion of the Eleventh Floor Expansion Improvements or presentation of a written statement of the sums due, which statement may be an estimate of the cost of any component of the Work. The cost of the permits, working drawings, hard construction costs, mechanical and electrical planning, fees, permits, general contract overhead, and a coordination fee payable to Landlord equal to five percent (5%) of the actual costs of construction and such costs or permits, fees, planning and contractor overhead shall be payable out of the Eleventh Floor Allowance and shall be included in the cost of the Work. The cost of the Work shall not include any other fees payable to Landlord.

(f) Change Order. If Tenant shall desire any changes to the Eleventh Floor Final Plans, Tenant shall so advise Landlord in writing and Landlord shall determine whether such changes can be made in a reasonable and feasible manner. Any and all costs of reviewing any requested changes, and any and all costs of making any changes to the Eleventh Floor Expansion Improvements which Tenant may request and which Landlord may agree to shall be at Tenant's sole cost and expense and shall be paid to Landlord upon demand and before execution of the change order. In no event shall Landlord be obligated to perform any Eleventh Floor Expansion Improvements which would extend the construction period past the Construction Termination Date, unless such extension was mutually agreed to in writing by Landlord and Tenant prior to the commencement of said construction. If Landlord approves Tenant's requested change, addition, or alteration, the Space Planner, at Tenant's sole cost and expense, shall complete all working drawings necessary to show the change, addition or alteration being requested by Tenant.

(g) Substantial Completion. "Substantial Completion" (or any grammatical variant thereof) of construction of the Eleventh Floor Expansion Improvements shall be defined as the date upon which (i) the Space Planner or other consultant engaged by Landlord determines that the Eleventh Floor Expansion Improvements have been substantially completed in accordance with the Eleventh Floor Final Plans except for Punch List items (defined below) and (ii) if required in order to be permitted to occupy the Eleventh Floor Expansion Space for general office uses, the City of San Jose (or the applicable permitting authority of the City of San Jose) has provided the requisite sign offs on the completion of the Eleventh Floor Expansion Improvements; provided, however, if the completion of such improvements was delayed due to any Tenant Delay (defined below), in which case the date of Substantial Completion shall be the date such improvements would have been completed, but for the Tenant Delays. The term "Punch List" items shall mean items that constitute minor defects or adjustments which can be completed after occupancy without causing any material interference with Tenant's use of the Eleventh Floor Expansion Space. After the completion of the Eleventh Floor Expansion Improvements, Tenant shall, upon demand, execute and deliver to Landlord a letter of acceptance of improvements performed on the Eleventh Floor Expansion Space. The term "Tenant Delay" shall include, without limitation, any delay in the completion of construction of Eleventh Floor Expansion Improvements resulting from (i) Tenant's failure to comply with the provisions of this Work Letter, (ii) any additional time as reasonably determined by Landlord required for ordering, receiving, fabricating and/or installing items or materials or other components of the construction of Eleventh Floor Expansion Improvements, including, without limitation, mill work, (iii) delay in work caused by submission by Tenant of a request for any change order (defined below) following Tenant's approval of the Eleventh Floor Final Plans, or for the implementation of any change order, or (iv) any delay by Tenant in timely submitting comments or approvals to the Eleventh Floor Temporary Plans or Eleventh Floor Final Plans. The failure of Tenant to take possession of or to occupy the Eleventh Floor Expansion Space shall not serve to relieve Tenant of obligations arising on the Eleventh Floor Expansion Commencement Date or delay the payment of rent by Tenant with respect to the Eleventh Floor Expansion Space.

**EXHIBIT B-2
WORK LETTER
(SECOND FLOOR EXPANSION IMPROVEMENTS)**

(a) Second Floor Expansion Improvements. Landlord, at Tenant's sole cost and expense, agrees to furnish or perform those items of construction and those improvements to the Second Floor Expansion Space (the "Second Floor Expansion Improvements") specified in the Second Floor Final Plans to be agreed to by Landlord and Tenant as set forth in Paragraph (b) below; provided, however, Landlord shall pay for the cost of such Second Floor Expansion Improvements up to the extent of the Second Floor Allowance (as defined in Paragraph 6(b) of this Fifth Amendment) as set forth in Paragraph (e) below. Notwithstanding anything herein to the contrary, except as set forth in the next following sentence, the Second Floor Allowance shall only be used towards improvements to the Second Floor Expansion Space and in no event shall any portion of such allowance be applied towards improvements to any portion of the Existing Premises or the Second Floor Expansion Space. If there are any unused amounts from the Second Floor Allowance remaining after completion of the Second Floor Expansion Improvements, then Tenant shall be permitted to use such unused portion of the Second Floor Allowance (but in no event in excess of \$259,850.00 out of any such remaining unused portion) towards the cost to complete the Eleventh Floor Expansion Improvements pursuant to Exhibit B-1 attached hereto

(b) Space Planner. Landlord has retained a space planner (the "Space Planner") to prepare certain plans, drawings and specifications (the "Second Floor Temporary Plans") for the construction of the Second Floor Expansion Improvements to be installed in the Second Floor Expansion Space by a general contractor selected by Landlord pursuant to this Work Letter. Tenant shall deliver to Space Planner within twenty (20) days after the execution of this Fifth Amendment, all necessary information required by the Space Planner to complete the Second Floor Temporary Plans. Tenant shall have five (5) business days after its receipt of the proposed Second Floor Temporary Plans to review the same and notify Landlord in writing of any comments or required changes, or to otherwise give its approval or disapproval of such proposed Second Floor Temporary Plans. If Tenant fails to give written comments to or approve the Second Floor Temporary Plans within such five (5) business day period, then Tenant shall be deemed to have approved the Second Floor Temporary Plans as submitted. Landlord shall have five (5) business days following its receipt of Tenant's comments and objections to redraw the proposed Second Floor Temporary Plans in compliance with Tenant's request and to resubmit the same for Tenant's final review and approval or comment within five (5) business days of Tenant's receipt of such revised plans. Such process shall be repeated twice and if at such time final approval by Tenant of the proposed Second Floor Temporary Plans has not been obtained, then Landlord shall complete such Second Floor Temporary Plans, at Tenant's sole cost and expense, and it shall be deemed that Tenant has approved the Second Floor Temporary Plans. Once Tenant has approved or has been deemed to have approved the Second Floor Temporary Plans, then the approved (or deemed approved) Second Floor Temporary Plans shall be thereafter known as the "Second Floor Final Plans". The Second Floor Final Plans shall include the complete and final layout, plans and specifications for the Second Floor Expansion Space showing all doors, light fixtures, electrical outlets, telephone outlets, wall coverings, plumbing improvements (if any), data systems wiring, floor coverings, wall coverings, painting, any other improvements to the Second Floor Expansion Space beyond the shell and core improvements provided by Landlord and any demolition of existing improvements in the Second Floor Expansion Space. The improvements shown in the Second Floor Final Plans shall (i) utilize Landlord's building standard materials and methods of construction, (ii) be compatible with the shell and core improvements and the design, construction and equipment of the Premises, and (iii) comply with all applicable laws, rules, regulations, codes and ordinances.

(c) Bids. As soon as practicable following the approval of the Second Floor Final Plans, Landlord shall (i) obtain a written non-binding itemized estimate of the costs of all Second Floor

Expansion Improvements shown in the Second Floor Final Plans as prepared by McLarney Construction (MCI) (or, if McLarney Construction is unable to provide a construction schedule satisfactory to Landlord in its reasonable judgment, then Landlord shall have the right obtain a written non-binding itemized estimate of the costs from another general contractor selected by Landlord and utilize such other contractor in lieu of McLarney Construction), and (ii) if required by applicable law, codes or ordinances, submit the Second Floor Final Plans to the appropriate governmental agency for the issuance of a building permit or other required governmental approvals prerequisite to commencement of construction of such Second Floor Expansion Improvements (“Permits”). Tenant acknowledges that any cost estimates are prepared by the general contractor and Landlord shall not be liable to Tenant for any inaccuracy in any such estimate. Within five (5) business days after receipt of the written non-binding cost estimate prepared by the general contractor, Tenant shall either (A) give its written approval thereof and authorization to proceed with construction or (B) immediately request the Space Planner to modify or revise the Second Floor Final Plans in any manner desired by Tenant to decrease the cost of the Second Floor Expansion Improvements. If Tenant is silent during such five (5) business day period, then Tenant shall be deemed to have approved such non-binding cost estimate as set forth in Clause (A) above. If the Second Floor Final Plans are revised pursuant to Clause (B) above, then Landlord shall request that the general contractor provide a revised cost estimate to Tenant based upon the revisions to the Second Floor Final Plans. Such modifications and revisions shall be subject to Landlord’s reasonable approval and shall be in accordance with the standards set forth in Paragraph (b) of this Work Letter. Within ten (10) business days after receipt of the general contractor’s original written cost estimate and the description, if any, of any Tenant Delay, Tenant shall give its final approval of the Second Floor Final Plans to Landlord which shall constitute authorization to commence the construction of the Second Floor Expansion Improvements in accordance with the Second Floor Final Plans, as modified or revised. Tenant shall signify its final approval by signing a copy of each sheet or page of the Second Floor Final Plans and delivering such signed copy to Landlord.

(d) Construction. Landlord shall commence construction of the Second Floor Expansion Improvements within ten (10) days following the later of (i) the approval of the Second Floor Final Plans, or (ii) Landlord’s receipt of any necessary Permits. Landlord shall diligently pursue completion of construction of the Second Floor Expansion Improvements and use its commercially reasonable efforts to complete construction of the Second Floor Expansion Improvements as soon as reasonably practicable. Notwithstanding anything in this Fifth Amendment or in this Work Letter to the contrary, the Second Floor Allowance, as specified in Paragraph 6(b) of this Fifth Amendment, shall be used only for the construction of the Second Floor Expansion Improvements, and if construction of the Second Floor Expansion Improvements is not completed by June 30, 2021 (the “Construction Termination Date”) as a result of an aggregate of at least one hundred twenty (120) days of Tenant Delays, then Landlord’s obligation to provide the Second Floor Allowance, as specified in Paragraph 6(a) of this Fifth Amendment, shall terminate and become null and void, and Tenant shall be deemed to have waived its rights in and to said Second Floor Allowance.

(e) Second Floor Allowance. Subject to the terms and provisions of this Work Letter, Landlord shall pay the cost of the Second Floor Expansion Improvements (the “Work”) up to the amount of the Second Floor Allowance. If the amount of the lowest qualified bid to perform the Work exceeds the Second Floor Allowance, Tenant shall bear the cost of such excess and shall pay the estimated cost of such excess to Landlord prior to commencement of construction of such Second Floor Expansion Improvements and a final adjusting payment based upon the actual costs of the Second Floor Expansion Improvements shall be made when the Second Floor Expansion Improvements are completed. If the cost of the Work is less than such amount, then Tenant shall not receive any credit whatsoever for the difference between the actual cost of the Work and the Second Floor Allowance. All remaining amounts due to Landlord shall be paid upon the earlier of Substantial Completion of the Second Floor Expansion Improvements or presentation of a written statement of the sums due, which statement may be an estimate

of the cost of any component of the Work. The cost of the permits, working drawings, hard construction costs, mechanical and electrical planning, fees, permits, general contract overhead, and a coordination fee payable to Landlord equal to five percent (5%) of the actual costs of construction and such costs or permits, fees, planning and contractor overhead shall be payable out of the Second Floor Allowance and shall be included in the cost of the Work. The cost of the Work shall not include any other fees payable to Landlord.

(f) Change Order. If Tenant shall desire any changes to the Second Floor Final Plans, Tenant shall so advise Landlord in writing and Landlord shall determine whether such changes can be made in a reasonable and feasible manner. Any and all costs of reviewing any requested changes, and any and all costs of making any changes to the Second Floor Expansion Improvements which Tenant may request and which Landlord may agree to shall be at Tenant's sole cost and expense and shall be paid to Landlord upon demand and before execution of the change order. In no event shall Landlord be obligated to perform any Second Floor Expansion Improvements which would extend the construction period past the Construction Termination Date, unless such extension was mutually agreed to in writing by Landlord and Tenant prior to the commencement of said construction. If Landlord approves Tenant's requested change, addition, or alteration, the Space Planner, at Tenant's sole cost and expense, shall complete all working drawings necessary to show the change, addition or alteration being requested by Tenant.

(g) Substantial Completion. "Substantial Completion" (or any grammatical variant thereof) of construction of the Second Floor Expansion Improvements shall be defined as the date upon which (i) the Space Planner or other consultant engaged by Landlord determines that the Second Floor Expansion Improvements have been substantially completed in accordance with the Second Floor Final Plans except for Punch List items (defined below) and (ii) if required in order to be permitted to occupy the Second Floor Expansion Space for general office uses, the City of San Jose (or the applicable permitting authority of the City of San Jose) has provided the requisite sign offs on the completion of the Second Floor Expansion Improvements; provided, however, if the completion of such improvements was delayed due to any Tenant Delay (defined below), in which case the date of Substantial Completion shall be the date such improvements would have been completed, but for the Tenant Delays. The term "Punch List" items shall mean items that constitute minor defects or adjustments which can be completed after occupancy without causing any material interference with Tenant's use of the Second Floor Expansion Space. After the completion of the Second Floor Expansion Improvements, Tenant shall, upon demand, execute and deliver to Landlord a letter of acceptance of improvements performed on the Second Floor Expansion Space. The term "Tenant Delay" shall include, without limitation, any delay in the completion of construction of Second Floor Expansion Improvements resulting from (i) Tenant's failure to comply with the provisions of this Work Letter, (ii) any additional time as reasonably determined by Landlord required for ordering, receiving, fabricating and/or installing items or materials or other components of the construction of Second Floor Expansion Improvements, including, without limitation, mill work, (iii) delay in work caused by submission by Tenant of a request for any change order (defined below) following Tenant's approval of the Second Floor Final Plans, or for the implementation of any change order, or (iv) any delay by Tenant in timely submitting comments or approvals to the Second Floor Temporary Plans or Second Floor Final Plans. The failure of Tenant to take possession of or to occupy the Second Floor Expansion Space shall not serve to relieve Tenant of obligations arising on the Second Floor Expansion Commencement Date or delay the payment of rent by Tenant with respect to the Second Floor Expansion Space.

CERTIFICATION OF CHIEF EXECUTIVE OFFICER
PURSUANT TO EXCHANGE ACT RULES 13a-14(a) AND 15d-14(a)
AS ADOPTED PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Eric S. Yuan, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Zoom Video Communications, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - c. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
